Cole, 1989-07-01 Vast social change has occurred in the Middle East since the oil boom of the mid 1970s As the first anthropological study of an urban community in Saudi Arabia since that oil boom Arabian Oasis City is also the first to document those changes Based on extensive interviews and participant observation with both men and women the authors record and analyze the transformation that has occurred in this ancient oasis city throughout the twentieth century the creation of the present Saudi Arabian state and of a new national economy based on the export of oil and the economic boom brought about by the dramatic increases in the price of oil following the October 1973 Arab Israeli War In addition the authors reveal the changes brought about by the fall in the price of oil beginning in 1982 and analyze the problems confronting Unayzah in its aftermath By demonstrating that the area was not exclusively dominated by tribalism and Bedouin nomads this empirical case study destroys stereotypical views about Saudi Arabia Indeed it proves the existence prior to the coming of the modern Saudi Arabian state of surplus agricultural and craft production and the full development of local regional and long distance trade networks It shows that women although veiled played active roles in work outside the household The social impact of change over the years is however profound especially the gradual replacement of the extended family by the nuclear family changing patterns of husband wife relationships the impact of self earned income on the status of women and the emergence of a new middle class of employees and entrepreneurs Because of the high degree of gender segregation in this area of research Altorki and Cole give us a fortunate collaboration between a Saudi Arabian female scholar and an American male scholar experienced in research in the Middle East **Saudi Arabia**, 1984

A Most Masculine State Madawi Al-Rasheed,2013-03-15 Women in Saudi Arabia are often described as either victims of patriarchal religion and society or successful survivors of discrimination imposed on them by others Madawi Al Rasheed s new book goes beyond these conventional tropes to probe the historical political and religious forces that have across the years delayed and thwarted their emancipation The book demonstrates how under the patronage of the state and its religious nationalism women have become hostage to contradictory political projects that on the one hand demand female piety and on the other hand encourage modernity Drawing on state documents media sources and interviews with women from across Saudi society the book examines the intersection between gender religion and politics to explain these contradictions and to show that despite these restraints vibrant debates on the question of women are opening up as the struggle for recognition and equality finally gets under way
