Gustav Metzger Susanne Pfeffer, 2024 **Gustav Metzger** Gustav Metzger, 2008 Mainframe Experimentalism Hannah Higgins, Douglas Kahn, 2012-09-21 Mainframe Experimentalism challenges the conventional wisdom that the digital arts arose out of Silicon Valley's technological revolutions in the 1970s. It presents a collection of essays on the early use of computers and computing in art, music, film, and poetry during the 1960s, before the advent of the PC. Douglas Kahn, based at UNSW Australia. The Persistence of Nationalism Angharad Closs Stephens, 2013-03-12 This is a book about the difficulties of thinking and acting politically in ways that refuse the politics of nationalism. The book offers a detailed study of how contemporary attempts by theorists of cosmopolitanism, citizenship, globalism, and multiculturalism to go beyond nationalism often reproduce key aspects of a nationalist imaginary. It argues that the challenge of resisting nationalism will require more than a shift in the scale of politics from the national up to the global or down to the local, and more than a shift in the count of politics to an emphasis on diversity and multiculturalism. In order to avoid the grip of nationalist thinking, we need to re-open the question of what it means to imagine community. Set against the backdrop of the imaginative geographies of the War in Terror and the new beginning promised by the Presidency of Barack Obama, the book shows how critical interventions often work in collaboration with nationalist politics, even when the aim is to resist nationalism. It claims that a nationalist imaginary includes powerful understandings of freedom, subjectivity, sovereignty, and political space-time, which must also be placed under question if we want to avoid reproducing ideas about us and them. Drawing on insights from feminist, cultural, and postcolonial studies, as well as critical approaches to International Relations and Geography, this book presents a unique and refreshing approach to the politics of nationalism. Machine Art in the Twentieth Century Andreas Broeckmann, 2016-12-16 An investigation of artists' engagement with technical systems, tracing art historical lineages that connect works of different periods. Machine art is neither a movement nor a genre, but encompasses diverse ways in which artists engage with technical systems. In this book, Andreas Broeckmann examines a variety of twentieth and early twenty-first century artworks that articulate people's relationships with machines. In the course of his investigation, Broeckmann traces historical lineages that connect art of different periods, looking for continuities that link works from the end of the century to developments in the 1950s and 1960s, and to works by avant-garde artists in the 1910s and 1920s. An art historical perspective, he argues, might change our views of recent works that seem to be driven by new media technologies, but that in fact continue a century-old artistic exploration. Broeckmann investigates critical aspects of machine aesthetics that characterized machine art until the 1960s, and then turns to specific domains of artistic engagement with technology: algorithms and machine autonomy, looking in particular at the work of the Canadian artist David Rokeby, vision and image, and the advent of technical imaging and the

human body using the work of the Australian artist Stelarc as an entry point to art that couples the machine to the body mechanically or cybernetically Finally Broeckmann argues that systems thinking and ecology have brought about a fundamental shift in the meaning of technology which has brought with it a rethinking of human subjectivity He examines a range of artworks including those by the Japanese artist Seiko Mikami whose work exemplifies the shift
