Fort Pelly Journal Of Daily Occurrences 1863:

Fort Pelly Journal of Daily Occurrences, 1863 W. H. Long, Regina Archaeological Society, 1987 Fort Pelly was a fur trading post of the Hudson Bay Company The post was closed in 1912 It is located near the village of Pelly *The Ojibwa of Western Canada 1780-1870* Laura Peers, 2009-09-08 Among the most dynamic Aboriginal peoples in western Canada today are the Ojibwa who have played an especially vital role in the development of an Aboriginal political voice at both levels of government Yet they are relative newcomers to the region occupying the parkland and prairies only since the end of the 18th century This work traces the origins of the western Ojibwa their adaptations to the West and the ways in which they have coped with the many challenges they faced in the first century of their history in that region between 1780 and 1870 The western Ojibwa are descendants of Ojibwa who migrated from around the Great Lakes in the late 18th century This was an era of dramatic change Between 1780 and 1870 they survived waves of epidemic disease the rise and decline of the fur trade the depletion of game the founding of non Native settlement the loss of tribal lands and the government's assertion of political control over them As a people who emerged adapted and survived in a climate of change the western Ojibwa demonstrate both the effects of historic forces that acted upon Native peoples and the spirit determination and adaptive strategies that the Native people have used to cope with those forces This study examines the emergence of the western Ojibwa within this context seeing both the cultural changes that they chose to make and the continuity within their culture as responses to historical pressures The Ojibwa of Western Canada differs from earlier works by focussing closely on the details of western Ojibwa history in the crucial century of their emergence It is based on documents to which pioneering scholars did not have access including fur traders and missionaries journals letters and reminiscences Ethnographic and archaeological data and the evidence of material culture and photographic and art images are also examined in this well researched and clearly written history *Place and Practice in Canadian Nursing History* Jayne Elliott, Meryn Stuart, Cynthia Toman, 2009-05-01 The close association between nurses and hospitals obscures the diversity and complexity of nursing work in other contexts This collection looks at nurses and nursing in a wide range of settings from the mid 1800s to the 1970s including indigenous women on the Canadian prairies First World War nurses posted overseas outpost nurses in rural and remote areas of Saskatchewan Ontario and Quebec public health nurses in Winnipeg and religious congregations in nursing education in New Brunswick The contributors use feminist and historical perspectives to illustrate how place understood as both social context and geographic setting shaped nursing identities and practices Many nurses found place both liberating and constraining often simultaneously Paying attention to place also situates these nurses and their work within larger historical themes of nation building war and political change The Early Northwest Gregory P. Marchildon, 2008 This publication is the inaugural volume of the History of the Prairie West series Each volume in the series focuses on a particular topic and is composed of articles previously published in Prairie Forum and written by experts in the field The original

articles are supplemented by additional photographs and other illustrative material

Women of the First Nations

Christine Miller, Patricia Chuchryk, 1996-08-15 From diversity comes strength and wisdom this was the guiding principle for selecting the articles in this collection Because there is no single voice identity history or cultural experience that represents the women of the First Nations a realistic picture will have many facets Accordingly the authors in Women of the First Nations include Native and non Native scholars feminists and activists from across Canada Their work examines various aspects of Aboriginal women's lives from a variety of theoretical and personal perspectives They discuss standard media representations as well as historical and current realities They bring new perspectives to discussions on Aboriginal art literature historical and cultural contributions and they offer diverse viewpoints on present economic environmental and political issues This collection counters the marginalization and silencing of First Nations women's voices and reflects the power strength and wisdom inherent in their lives

Game in the Garden George Colpitts, 2010-10-01 Frontier and pioneer societies provide numerous unexplored avenues of social history Game in the Garden identifies the imaginative use of wild animals in early western society In what is now western Canada humans have long used wildlife in order to survive their surroundings better understand their natural world and form aspects of their identity The shared use of wild animals has helped to determine social relations between Native peoples and newcomers In later settlement periods controversy about subsistence hunting and campaigns of local conservation associations drew lines between groups in communities particularly Native peoples immigrants farmers and urban dwellers In addition to examining grassroots conservation activities Colpitts identifies early slaughter rituals iconographic traditions and subsistence strategies that endured well into the interwar years in the twentieth century Drawing primarily on local and provincial archival sources he analyzes popular meanings and booster messages discernible in taxidermy work city nature museums and promotional photography Environmental historians Native studies specialists history students conservationists nature enthusiasts and general readers alike will find fascinating how western attitudes to wild animals changed according to subsistence and economic needs and how wildlife helped to determine the social relations among people in western Canada

Taking Medicine

Kristin Burnett, 2011-07-01 The buffalo hunter the medicine man and the missionary continue to dominate the history of the North American west even though historians have recognized women's role as both colonizer and colonized since the 1980s Kristin Burnett helps to correct this imbalance by investigating the convergence of Aboriginal and settler therapeutic regimes in the Treaty 7 region from the perspective of women Although the imperial eye focused on medicine men Aboriginal women played important roles as healers and caregivers and the knowledge and healing work of both Aboriginal and settler women brought them into contact But as settlement increased and the colonial regime hardened informal encounters in domestic spaces gave way to more formal one-sided interactions in settler-run hospitals and nursing stations By revealing Aboriginal and settler women's contributions to the development of

health care in southern Alberta Taking Medicine challenges traditional understandings of colonial medicine and nursing in the contact zone **Saskatchewan Local Histories at the Legislative Library** Saskatchewan.
