## Half The Earth:

**Half-Earth** Edward O Wilson, 2016-03-22 Half Earth proposes an achievable plan to save our imperiled biosphere devote half the surface of the Earth to nature In order to stave off the mass extinction of species including our own we must move swiftly to preserve the biodiversity of our planet says Edward O Wilson in his most impassioned book to date Half Earth argues that the situation facing us is too large to be solved piecemeal and proposes a solution commensurate with the magnitude of the problem dedicate fully half the surface of the Earth to nature If we are to undertake such an ambitious endeavor we first must understand just what the biosphere is why it s essential to our survival and the manifold threats now facing it In doing so Wilson describes how our species in only a mere blink of geological time became the architects and rulers of this epoch and outlines the consequences of this that will affect all of life both ours and the natural world far into the future Half Earth provides an enormously moving and naturalistic portrait of just what is being lost when we clip twigs and eventually whole branches of life s family tree In elegiac prose Wilson documents the many ongoing extinctions that are imminent paying tribute to creatures great and small not the least of them the two Sumatran rhinos whom he encounters in captivity Uniquely Half Earth considers not only the large animals and star species of plants but also the millions of invertebrate animals and microorganisms that despite being overlooked form the foundations of Earth s ecosystems In stinging language he avers that the biosphere does not belong to us and addresses many fallacious notions such as the idea that ongoing extinctions can be balanced out by the introduction of alien species into new ecosystems or that extinct species might be brought back through cloning This includes a critique of the anthropocentrists a fashionable collection of revisionist environmentalists who believe that the human species alone can be saved through engineering and technology Despite the Earth s parlous condition Wilson is no doomsayer resigned to fatalism Defying prevailing conventional wisdom he suggests that we still have time to put aside half the Earth and identifies actual spots where Earth s biodiversity can still be reclaimed Suffused with a profound Darwinian understanding of our planet s fragility Half Earth reverberates with an urgency like few other books but it offers an attainable goal that we can strive for on behalf of all life **Half-Earth** Edward O

Wilson, 2017-04-04 An audacious and concrete proposal Half Earth completes the 86 year old Wilson s valedictory trilogy on the human animal and our place on the planet Jedediah Purdy New Republic In his most urgent book to date Pulitzer Prize winning author and world renowned biologist Edward O Wilson states that in order to stave off the mass extinction of species including our own we must move swiftly to preserve the biodiversity of our planet In this visionary blueprint for saving the planet Stephen Greenblatt Half Earth argues that the situation facing us is too large to be solved piecemeal and proposes a solution commensurate with the magnitude of the problem dedicate fully half the surface of the Earth to nature Identifying actual regions of the planet that can still be reclaimed such as the California redwood forest the Amazon River basin and grasslands of the Serengeti among others Wilson puts aside the prevailing pessimism of our times and speaks with a humane

