Foundations Of Human Sociality Economic Experiments And Ethnographic Evidence From Fifteen Small Scale Societies:

Foundations of Human Sociality Joseph Patrick Henrich, 2004 Addresses the nature of human sociality By bringing together experimental and ethnographic data from fifteen different tribal societies the contributors are able to explore the universality of human motives in economic decision making and the importance of social institutional and cultural factors

Foundations of Human Sociality, 2004 What motives underlie the ways humans interact socially Are these the same for all societies Are these part of our human nature or influenced by our environments This text answers these questions

Social Preferences in Small Scale Societies Alexander J. Field, 2009 Review article on Foundations of Human Sociality Economic Experiments and Ethnographic Evidence from Fifteen Small Scale Societies Oxford Oxford University Press 2004 **Henrich, Joseph; Boyd, Robert; Bowles, Samuel; Camerer, Colin; Fehr, Ernst; Gintis, Herbert (eds.):**

Experimenting with Social Norms Jean Ensminger, Joseph Henrich, 2014-10-22 Questions about the origins of human cooperation have long puzzled and divided scientists Social norms that foster fair minded behavior altruism and collective action undergird the foundations of large scale human societies but we know little about how these norms develop or spread or why the intensity and breadth of human cooperation varies among different populations What is the connection between social norms that encourage fair dealing and economic growth How are these social norms related to the emergence of centralized institutions Informed by a pioneering set of cross cultural data *Experimenting with Social Norms* advances our understanding of the evolution of human cooperation and the expansion of complex societies Editors Jean Ensminger and Joseph Henrich present evidence from an exciting collaboration between anthropologists and economists Using experimental economics games researchers examined levels of fairness cooperation and norms for punishing those who violate expectations of equality across a diverse swath of societies from hunter gatherers in Tanzania to a small town in rural Missouri These experiments tested individuals willingness to conduct mutually beneficial transactions with strangers that reap rewards only at the expense of taking a risk on the cooperation of others The results show a robust relationship between exposure to market economies and social norms that benefit the group over narrow economic self interest Levels of fairness and generosity are generally higher among individuals in communities with more integrated markets Religion also plays a powerful role Individuals practicing either Islam or Christianity exhibited a stronger sense of fairness possibly because religions with high moralizing deities equipped with ample powers to reward and punish encourage greater prosociality The size of the settlement also had an impact People in larger communities were more willing to punish unfairness compared to those in smaller societies Taken together the volume supports the hypothesis that social norms evolved over thousands of years to allow strangers in more complex and large settlements to coexist trade and prosper

Innovative and ambitious *Experimenting with Social Norms* synthesizes an unprecedented analysis of social behavior from an immense range of human societies The fifteen case studies analyzed in this volume which include field experiments in Africa South America New Guinea Siberia and the United States are available for free download on the Foundation's website www.russellsage.org

Justice for Victims of Crime Albin Dearing, 2017-02-06 This book analyses the rights of crime victims within a human rights paradigm and describes the inconsistencies resulting from attempts to introduce the procedural rights of victims within a criminal justice system that views crime as a matter between the state and the offender and not as one involving the victim To remedy this problem the book calls for abandoning the concept of crime as an infringement of a state's criminal laws and instead reinterpreting it as a violation of human rights The state's right to punish the offender would then be replaced by the rights of victims to see those responsible for violating their human rights convicted and punished and by the rights of offenders to be treated as accountable agents
