Janković, Marko Jankovic, 2018-06-11 The papers collected in this volume provide invaluable insights into the results of different interactions between Romans and Others Articles dealing with cultural changes within and outside the borders of Roman Empire highlight the idea that those very changes had different results and outcomes depending on various social political economic geographical and chronological factors Most of the contributions here focus on the issues of what it means to be Roman in different contexts and show that the concept and idea of Roman ness were different for the various populations that interacted with Romans through several means of communication including political alliances wars trade and diplomacy The volume also covers a huge geographical area from Britain across Europe to the Near East and the Caucasus but also provides information on the Roman Empire through eyes of foreigners such as the ancient Chinese

**Southeast Arabia at the Dawn of the Second Millennium** Derek Kennet, Alyson Caine, Anna Hilton, Lloyd Weeks, Christian Velde, 2025-02-28 First full publication of a cemetery of the Bronze Age Wadi Suq period 2000 1650 BC in the region of the UAE a period marked by large scale cultural and economic changes The end of the 3rd millennium was a time of significant transformation in south east Arabia the United

Arab Emirates and northern Oman The cultural homogeneity of the preceding Early Bronze Age Umm an Nar period c 2700 2000 BC came to an end and gave way to the Middle Bronze Age Wadi Suq period 2000 1600 BC Settlements changed and possibly began to decline in size and number the economy changed for many and the important trade in copper ore seems to have declined In addition there was a marked change in funerary practices as new types of tombs appeared both collective and individual burials All of this took place within the context of a climatic shift that led to a decline in rainfall across many parts of the region Much of the countryside of south eastern Iran was abandoned and the urban period of the Indus Valley was weakening In the midst of this turmoil the limited agricultural plains of northern Ras al Khaimah appear to have developed into an island where there was greater continuity than elsewhere This book reports on the excavation of a number of monumental collective tombs that were built there and used through the early part of the 2nd millennium The way that they were constructed and used as well as the burial goods that they contain throw light on the population of this area and give some indication of how and why it was that life continued in this small pocket in a way that was different to surrounding regions

*Judah and the Judeans in the Achaemenid Period* Oded Lipschits, Gary N. Knoppers, Manfred Oeming, 2011-06-30 In April 2008 an international colloquium was held at the University of Heidelberg the fourth convocation of a group of scholars with some rotating members who gathered to discuss the status of Judah and the Judeans in the exilic and postexilic periods The goal of this gathering was specifically to address the question of national identity in the period when many now believe this very issue was in significant foment and development the era of the Persian Achaemenid domination of the ancient Near East This volume contains most of the papers delivered at the Heidelberg conference considering the matter under two rubrics 1 the biblical evidence and the diversity of data from the Bible and 2 the cultural historical social and environmental factors affecting the formation of national identity Contributors K Schmid J Schaper A C Hagedorn C Nihan J Middlemas D Rom Shiloni J W hrle Y Dor K Southwood D N Fulton P A Beaulieu L E Pearce D Redford A Lemaire J F Quack B Becking R G Kratz O Tal J Blenkinsopp R Albertz J L Wright D S Vanderhooft M Oeming and A Kloner Earlier volumes in the series of conferences are Judah and the Judeans in the Neo Babylonian Period Judah and the Judeans in the Persian Period and Judah and the Judeans in the in the Fourth Century B C E

*Times of Transition* Sylvie Honigman, Christophe Nihan, Oded Lipschits, 2021-03-15 This multidisciplinary study takes a fresh look at Judean history and biblical literature in the late fourth and third centuries BCE In a major reappraisal of this era the contributions to this volume depict it as one in which critical changes took place Until recently the period from Alexander s conquest in 332 BCE to the early years of Seleucid domination following Antiochus III s conquest in 198 BCE was reputed to be poorly documented in material evidence and textual production buttressing the view that the era from late Persian to Hasmonean times was one of seamless continuity Biblical scholars believed that no literary activity belonged to the Hellenistic age and archaeologists were unable to refine their understanding because of a lack of secure chronological markers However recent studies are revealing this

period as one of major social changes and intense literary activity. Historians have shed new light on the nature of the Hellenistic empires and the relationship between the central power and local entities in ancient imperial settings and the redating of several biblical texts to the third century BCE challenges the traditional periodization of Judean history. Bringing together Hellenistic history, the archaeology of Judea, and biblical studies, this volume appraises the early Hellenistic period anew as a time of great transition and change and situates Judea within its broader regional and transregional imperial contexts.