eloquence which calls to us all Oliver Sacks      Half-Earth Socialism Troy Vettese, Drew Pendergrass, 2022-04-12 Building a society that operates within ecological constraints requires an unleashing of our political imaginations and this book helps us do just that Astra Taylor author of *The Age of Insecurity* Half Earth Socialism is a radical call to action to save the planet including trenchant proposals to rewild half the earth to absorb carbon emissions and restore biodiversity rapidly transition to renewable energy paired with drastic cuts in consumption and shift to global veganism to reduce energy and land use As this thrilling and provocative book makes clear we must humbly accept that humanity cannot fully understand or control the earth but we can plan new energy systems large scale rewilding and food production for the common good Half Earth Socialism embraces the hardest choices the most exacting ecological constraints and thinks with them to reinvent climate utopianism Richard Seymour New Statesman Vegan cookbook meets Minecraft flips the age of dystopias into a renewal of the genre of utopia empowers readers to write their own recipes for a future in peril Andreas Malm author of *Fossil Capital* A remarkable manifesto that envisages the immediate liberation of the entire world from the grip of capitalist exploitation *Le Monde diplomatique*      **Half-Earth** Edward O. Wilson, 2016-03-07 An audacious and concrete proposal Half Earth completes the 86 year old Wilson's valedictory trilogy on the human animal and our place on the planet Jedediah Purdy New Republic In his most urgent book to date Pulitzer Prize winning author and world renowned biologist Edward O Wilson states that in order to stave off the mass extinction of species including our own we must move swiftly to preserve the biodiversity of our planet In this visionary blueprint for saving the planet Stephen Greenblatt Half Earth argues that the situation facing us is too large to be solved piecemeal and proposes a solution commensurate with the magnitude of the problem dedicate fully half the surface of the Earth to nature Identifying actual regions of the planet that can still be reclaimed such as the California redwood forest the Amazon River basin and grasslands of the Serengeti among others Wilson puts aside the prevailing pessimism of our times and speaks with a humane eloquence which calls to us all Oliver Sacks      *Half-Earth Socialism* Troy Vettese, Drew Pendergrass, 2022-04-12 Empowers readers to write their own recipes for a future in peril an exercise in democracy few books have dared to undertake Andreas Malm author of *How to Blow Up a Pipeline* A plan to save the earth and bring the good life to all In this thrilling and capacious book Troy Vettese and Drew Pendergrass challenge the inertia of capitalism and the left alike and propose a radical plan to address climate disaster and guarantee the good life for all Consumption in the Global North can't continue unabated and we must give up the idea that humans can fully control the Earth through technological fixes which only wreak further havoc Rather than allow the forces of the free market to destroy the planet we must strive for a post capitalist society able to guarantee the good life the entire planet This plan which they call Half Earth Socialism means we must rewild half the Earth to absorb carbon emissions and restore biodiversity pursue a rapid transition to renewable energy paired with drastic cuts in consumption by the world's wealthiest populations enact global veganism to cut down on energy and land use inaugurate worldwide socialist planning to efficiently and equitably

manage production welcome the participation of everyone even you Accompanied by a climate modelling website inviting readers to design their own half earth Vettese and Pendergrass offer us a visionary way forward and our only hope for a future *General and Regional Geography for Students* John Frederick Unstead, Eva Germaine Rimington Taylor, 1913

*The Elements Of Navigation; Containing The Theory and Practice* John Robertson, 1772 **Building the Critical Anthropology of Climate Change** Hans A. Baer, Merrill Singer, 2024-08-14 This book applies a critical perspective to anthropogenic climate change and the global socio ecological crisis The book focuses on the critical anthropology of climate change by opening up a dialogue with the two main contending perspectives in the field namely the cultural ecological and the cultural interpretive perspectives Guided by these the authors take a firm stance on the types of changes that are needed to sustain life on Earth as we know it Within this framework they explore issues of climate and social equity the nature of the current era in Earth s geohistory the perspectives of the elite polluters driving climate change and the regrettable contributions of anthropologists and other scholars to climate change Engaging with perspectives from sociology political science and the geography of climate change the book explores various approaches to thinking about and responding to the existential threat of an ever warming climate In doing so it lays the foundation for a brave new sustainable world that is socially just highly democratic and climatically safe for humans and other species This book will be of interest to researchers and students studying environmental anthropology climate change human geography sociology and political science **The Deserted Land** Jian Xian, 2019-11-18 In the abandoned domain of the Mysterious Sky Continent s god race the humans and demons continued to fight endlessly The evil spirits had awoken unexpectedly and the evil races from the foreign lands would descend upon the Profound Heaven Continent Human youths occasionally obtained divine blood and became disciples of the Great Void Sect Everything began here **Complete Geography** Henry Justin Roddy, 1915 **Nature's Best Hope** Douglas W. Tallamy, 2020-02-04 Tallamy lays out all you need to know to participate in one of the great conservation projects of our time Read it and get started Elizabeth Kolbert Pulitzer Prize winning author of *The Sixth Extinction* Douglas W Tallamy s first book *Bringing Nature Home* awakened thousands of readers to an urgent situation wildlife populations are in decline because the native plants they depend on are fast disappearing His solution Plant more natives In this new book Tallamy takes the next step and outlines his vision for a grassroots approach to conservation Nature s Best Hope shows how homeowners everywhere can turn their yards into conservation corridors that provide wildlife habitats Because this approach relies on the initiatives of private individuals it is immune from the whims of government policy Even more important it s practical effective and easy you will walk away with specific suggestions you can incorporate into your own yard If you re concerned about doing something good for the environment Nature s Best Hope is the blueprint you need By acting now you can help preserve our precious wildlife and the planet for future generations *MAH B.Ed. **J.L. Vives: De veritate fidei Christianae, Book IV** Juan Luis Vives,2016-11-01 A literary dialogue between a Christian and a Muslim maintaining the superiority of Christianity this volume presents a critical Latin text and the first ever English translation annotated of this important but hitherto largely overlooked document among sources in Christian Muslim relations Some of Vives s criticisms of Muhammad and Islam are based on scripture or reason many others rely on lampoon of Arab or Islamic folk tales Still he censures Muslim followers only narrowly far less for moral failings or hatred of Christians than for gullibility in accepting Islam Book Four provides valuable evidence of the reach and the limits of Vives s humanistic tolerance as applied to religious conflict

