Forgotten Railways South Wales Forgotten Railways Series:

Forgotten Railways, South Wales James H. R. Page, 1979-01-01 *Lost Railways of South Wales* Mike Hall, 2009
Lost Railways of South Wales Lost Railways of the World Nigel Welbourn, 2023-02-16
Many readers will be familiar with Nigel Welbourn's long running series of books covering lost railways in Britain and Ireland. This new book *Lost Railways of the World* is the latest by this author on the subject of disused railways. The material for this volume has been collected and researched over a period of almost fifty years of world travel by the author. Informative text records the fortunes of the world's lost railways and every country with significant disused railways is included. Lost railways are a unifying theme being found throughout the world from the hottest African desert to the coldest steppes of Russia. The book has a surprisingly British flavor as historically many railways throughout the world used British equipment and operating practices. On his first trip in the 1970s the author discovered British signaling equipment in Europe. In 2020 he discovered the same firm's equipment in South America. The world's top ten lost lines are listed from the seven mile long sea bridge on a line that ran through the Florida Keys to the rugged mountain splendor of the Khyber Pass Railway. Some of the oldest, largest, longest, most northerly, southerly, expensive, crookedest, steepest, highest, lowest, and most notorious lost railways are included. Quirky and other unique tales from lost railways are included such as the disappearing phantom bridge, a line destroyed by molten lava, to one that sank under the sea, another that conveyed giant turtles to a memorial to a brave railway elephant. The author also visited remote areas of Argentina and provides more information on the mysterious disappearance of the ex Lynton Barnstaple Railway locomotive Lew A. A large number of the 300 color illustrations have not been published before. Maps and stories from around the world will delight not only the railway enthusiast but appeal to a wider cadre of readers with an interest in nostalgia, history, geography, and travel. To some the book will be an informative source of information; to others it is written in a way that highlights the most amazing lost railways in the world, but either way it is a fascinating and unique book. **A**

While it is still possible to travel from Swansea to Shrewsbury along the quaint and sleepy Heart of Wales line, today's experience is a far cry from its heyday when heavy goods and express trains worked their way over the Welsh hills. In this volume we explore the southern end of the line, including the now closed section running along the Swansea shore line and the branch to Carmarthen, and document its complicated history around the Swansea and Llanelli areas. Wales Gwilym Huws, D. Hywel E. Roberts, 1991
In a series of 14 chapters, this book brings together contemporary research findings on the involvement of word internal structure for the purpose of word reading, especially morphological structure. Contributors include many leading experts in this research domain. **Lost Lines** Tom Ferris, 2020-07-05
The Vale of Neath line connected Pontypool Road to Neath and Swansea and

included a branch to Merthyr Promoted by two different companies using originally two different track gauges it was built primarily to transport the abundant supplies of coal in the districts it served The line featured severe gradients and perhaps the most magnificent structure built in Wales during the railway age the Crumlin viaduct which carried its tracks 200 feet above the Ebbw Valley Railways in South Wales and the Central Wales Line in the Late 20th Century Peter J.

Green,2022-12-01 In the early 1980s I began to visit South Wales on a regular basis to photograph the railway scene At that time the collieries and steelworks were generating a lot of rail traffic with Class 37 diesels being the usual motive power Passenger trains were in the hands of Class 47s and 37s while Peaks and Class 50s would also appear on occasion HSTs DMUs Sprinters and Pacers were of course also common As time went on collieries closed and the coal traffic reduced but there always something new and interesting Rugby Internationals at Cardiff regularly produced a number of special trains which arrived from various parts of the country often bringing interesting motive power to the Welsh capital The Class 37s were slowly replaced by Class 56s and later Class 60s on many duties in South Wales but the Rhymney Valley saw Class 37 diesels working passenger trains into the twenty first century and on Rugby International days privately owned Class 50s were also used on occasion I also visited the Central Wales line a number of times and particularly enjoyed the time I spent at the small country stations before the semaphore signals were replaced This book contains a selection of photographs taken in the latter part of the 20th and in the very early 21st Century covering the railways of South Wales and the Welsh section of the Central Wales line A few photographs of the principal heritage railways in more recent times are also included

Railway Times ,1847 **Tracing Lost Railways** Trevor Yorke,2020-03-19 The drastic railway closures of the 1960s led to the slow decay and re purposing of hundreds of miles of railway infrastructure Though these buildings and apparatus are now ghosts of their former selves countless clues to our railway heritage still remain in the form of embankments cuttings tunnels converted or tumbledown wayside buildings and old railway furniture such as signal posts Many disused routes are preserved in the form of cycle tracks and footpaths This colourfully illustrated book helps you to decipher the fascinating features that remain today and to understand their original functions demonstrating how old routes can be traced on maps outlining their permanent stamp on the landscape and teaching you how to form a mental picture of a line in its heyday **A**