**Serçe Limani** George F. Bass, Sheila Matthews, J. Richard Steffy, Frederick H. van Doorninck, 2004-08-16 For almost a millennium a modest wooden ship lay underwater off the coast of Serçe Limani, Turkey, filled with evidence of trade and objects of daily life. The ship, now excavated by the Institute of Nautical Archaeology at Texas A M University, trafficked in both the Byzantine and Islamic worlds of its time. The ship is known as the Glass Wreck because its cargo included three metric tons of glass cullet, including broken Islamic vessels and eighty pieces of intact glassware. In addition, it held glazed Islamic bowls, red ware cooking vessels, copper cauldrons and buckets, wine amphorae, weapons, tools, jewelry, fishing gear, remnants of meals, coins, scales, and weights, and more. This first volume of the complete site report introduces the discovery, the methods of its excavation, and the conservation of its artifacts. Chapters cover the details of the ship, its contents, the probable personal possessions of the crew, and the picture of daily shipboard life that can be drawn from the discoveries.

*Silver, Butter, Cloth* Jane Kershaw, Gareth Williams, Søren Sindbaek, Søren M. Sindbæk, James Graham-Campbell, 2019 *Silver, Butter, Cloth* discusses what constituted money in the Viking Age and how money was used. It is widely accepted that silver constituted the main form of currency. *Silver, Butter, Cloth* examines how silver functioned as payment but also explores the monetary role of non-silver currencies in the Viking economy.

*Tartessos and the Phoenicians in Iberia* Sebastián Celestino Pérez, Carolina López-Ruiz, 2016 This is the first book in English about the earliest historical civilization in the western Mediterranean, known as Tartessos. Endowed with extraordinary wealth in metals and strategically positioned between the Atlantic and Mediterranean trading routes at the time of Greek and Phoenician colonial expansion, Tartessos flourished in the eighth and seventh centuries BCE. Tartessos became a literate, sophisticated urban culture in southwestern Iberia, today's Spain and Portugal, enriched by commercial contacts with the Aegean and the Levant since at least the ninth century. In its material culture—architecture, grave goods, sanctuaries, plastic arts—we see how native elements combined with imported, orientalizing innovations introduced by the Phoenicians. Historians of the rank of Herodotus and Livy, geographers such as Strabo and Pliny, Greek and Punic periplois, and perhaps even Phoenician and Hebrew texts testify to the power, wealth, and prominence of this westernmost Mediterranean civilization. Archaeologists, in turn, have demonstrated the existence of a fascinating, complex society with both strong local roots and international flare. Yet, for still mysterious reasons, Tartessos did not attain a Classical period like its peer emerging cultures did at the same time: Etruscans, Romans, Greeks. This book combines the expertise of its two authors in archaeology, philology, and cultural history to present a comprehensive, coherent

theoretically up to date and informative overview of the discovery sources and debates surrounding this puzzling culture of ancient Iberia and its complex hybrid identity vis a vis the western Phoenicians This book will be of great interest to students of the classics archaeology and ancient history Phoenician Punic studies colonization and cultural contact **The Monetary Systems of the Greeks and Romans** W. V. Harris, 2010-04-29 Most people have some idea what Greeks and Romans coins looked like but few know how complex Greek and Roman monetary systems eventually became The contributors to this volume are numismatists ancient historians and economists intent on investigating how these systems worked and how they both did and did not resemble a modern monetary system Why did people first start using coins How did Greeks and Romans make payments large or small What does money mean in Greek tragedy Was the Roman Empire an integrated economic system This volume can serve as an introduction to such questions but it also offers the specialist the results of original research *A Cultural History of Money in Antiquity* Stefan Krmnicek, 2021-03-11 The origins of the modern Western concept of money can be traced back to the earliest electrum coins that were produced in Asia Minor in the seventh century BCE While other forms of currency shells jewelry silver ingots were in widespread use long before this the introduction of coinage aided and accelerated momentous economic political and social developments such as long distance trade wealth creation and the social differentiation that followed from that and the financing of military and political power Coinage though adopted inconsistently across different ancient societies became a significant marker of identity and became embedded in practices of religion and superstition And this period also witnessed the emergence of the problems of money inflation monetary instability and the breakup of monetary unions which have surfaced repeatedly in succeeding centuries Drawing upon a wealth of visual and textual sources *A Cultural History of Money in Antiquity* presents essays that examine key cultural case studies of the period on the themes of technologies ideas ritual and religion the everyday art and representation interpretation and the issues of the age **Colonial Encounters in Ancient Iberia** Michael Dietler, Carolina López-Ruiz, 2009-10-15 During the first millennium BCE complex encounters of Phoenician and Greek colonists with natives of the Iberian Peninsula transformed the region and influenced the entire history of the Mediterranean One of the first books on these encounters to appear in English this volume brings together a multinational group of contributors to explore ancient Iberia's colonies and indigenous societies as well as the comparative study of colonialism These scholars from a range of disciplines including classics history anthropology and archaeology address such topics as trade and consumption changing urban landscapes cultural transformations and the ways in which these issues played out in the Greek and Phoenician imaginations Situating ancient Iberia within Mediterranean colonial history and establishing a theoretical framework for approaching encounters between colonists and natives these studies exemplify the new intellectual vistas opened by the engagement of colonial studies with Iberian history
