Mathematicians Eugene Geist, 2009 This brand new book for Early Childhood Mathematics Methods classes takes a comprehensive and chronological view of mathematics development in children beginning at birth and going through the third grade It offers specific teaching suggestions for each grade level based on the newly released NCTM National Council of Teachers of Mathematics standards The new NCTM focal points for each grade are designed to help make mathematics teaching coherent and focused Knowing what the two or three most important concepts are in each grade help teachers focus their teaching and their mathematics program Using these standards can help teachers to use many different methods to reach their objectives rather than being tied to one specific method This book takes a constructivist approach meaning that children should be active learners and interact with other children in learning and constructing their knowledge The author stresses that this process is at least as important as correct answers as is comprehension of concepts Teachers should focus on questioning and promoting mathematical thinking rather than simply getting the correct answer Finally the author encourages teachers to see math as a developmental process that children engage in as they grow and develop The teacher's role is to promote concept understanding and development through active experiences and questioning techniques in combination with teaching skills in developmentally appropriate ways *The Young Child and Mathematics, Third Edition* Angela Chan Turrou, Nicholas C. Johnson, Megan L. Franke, 2021 Everything a child does has mathematical value these words are at the heart of this completely revised and updated third edition of The Young Child and Mathematics Grounded in current research this classic book focuses on how teachers working with children ages 3 to 6 can find and build on the math inherent in children's ideas in ways that are playful and intentional This resource Illustrates through detailed vignettes how math concepts can be explored in planned learning experiences as well as informal spaces Highlights in the moment instructional decision making and child teacher interactions that meaningfully and dynamically support children in making math connections Provides an overview of what children know about counting and operations spatial relations measurement and data and patterns and algebra Offers examples of informal documentation and assessment approaches that are

embedded within classroom practice Deepen your understanding of how math is an integral part of your classroom all day every day **Playful Mathematics** Helen J.
