**Fossil Vertebrates of Greece Vol. 1** Evangelos Vlachos, 2021-12-07 This 2 volume set provides a state of the art study of the fossil record and taxonomy of the main vertebrate groups from Greece Greece stands between 3 continents and its vertebrate fossil record is of great importance for paleontological and evolutionary studies in Europe Asia and Africa Fossils from classic world famous localities e g Pikermi Samos form an essential part of the collections of the most important museums in the world and have been studied by numerous scientists Recent paleontological research led to the discovery and study of numerous new sites The volumes contain a taxonomic review of all named and identified taxa their taxonomic history and current status as well as historical phylogenetic and biogeographic information Volume 1 contains a synopsis of the fossil record and taxonomy of important groups of vertebrates represented in the fossil record of Greece The volume deals with some of the early splitting clades including the basal and enigmatic conodonts and basal tetrapods like fishes amphibians and reptiles like lizards snakes crocodiles turtles and tortoises The second part of the volume deals with basal mammalian clades some of which are quite characteristic for the fossil record of the country aardwarks hyraxes proboscideans elephants and mammoths sea cows rodents and lagomorphs The volume ends with special chapters on the primate fossil record of the country including some of our most recent and distant relatives

Cenozoic Mammals of Africa Lars Werdelin, William Joseph Sanders, 2010-07-20 This impressively comprehensive volume is a long awaited and worthy successor to the now outdated 1978 classic Evolution of African Mammals A must have reference work for everyone interested in mammalian evolution David Pilbeam Harvard

University and the Peabody Museum of Archaeology and Ethnology      Lothagam Meave G. Leakey, John M. Harris, 2003-01-23 Located at the southwest corner of Lake Turkana in northern Kenya Lothagam represents one of the most important intervals in African prehistory Early human remains are restricted in distribution to Africa and the acquisition of an upright bipedal striding gait the hallmark of humanity appears to be at least circumstantially linked to the reduction of equatorial forests and the spread of grasslands on that continent The diverse Lothagam fauna documents the end Miocene transition from forested to more open habitats that were exploited by grazing horses and antelopes hippos giant pigs and true elephants It also includes spectacularly complete fossil carnivore skeletons and some of the oldest human remains Enlisting a team of highly qualified specialists this book provides the geologic context and dating framework for the Lothagam fossiliferous sequences describes the immense diversity of vertebrate fossils recovered from the Late Miocene and Early Pliocene sediments and synthesizes the results to interpret the changing paleoenvironments that prevailed at this site The book will interest anthropologists paleontologists geologists and anyone interested in human origins      Evolving Eden Alan Turner, Mauricio Antón, 2004 The Garden of Eden as the ideal and untouched site of life's creation persists in popular thought even as we have uncovered a lengthy fossil record and developed a scientific understanding of evolution The continent of Africa is a good candidate for Eden its generally warm climate rich vegetation and variety of animal species lend themselves easily to such a comparison Yet in the time since the first primates appeared millions of years ago Africa has undergone profound alterations in physical geography climate and biota Linking the evidence of the past with that of the present this exquisitely illustrated guide examines the evolution of the mammalian fauna of Africa within the context of dramatic changes over the course of more than 30 million years of primate presence The book covers such topics as dating continental drift and global climate change and the likely motors of evolution as well as the physical evolution of the African continent including present and past climates and the major determinants of plant and mammal distributions The authors discuss human evolution as a part of the larger pattern of mammalian evolution while responding to the unique interest that we have in our own past The meticulous reconstructions of fossil mammals in this book are the result of detailed anatomical research Restorations of mammalian musculature and appearance take into account the affinities between fossil forms and extant species in order to make well founded inferences about unpreserved animal attributes Environmental reconstructions benefit from the authors visits to more than a dozen wildlife preserves in five African countries as well as the use of an extensive database of published studies on the evolution of landscapes on the continent A fascinating read and a visual feast Evolving Eden lays the foundation for a deeper appreciation of contemporary African wildlife      **The Geology of Early Humans in the Horn of Africa** Jay Quade, Jonathan Guy Wynn, 2008      *Neogene Paleontology of the Manonga Valley, Tanzania* Terry Harrison, 2013-11-11 Contributions to this volume detail paleontologic research in Manonga Valley and shed important light on the evolutionary development of eastern Africa Chapters provide novel insights into the taxonomy

paleobiology ecology and zoogeographic relationships of African faunas as well as lay the foundation for future geological paleontological and paleoecological studies in this important area The book concludes with a discussion of the importance of investigations on broader geographical sites including the Manonga Valley for human evolution research The text is supported by 143 illustrations

**African Paleoecology and Human Evolution** Sally C. Reynolds, René Bobe, 2022-06-09 A comprehensive account of hominin fossil sites across Africa including the environmental and ecological evidence central to our understanding of human evolution

*Sands of Time* Faysal Bibi, Brian Kraatz, Mark J. Beech, Andrew Hill, 2022-06-07 This monograph presents the results of over 10 years of paleontological and geological survey in the Baynunah Formation of the United Arab Emirates Exposed widely in western Abu Dhabi Emirate the Baynunah Formation and its fossils provide the only record of terrestrial environments and evolution in the Arabian Peninsula during the late Miocene epoch 12.5 Ma This volume describes new fossils collected since 2002 presented systematically by taxon and including mammals reptiles and invertebrates as well as fossil trackways The discoveries are framed within the results of new geological geochemical and geochronological analyses providing an updated and synthetic view of the age environments and biogeographic relationships of this important fossil assemblage

