

*Formative Spirituality: Vol. 1, Fundamental Formation.* By Adrian Van Kaam. New York: Crossroad, 1983. xxi + 330 pages. \$24.50.

This is the first of a four volume series on foundational formation or spirituality. It mainly discusses the presuppositions, structures and dynamics involved in the ways that human life is formed and unfolds as spirit. Each chapter systematically delves into and sorts out the distinct forms that our most fundamental thrust for life assumes as it interacts dynamically with the internal and external forces affecting life. By carefully studying and ordering these formative moments, it attempts to provide an acceptable understanding of human formation that has a universal practical application for those seeking to live more consonant and happier lives. This study is also proposed and defended as a new independent science.

Formative spirituality centers not on our life in the Spirit but on the human spirit's drive towards a unique transcendent form. It exposes how the human spirit is influenced by our vital and sexual life, our functional way of acting and our surrounding world, while at the same time spiritualizing and personalizing them so that they harmonize with one's deepest transcendent aspirations. This study is especially interested in the universal directives that it receives, particularly from the mysterious power that awakens the thrust within us to fulfill our unique call. A person needs to surrender to this sense of direction by freely committing oneself to live according to one's unique form as it follows universal laws.

This is a critically important work. It exposes in a very detailed analytical and synthetic way how the human spirit functions within our life processes. The matter is exceedingly complex and abstruse but presented in a generally clear, controlled and balanced way. I have reservations, however, on two scores: the attempt to justify formative spirituality as a new independent science and its technical vocabulary.

I agree that human formation embraces many separate sciences that ought to be integrated in a holistic discipline whose aim would be to improve the quality of life. I am skeptical, however, that other universities will introduce a program similar to Van Kaam's at Duquesne and wonder where and what his graduates will teach. It strikes me that foundational formation more fittingly pertains to an interdisciplinary program within Philosophy (or, because of its ultimate religious aim, to Fundamental Theology) where human experience is critically analyzed and thought through for its practical application.

I also feel an ambiguity regarding Van Kaam's use of technical terms. While sympathetic to his desire to use scientific terms that fully express his meaning, I sense that they are going to cause the average reader considerable bewilderment, if not frustration. When added to the in-depth minute treatment of formation processes, the language can make this an elitist work too specialized for the uninitiated to comprehend, let alone judge critically.

In brief, despite my reservations, I would recommend this work for those well versed in the field of humanistic studies. It presents a stimulating and convincing foundational synthesis of how the human drive for life integrates itself with its internal and external forces.

**Encyclopedia of Christian Education** George Thomas Kurian, Mark A. Lamport, 2015-05-07 Christianity regards teaching as one of the most foundational and critically sustaining ministries of the Church. As a result, Christian education remains one of the largest and oldest continuously functioning educational systems in the world, comprising both formal day schools and higher education institutions as well as informal church study groups and parachurch ministries in more than 140 countries. In *The Encyclopedia of Christian Education*, contributors explore the many facets of Christian education in terms of its impact on curriculum, literacy, teacher training, outcomes, and professional standards. This encyclopedia is the first reference work devoted exclusively to chronicling the unique history of Christian education across the globe, illustrating how Christian educators pioneered such educational institutions and reforms as universal literacy, home schooling, Sunday schools, women's education, graded schools, compulsory education of the deaf and blind, and kindergarten. With an editorial advisory board of more than 30 distinguished scholars and five consulting editors, *The Encyclopedia of Christian Education* contains more than 1,200 entries by 400 contributors from 75 countries. These volumes cover a vast range of topics from Christian education history, spanning from the church's founding through the Middle Ages to the modern day, to denominational and institutional profiles, intellectual traditions in Christian education, biblical and theological frameworks, curricula, missions, adolescent and higher education, theological training, and Christian pedagogy. Biographies of distinguished Christian educators. This work is ideal for scholars of both the history of Christianity and education as well as researchers and students of contemporary Christianity and modern religious education.

*The Power of Appreciation* Adrian L. Van Kaam, Susan A. Muto, 1999-03

**Sacred Systems** Eric J. Kyle, 2013-12-06

From early Jewish Christian texts such as the *Didache* which present well-defined catechetical programs to contemporary authors such as Dallas Willard who offer in-depth insights into the transformations of one's heart and soul, systematic texts on spiritual formation in the Western Christian tradition abound. These texts can offer ministers, researchers, and laypersons much clarity and guidance for their craft. However, the spiritual formation systems that we use are also always contextually influenced; such contextual factors may make them difficult to adapt to one's local work. Rather than turning to only a single text or community, then, it can be helpful for practitioners and theorists to look to a broader set of systematic presentations of spiritual formation. By turning to a group of specific individuals and communities in each era of Western Christian history, this book will help those working in this field to better understand how personal spiritual formation has been conceptualized and embodied. Such an exploration will help us not only to compile a more complete history of spiritual formation at the level of the individual but also to glean a better understanding of personal transformation so that we might engage this craft in more informed and systematic ways.
