## **Extraterrestrial Friends And Foes:**

**Extra-Terrestrial Friends and Foes** George C. Andrews, 1993      **Extraterrestrial Altruism** Douglas A.

Vakoch, 2013-09-14 Extraterrestrial Altruism examines a basic assumption of the Search for Extraterrestrial Intelligence SETI that extraterrestrials will be transmitting messages to us for our benefit This question of whether extraterrestrials will be altruistic has become increasingly important in recent years as SETI scientists have begun contemplating transmissions from Earth to make contact Technological civilizations that transmit signals for the benefit of others but with no immediate gain for themselves certainly seem to be altruistic But does this make biological sense Should we expect altruism to evolve throughout the cosmos or is this only wishful thinking Is it dangerous to send messages to other worlds as Stephen Hawking has suggested or might humankind benefit from an exchange with intelligence elsewhere in the galaxy Would extraterrestrial societies be based on different ethical principles or would we see commonalities with Earthly notions of morality

Extraterrestrial Altruism explores these and related questions about the motivations of civilizations beyond Earth providing new insights that are critical for SETI Chapters are authored by leading scholars from diverse disciplines anthropology astronomy biology chemistry computer science cosmology engineering history of science law philosophy psychology public policy and sociology The book is carefully edited by Douglas Vakoch Director of Interstellar Message Composition at the SETI Institute and professor of clinical psychology at the California Institute of Integral Studies The Foreword is by Frank Drake This interdisciplinary book will benefit everybody trying to understand whether evolution and ethics are unique to Earth or whether they are built into the fabric of the universe      Alien Intrusion Gary Bates, 2004 Most people at one time or another have probably been curious to know What could account for all of those strange objects in the sky that many credible witnesses see Or what about the modern mystery of alien abductions and stories of visitations by beings claiming to be from other planets or star systems Are aliens really making contact with human beings Is it important anyway At last an easy to understand book traces the history of this strange phenomenon utilizing the research of many of the heavyweights of UFOlogy and it s been making sense to a lot of people This is a book for everyone The author s research and conclusions will surprise you and challenge your thinking not just about UFOs but about the nature of life itself This is a landmark volume that brings together the most important evidences coming to conclusions far more sinister yet profound than most could imagine Publisher