*Ardipithecus kadabba* Yohannes Haile-Selassie, Giday WoldeGabriel, 2023-12-22 The second volume in a series dedicated to fossil discoveries made in the Afar region of Ethiopia this work contains the definitive description of the geological context and paleoenvironment of the early hominid *Ardipithecus kadabba* This research by an international team describes Middle Awash late Miocene faunal assemblages recovered from sediments firmly dated to between 5.2 and 5.8 million years ago Compared to other assemblages of similar age the Middle Awash record is unparalleled in taxonomic diversity composed of 2,760 specimens representing at least sixty five mammalian genera This comprehensive evaluation of the vertebrates from the end of the Miocene in Africa provides detailed morphological and taxonomic descriptions of dozens of taxa including species new to science It also incorporates results from analyses of paleoenvironment paleobiogeography biochronology and faunal turnover around the Pliocene Miocene boundary opening a new window on the evolution of mammals African fauna and its environments The second volume in a series dedicated to fossil discoveries made in the Afar region of Ethiopia this work contains the definitive description of the geological context and paleoenvironment of the early hominid *Ardipithecus kadabba* This research

*Bibliography of Agriculture with Subject Index*, 1993-05

*Hominin Environments in the East African Pliocene* René Bobe, Zeresenay Alemseged, Anna K. Behrensmeyer, 2007-09-08 This volume presents the work of researchers at many sites spanning the East African Pliocene The authors take a broad approach that seeks to compare paleoenvironmental and paleoecological patterns across localities and among various taxonomic groups This volume aims to synthesize large amounts of faunal data and to present the evolution of East African vertebrates in the context of environmental and climatic changes during the Pliocene

**At the Foot of the Himalayas** Catherine Badgley, Michèle E. Morgan, David Pilbeam, 2025-01-28

This authoritative volume brings together decades of insights from one of the longest terrestrial fossil records on the planet. The fabled Himalayas have isolated and sheltered the Indian subcontinent for millions of years. The Siwalik sequence of sediments at their feet has been a treasure trove of visions into the past for generations of paleontologists preserving an immense 20 million years of terrestrial ecosystems fossil record. The Siwalik sequence reveals a unique forest wonderland of diverse animal species from huge elephant relatives, great rhinos and sabertooth cats to mongooses, swamp rats, crocodiles and catfish. Regional climate change eventually caused this forest ecosystem to unravel as grasslands replaced the forests and established the habitats and animals of the modern ecosystems of the Indus and Ganges rivers. In *At the Foot of the Himalayas*, celebrated paleontologists Catherine Badgley, Michel Morgan and David Pilbeam bring together a collection of world renowned scholars to present an interdisciplinary approach to documenting and interpreting this fossil record. By investigating changes in landscape, climate and vertebrate species diversity, their analysis reveals insights into a central question about biodiversity: which evolutionary developments were influenced by changes in climate and which were caused by interactions among the species themselves. This groundbreaking book illuminates for the first time a mysterious and vibrant paleontological past, bringing together more than 40 years of exciting international collaborative studies that forge invaluable knowledge pathways for the ecologists, evolutionary scientists and paleontologists of the future and pose important questions about our fragile ecosystems in the present day.

*The Pleistocene Boundary and the Beginning of the Quaternary* John A. van Couvering, John A. Van Couvering, 2004-12-16. This book documents the agreed geological reference point for the Pleistocene boundary and its worldwide correlation. **Newsletters on Stratigraphy**, 1993. [Paleontology and Geology of Laetoli: Human Evolution in Context](#) Terry Harrison, 2011-01-27. This volume 2 and its companion volume 1 present the results of new investigations into the geology, paleontology and paleoecology of the early hominin site of Laetoli in northern Tanzania. The site is one of the most important paleontological and paleoanthropological sites in Africa, world renowned for the discovery of fossils of the early hominin *Australopithecus afarensis* as well as remarkable trails of its footprints. The first volume provides new evidence on the geology, geochronology, ecology, ecomorphology and taphonomy of the site. The second volume describes newly discovered fossil hominins from Laetoli belonging to *Australopithecus afarensis* and *Paranthropus aethiopicus* and presents detailed information on the systematics and paleobiology of the diverse associated fauna. Together, these contributions provide one of the most comprehensive accounts of a fossil hominin site and they offer important new insights into the early stages of human evolution and its context.

*Late Miocene Mammalian Fauna from the Middle Awash Valley, Ethiopia* Yohannes Haile-Selassie, 2001. **Adventures in the Bone Trade** Jon Kalb, 2006-04-18. As co-founder of the expedition that discovered Lucy and leader of most of the first site surveys in the Afar Depression in Ethiopia, Jon Kalb has years of experience with the region, its politics and the scientists involved in the excavations. A participant himself in the bone wars that accompanied these discoveries, Kalb recounts the cutthroat competition and backstabbing that were often part of

the media highlighted race to find the oldest hominid fossil He weaves this story in the rich fabric of Ethiopian society and politics the plight of the regions peoples and the international maneuverings for control of the fossil finds **Proceedings**
