## **Gut Reactions A Perceptual Theory Of Emotion:**

*Gut Reactions* Jesse J. Prinz, 2004-08-12 *Gut Reactions* is an interdisciplinary defense of the claim that emotions are perceptions in a double sense First of all they are perceptions of changes in the body but through the body they also allow us to literally perceive danger loss and other matters of concern This proposal which Prinz calls the embodied appraisal theory reconciles the long standing debate between those who say emotions are cognitive and those who say they are noncognitive The basic idea behind embodied appraisals is captured in the familiar notion of a gut reaction which has been overlooked by much emotion research Prinz also addresses emotional valence emotional consciousness and the debate between

investigates how bodily information contributes to categorization processes for at least some conceptual classes and thus to the individual mastery of meanings for at least some word classes The bodily information considered is mainly that provided by the so called proprioceptive and interoceptive systems introduced by Sherrington The authors reconsider this in a new Gibsonian fashion calling it more generally proprioception which indicates the complex of all the bodily signals we are aware of and the qualitative experiences these give rise to The book shows that proprioceptive information understood in this sense is essential for explaining among others how we develop broad categories such as animate vs inanimate concepts denoting bodily experiences such as hunger or pain as well as emotions and abstract concepts such as friendship and freedom and in accounting for how we master the meanings of the corresponding words in our language *Passion, Death, and Spirituality* Kathleen Higgins, David Sherman, 2012-05-30 Robert C Solomon who died in 2007 was Professor of Philosophy and Quincy Lee Centennial Professor of Business at the University of Texas USA As the first book comprehensively to examine the

breadth of Solomon's contribution to philosophy this volume ranks as a vital addition to the literature. It includes a newly published transcript of Solomon's last talk which responded to Arindam Chakrabarti on the concept of revenge as well as the considered views of prominent figures in the numerous subfields in which Solomon worked. The content analyses his perspectives on the philosophy of emotion, virtue, business ethics, and religion, in addition to philosophical history, existentialism, and the many other topics that held this prolific thinker's attention. Solomon memorably defined philosophy itself as the thoughtful love of life, and despite the diversity of his output, he was most drawn by central questions about the meaning of life, the essential role that emotions play in finding that meaning, and the human imperative to seek emotional integrity in which one's thoughts, emotions, and actions all contribute to a coherent narrative. The essays included here draw attention to the interconnections between the issues Solomon addressed and evince the manner in which he embodied that integrity, living a life at one with his philosophy. They emphasize the central themes of passion, ethics, and spirituality which threaded through his work, and the way these ideas informed his views on how we should approach grief and death. The multiplicity of topics alone make this keystone work an enlightening read for a full spectrum of students of philosophy, providing much to ponder and recounting a subtle and shining example of the emotional integrity Solomon worked so hard to define.

**Autonomy, Oppression, and Gender** Andrea Veltman, Mark Piper, 2014-07-14 This collection of new essays examines philosophical issues at the intersection of feminism and autonomy studies. Are autonomy and independence useful goals for women and subordinate persons? Is autonomy possible in contexts of social subordination? Is the pursuit of desires that issue from patriarchal norms consistent with autonomous agency? How do emotions and caring relate to autonomous deliberation? Contributors to this collection answer these questions and others, advancing central debates in autonomy theory by examining basic components, normative commitments, and applications of conceptions of autonomy. Several chapters look at the conditions necessary for autonomous agency and at the role that values and norms such as independence, equality, inclusivity, self-respect, care, and femininity play in feminist theories of autonomy. Whereas some contributing authors focus on dimensions of autonomy that are internal to the mind, such as deliberative reflection, desires, cares, emotions, self-identities, and feelings of self-worth, several authors address social conditions and practices that support or stifle autonomous agency, often answering questions of practical import. These include such questions as: What type of gender socialization best supports autonomous agency and feminist goals? When does adapting to severely oppressive circumstances, such as those in human trafficking, turn into a loss of autonomy? How are ideals of autonomy affected by capitalism? How do conceptions of autonomy inform issues in bioethics, such as end-of-life decisions or rights to bodily self-determination?

*Cognition and Emotion* Jan De Houwer, Dirk Hermans, 2010-05-09 This book assembles a collection of state-of-the-art reviews of the most important topics in cognition and emotion research: emotion theories, the perception and expression of emotion, emotion regulation, emotion and memory, and emotion and attention.

Emotion and Value Sabine Roeser, Cain Todd, 2014-11-06 This

volume brings together new work by leading philosophers on the topics of emotion and value and explores issues at their intersection. Philosophers and psychologists working on the emotions have reached something of a consensus about the complex inter related nature of the affective and cognitive components of emotions and have increasingly focussed on the important epistemological role that emotions play in giving us access to values. At the same time an increasing number of philosophers have become attracted to analyses of value that give emotions a prominent place in evaluative judgements and experiences. The work undertaken in each of these areas has important implications for current research on topics such as the role that emotions play in practical rationality and moral psychology, the connection between imagination and emotion in the appreciation of fiction and more generally with the ability of emotions to discern axiological saliences and to ground or fail to ground the objectivity of ethical or aesthetic value judgements. This volume makes a unique contribution to scholarship on emotion and value by bringing together top authors from these lines of research. In addition the volume contains a number of contributions that explore various links between the emotions and self understanding touching on a range of themes that include depression, empathy, agency, guilt and self trust. All of these issues are approached from a number of different perspectives in order to present the reader with a wide view of this extremely rich terrain and to demonstrate how the latest thinking in a number of currently intensive areas of research is deeply interconnected.

*Philosophies of Gratitude* Ashraf H. A. Rushdy, 2020. Ashraf H. A. Rushdy examines gratitude as a philosophical concept. In the first half of the book he outlines its history and significance in western philosophical history, specifically in classical antiquity, the early modern era and the Enlightenment. The second half of the book is focused on contemporary meanings of gratitude as a sentiment, action and disposition: how we feel grateful, act grateful and cultivate grateful being. Rushdy argues that gratitude is a virtue that we practice in moral recognition of our dependency and connectedness with our families, friends, communities, environments and universe.

*Human Emotions and the Origins of Bioethics* Susi Ferrarello, 2020-12-06. This book provides a unique phenomenological dialogue between psychology and philosophy on the origin of bioethics that shows the importance of bringing emotions into bioethical discourse. Divided into two parts, the book begins by defining bioethics and explaining the importance of emotions in making us human, allowing us to consider life holistically. Ferrarello argues that emotions and bioethics are better served when they are combined and that dismissing emotions as nothing more than a nuisance to our rationality has created a society that does not fit our human nature. Chapters explore how ethics relate to intimate life and how ethical agents determine themselves within their surrounding world uniquely and interrogatively using bioethics to consider not only medical dilemmas but also issues concerning environmental and individual well being. By addressing personal, interpersonal and societal problems as dynamically interconnected in bioethical problems, she helps us to renew our sense of responsibility toward a good quality of life. This interdisciplinary book is invaluable reading for students of health science, psychology and philosophy as well as for those interested in the link between emotions and bioethical discourse from

**Fact and Value in Emotion** Louis C. Charland, Peter Zachar, 2008-03-06 There is a large amount of scientific work on emotion in psychology neuroscience biology physiology and psychiatry which assumes that it is possible to study emotions and other affective states objectively Emotion science of this sort is concerned primarily with facts and not values with description not prescription The assumption behind this vision of emotion science is that it is possible to distinguish factual from evaluative aspects of affectivity and emotion and study one without the other But what really is the basis for distinguishing fact and value in emotion and affectivity And can the distinction withstand careful scientific and philosophical scrutiny The essays in