**The Economics of Sustainable Development** Gurudas Nulkar,2024-10-10 p This book is a machine generated literature overview that explores the interlinkages between communities both rural and urban and how they are dependent on natural resources and ecosystem services for livelihoods With increasing urbanization and changing land use sourcing food fuel and other basic needs from forests and grasslands is turning into a significant challenge especially in the developing world where they have to balance regional aspirations against the environmental impact and legacy for forthcoming generations As sources of sustainable livelihoods decline it affects their ability to overcome poverty Furthermore economic impacts on the natural capital can undermine the long term sustainability of communities and negatively affect their health and well being To ensure economic growth and sustainable livelihoods it is imperative to rethink how economic growth and agriculture can reduce their impacts on the natural environment How dowe integrate economic social and environmental aspects into our economy The book will discuss aspects of sustainable consumption conservation of

ecosystems and biodiversity and making rural communities resilient to the impacts of climate change By recognizing the economic value of ecosystem services decision makers can better understand the benefits and costs of different land uses and resource management practices and make more informed choices that promote sustainable livelihoods and natural capital conservation The book will be a great resource for policy makers students of economics and sustainable development non governmental organizations working in this field and corporate managers who are responsible for allotting budgets towards corporate social responsibility programs

The New Practical Navigator ... John Hamilton Moore,1800     *The New Practical Navigator, Being an Epitome of Navigation Rendered Easy, Etc* John Hamilton MOORE,1793     **When a Human Gives Birth to a Raven** Rafael Rachel Neis,2023-06-14 This book investigates rabbinic treatises relating to animals humans and other lifeforms Through an original analysis of creaturely generation and species classification by late ancient Palestinian rabbis and other thinkers in the Roman empire Rafael Rachel Neis shows how rabbis blurred the lines between the human and other beings This they did even as they were intent on classifying creatures and delineating the contours of the human Recognizing that life proliferates via multiple mechanisms beyond sexual copulation between two heterosexual male and female individuals of the same species the rabbis produced intricate alternatives This expansive view of generation included humans Likewise in parsing the variety of creatures the rabbis attended to the overlaps and resemblances across seemingly distinct species upsetting in turn unmitigated claims of human distinctiveness Intervening in conversations in animal studies queer theory trans theory and feminist science studies *When a Human Gives Birth to a Raven* provincializes sacrosanct ideals of reproduction in favor of a broader range of generation kinship and species offering powerful historical alternatives to the paradigms associated with so called traditional ideas
