## **Halliday System And Function In Language Selected Papers:**

**Halliday** Michael Alexander Kirkwood Halliday, 1976      **Discourses in Interaction** Sanna-Kaisa Tanskanen, Marja-Liisa Helasvuo, Marjut Johansson, 2010 The fourteen contributions in this collection come from different approaches in pragmatics interactional linguistics conversation analysis discourse analysis and dialogue analysis the name given to what is studied ranges from spoken language and conversation to interaction dialogue discourse and communication What the articles have in common is a similar starting point they are informed by a form of linguistic understanding which has emerged within what could be called the interactional turn The materials investigated come from several different languages representing a variety of interactions private and public written and spoken historical and present day While studies of such diverse materials naturally differ in their starting points goals and aims engaging them in a dialogue can help reveal where old beliefs may be challenged and new understandings may emerge The interactional approaches to discourse presented in this volume show that there are several discourses on interaction interconnected parallel but also varying and even divergent

On Subject and Theme Ruqaiya Hasan, Peter Howard Fries, 1995 The ten papers in this volume focus on Subject and Theme Theme began its life as a semantic notion in the work of Vil m Mathesius while Subject has traditionally been seen as just a syntactic entity More recently two related perspectives on these concepts have attracted linguists attention the formal criteria for their recognition and the relations between the two concepts Using the systemic functional model as their point of departure the papers in the present volume consider the two notions in a wider context by relating them to the interpersonal and textual metafunctions of language By contrast with the current linguistic approaches the primary focus here is neither simply on formal recognition criteria nor on the relation of these elements to each other instead the notions of Subject and Theme are examined from the point of view of their function in the economy of discourse with studies of their significance in English and French as well as in a range of non Indo European languages Definitions of the concepts are offered on the basis of their discourse functions which are also important in selecting the formal recognition criteria and in understanding their mutually supportive role vis vis each other Most of the papers in the volume are a selection from presentations made at the 19th International Systemic Functional Congress at Macquarie University      **Systemic Functional Linguistics** Lise Fontaine, Tom Bartlett, Gerard O'Grady, 2013-12-19 This stimulating volume provides fresh perspectives on choice a key notion in systemic functional linguistics Bringing together a global team of well established and up and coming systemic functional linguists it shows how the different senses of choice as process and as product are interdependent and how they operate at all levels of language Taking an interdisciplinary approach it covers a range of linguistic viewpoints informed by evolutionary theory psychology sociology and neuroscience to produce a complex but unifying account of the issues This book offers a critical examination of choice and is ideal for students and researchers working in all areas of functional linguistics as well as cognitive linguistics second language acquisition neurolinguistics and sociolinguistics      *Systemic Functional*
