Ecological Sanity:

Ecological Sanity George Claus, Karen Bolander, 1977 *Fugitive Politics* Carl Boggs, 2021-11-10 *Fugitive Politics* explores the intersection between politics and ecology between the requirements for radical change and the unprecedented challenges posed by the global crisis a dialectic has rarely been addressed in academia Across eight chapters Carl Boggs explores how systemic change may be achieved within the current system while detailing attempts at achieving change within nation states Boggs states that any notion of revolution seems fanciful in the current climate contending that controlling elites have concentrated their hold on corporate power along three self serving fronts technology Big Tech and the surveillance order militarism and the warfare state and intensification of globalized power Combined with this Boggs cites the fundamental absence of revolutionary counter forces arguing that after decades of subservice relevant allied to the rise of identity politics and social movements the Marxist theoretical legacy is now exhausted and will not provide an exit from the crisis Boggs concludes that the only possibility for fundamental change will come from an open style of politics in the Jacobin tradition operating within the overall structures of the current democratic state Written for both an academic and a general readership in the U S and beyond *Fugitive Politics* will be of vital importance to those studying political theory political philosophy political history Marxism and Marxist theory authoritarian politics ecology environmental politics and climate politics *Eco-Socialism* David Pepper, 2002-09-26 First Published in 2004 Routledge is an imprint of Taylor Francis an informa company *Maine's Place in the Environmental Imagination* Michael D. Burke, 2020-12-15 The essays in *Maine's Place in the Environmental Imagination* address from a variety of perspectives how Maine's unique identity among the states of the United States has been formed and what that identity is A place that is still imagined by others primarily through its environmental associations its nature and landscape rather than through its social arrangements and human history The collection attempts a foundational study not of a regional literature but of a state literature In doing so it makes the case that Maine was constructed imaginatively and environmentally through its literature and that this image is the one that endures even now The essays suggest how this identity was formed by discussing writings ranging from the recently recovered work of Joseph Nicolai a member of the Penobscot Nation in the late 19th century to the contemporary Maine author Carolyn Chute from Thoreau's canonical essay *Ktaadn* to the modernist E B White whose works have an under appreciated environmental project Contributors include scholars Nathaniel Lewis Annette Kolodny Linda Kornasky Daniel Malachuk Kent Ryden and Lynn Wake *The Road from Empire to Eco-Democracy* Gene Marshall, 2012-01-20 An examination of Social Awakening History Long Vision Holistic Social Understanding Strategies of Transformation As viewed by five United States Citizens in 2011 Lead author Gene Marshall with coauthors Ben Ball Marsha Buck Ken Kreutziger and Alan Richard Though vast changes are necessary we believe humanity can find a vision and plan of action that is both satisfying and realistic Our aim is to fertilize the fruitful imagination and courage it will require to walk this Road to Eco Democracy Wise insightful

forthright systemic and clearly written with moments of special brilliance The framing of The Forces of Transformation and The Role and Limitations of Electoral Politics are particularly distinctive and useful contributions David Korten author of Agenda for a New Economy The Great Turning From Empire to Earth Community and When Corporations Rule the World I hope The Road is read and discussed by groups of friends and neighbors across the country Sidestepping the political stalemates of the day the authors name the basic problems facing our society explain why taking the long view is crucial but largely missing and propose the processes by which we might create an eco democracy Charlene Spretnak author of Relational Reality The Resurgence of the Real and States of Grace I was enormously cheered by The Road from Empire to Eco Democracy which sets out a comprehensive menu of today's myths and why they must be revisited In contrast these days I'm often depressed not so much by the disasters unfolding before eyes but rather by un-integrated non-systemic band aid solutions which have become public policy staples The Road neither trivializes the challenges nor tumbles into the trap of simplistic solutions Yet beware the many proposals in the book are neither trivial nor easy David Sanborn Scott Ph D Vice President for America's International Hydrogen Association Founding Director Institute for Integrated Energy Systems Univ of Victoria Canada author of Smelling Land The Hydrogen Defense Against Climate Catastrophe

