A Time to Every Purpose Michael Kammen, 2015-12-01 In artworks from a mosaic by Marc Chagall to schoolchildren's paintings in writings from Susan Fenimore Cooper to Annie Dillard and in diverse print sources from family genealogical registers to seed catalogs the four seasons appear and reappear as a theme in American culture In this richly illustrated book Michael Kammen traces the appeal of the four seasons motif in American popular culture and fine arts from the seventeenth century to the present Its symbolism has evolved through the years Kammen explains serving as a metaphor for the human life cycle or religious faith expressing nostalgia for rural life and sometimes praising seasonal beauty in the diverse American landscape as the most spectacular in the world Kammen also highlights artists and writers shift in attention from the glories of seasonal peaks to the dynamics of seasonal transitions as American life continued to accelerate and change through the twentieth century Few symbols have been as pervasive meaningful and symptomatic in the human experience as the four seasons and as Kammen shows in its American context the annual cycle has been an abundant and abiding source of inspiration in the nation's cultural history

Messages from the Wild Frederick R. Gehlbach, 2010-07-05 A Texas naturalist shares an intimate record of the wooded ravine near his home in this almanac based on decades of journal entries In the mid 1960s naturalist Fred Gehlbach and his family built a house on the edge of a wooded ravine in Central Texas On daily walks over the hills creek hollows and fields of the ravine Gehlbach has observed the cycles of weather and seasons the annual migrations of birds and the life cycles of animals and plants that also live there In this book Gehlbach draws on thirty five years of journal entries to present a composite day by day almanac of the life cycles of this semiwild natural island in the midst of urban Texas

Recording such events as the hatching of Eastern screech owl chicks the emergence of June bugs and the first freeze of November he reminds us of nature's daily monthly and annual cycles from which humans are becoming ever more detached in our unnatural urban environments The long span of the almanac also allows Gehlbach to track how local and even global developments have affected the ravine from scars left by sewer construction to an increase in frost free days probably linked to global warming This long term record of natural cycles provides one of only two such baseline data sets for North America At the same time it is an eloquent account of one keen observer's daily interactions with his wild and human neighbors

Appalachian Spring Marcia Bonta, 2010-06-15 Marcia Bonta is a naturalist writer who has lived on a 500 acre mountain top farm in central Pennsylvania for twenty years Appalachian Spring is her personal account of that glorious spectacle the coming of the spring to the woods and fields of Appalachia The book begins with spring preliminaries in January and February when gray squirrels mate and the great horned owls conduct their courtship rites Then with the onset of true spring the intricacies of the season unravel day by day in journal entries that combine Bonta's own meticulous observations with the research reported by botanists entomologists and other natural scientists She recounts her hours spent watching an active red fox den or observing the drumming of a male ruffed grouse all without the benefit of a blind She discovers new born fawns on the trail and hen turkeys with their poults in the field A black bear peers into her sitting room window deer play tag in her front yard Birdwatching is an integral part of her spring ritual she records both the return of nesting species and the passing through of migrants She spends a blustery St Patrick's Day following a flock of American pipits foraging in her field discovers and watches an ovenbird nest beside her trail and counts twenty three species of wood warblers during one spectacular day in mid May Every aspect of the natural world catches her eye from the life cycle of a tent caterpillar to the sex life of a jack in the pulpit But while she considers her book to be her own love song about the place and season on earth she loves most she also mourns the continual exploitation of the natural

earth by humanity for its own often superficial uses She hopes by recounting the wonders of the natural world to convert others to what she calls the third stage in humanity's relationship with nature that of empathy with all of nature for its own sake To know the earth better to grasp a little of its workings to look on it with awe and wonder as well as with respect is to want to save it from destruction

Appalachian Autumn Marcia Bonta, 2011-12-01 Like her popular Appalachian Spring Marcia Bonta's new book offers a day by day account of the changing world of nature in the mountains of central Pennsylvania This time she chronicles the beauties of the autumn months as she walks the familiar roads and trails of her 500 acre mountain top farm noting the minute transformations of the season as well as the more dramatic ones But her quiet sojourn in the natural world is shattered by the intrusion of a lumberman who insists upon clear cutting a neighboring property The massive bulldozers and skidders crush every tree and shrub weed and wildflower leaving only rubble in their wake The Bontas become involved in a lawsuit challenging this violation of the land they love and seeking to protect their own property from the effects of the logging Autumn is a bittersweet time Bonta writes a season of good byes when after the flaming leaves fall and start the inevitable process of decay we are left with only the bare bones of nature Fleeing from the whine of chain saws and the crash of falling trees she roams the mountain top watching wild turkeys forage in the field flocks of migrating birds feast on wild grapes does and bucks eye each other in their mating ritual But she can never completely evade the insistent question What is the

relationship between humans and nature Does ownership give one the right to do as one pleases with the land and all the flora and fauna living on it Does the natural world exist solely to satisfy mankind's desire for profit The answer is not simple it cannot be drawn in winter's black and white But the issues must be of concern to every thoughtful person Marcia Bonta's *Appalachian Autumn* offers a new voice in the ongoing debate **Simon & Schuster Handbook for Writers** Lynn Quitman Troyka, 1987 **Sun, Moon, and Stars** Frank Murphy, Deborah Rovin-Murphy, Mary Beth Spann, 2001 This engaging thematic unit includes songs pocket chart poems word wall activities mini books hands on math and science activities easy to make manipulatives literature links and more which are all related to the sun the moon and the stars Includes a big colorful poster Illustrations **Appalachian Summer** Marcia Bonta, 2011-12-01 As she did in *Appalachian Spring* and *Appalachian Autumn* Bonta offers a day by day account of the natural life of one place her 648 acre property in south central Pennsylvania In *Appalachian Summer* Bonta's first grandchild spends her first summer on earth and her growth is compared with that of the forest animals Another important event in this *Appalachian summer* is the disappearance of a local girl As the mountain is thoroughly searched Bonta poses questions about the safety of women in the woods Do women stay out of the woods because they fear attack by men or wild creatures and the unknown Should they have such fears In her minute observations of one place one season Marcia Bonta lays bare the connections we retain to the natural world which is finally our own **Of Discovery & Destiny** Robert C. Baron, Elizabeth Darby Junkin, 1986 An anthology of poetry short stories and excerpts from longer works about the American experience of the land and nature by a variety of American authors past and present **Organic Gardening**, 1986-07 **AB Bookman's Weekly**, 1998 **Season of Promise** June Carver Roberts, 1993 In this new study of wild plants Roberts depicts over 250 plants and describes their methods of survival over the winter She shows how they sustain themselves by habitat flower design pollinators style of fruiting and seed or spore dispersal The drawings and paintings were done from living plants in minute detail and with botanical accuracy Roberts collection of winter plants is an artistic tribute to the quiet beauty of the woodlands of the northeastern United States