Environmental Justice Poetics Kamala Joyce Platt, 2023-10-24 This book is an interdisciplinary comparative investigation of activist artistic literary and academic discourse expressive work promoting ecological justice ending racism and representing self and community through virtual realism a cultural poetics of environmental justice Research fixed on women's work intervenes in patriarchal assumptions Focus on marginalized areas in India and a U S movement led by people of color defies racism and promotes vigilance against structural violence that permeates across political spectrums Striving for environmental justice is not just community work merely academic or trendy art performance or literature Environmental justice work demands interdisciplinary transnational transcommunity sharing many border crossings and solid alliance building Chicanas and women in India engaged in such activities generate a rich cultural poetics a transformative vision of environmental equity ecological and civic wellbeing and calming climate

BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved Faces of Environmental Racism Laura Westra, Bill Lawson, 2001-06-26 Racial minorities in the United States are disproportionately exposed to toxic wastes and other environmental hazards and cleanup efforts in their communities are slower and less thorough than efforts elsewhere Internationally wealthy countries of the North increasingly ship hazardous wastes to poorer countries of the South resulting in such tragedies as the disaster at Bhopal Through case studies that highlight the type of information that is seldom reported in the news Faces of Environmental Racism exposes the type and magnitude of environmental racism both domestic and international The essays explore the justice of current environmental practices asking such questions as whether cost benefit analysis is an appropriate analytic technique and whether there are alternate routes to sustainable development in the South The second edition of this unique volume further explores the ongoing problem of environmental racism With a new introduction and preface and new chapters by such experts as Charles W Mills Robert Melchior Figueroa and Segun Gbadegesin the second edition of Faces of Environmental Racism carries on the work of the first *America in the Third World* Steven Metz, 1994

Middle East and Arabic Countries Environmental Law Handbook Volume 1 Strategic Information and Regulations IBP, Inc., 2015-08-03 2011 Updated Reprint Updated Annually Middle East and Arabic Countries Environmental Law Handbook *Narnia and the Fields of Arbol* Matthew Dickerson, David O'Hara, 2008-12-19 An exploration of the Chronicles of Narnia and the Space Trilogy that enriches our understanding of how to care for our world Alan Jacobs author of *Breaking Bread with the Dead* In Narnia and the Fields of Arbol The Environmental Vision of C S Lewis authors Matthew Dickerson and David O'Hara illuminate an important yet overlooked aspect of the author's visionary work They go beyond traditional theological discussions of Lewis's writing to investigate themes of sustainability stewardship of natural resources and humanity's relationship to wilderness The authors examine the environmental and ecological underpinnings of Lewis's work by exploring his best known works of fantasy including the seven books of the Chronicles of Narnia and the three novels collectively referred to as the Space Trilogy Taken together these works reveal Lewis's enduring environmental concerns and Dickerson and O'Hara offer a new understanding of his pioneering style of fiction Narnia and the Fields of Arbol the first book length work on the subject finds the author's legacy to have as much in common with the agrarian environmentalism of Wendell Berry as it does with the fantasy of J R R Tolkien In

an era of increasing concern about deforestation climate change and other environmental issues Lewis's work remains as pertinent as ever The widespread adaption of his work in film lends credence to the author's staying power as an influential voice in both fantastical fiction and environmental literature With *Narnia* and the *Fields of Arbol* Dickerson and O'Hara have written a timely work of scholarship that offers a fresh perspective on one of the most celebrated authors in literary history Both revelatory and a pleasure to read Robert Siegel award winning author of *The Whalesong Trilogy* *Living with Nature* Frank Fischer, Maarten A. Hajer, 1999 This text aims to place the question of the dynamics of environmental crisis in a socio cultural dimension of the existing economic and political institutions It argues for a need to find a balance between theoretical analysis of the debate and an appreciation of local circumstances and knowledge **Theatre Ecology** Baz Kershaw, 2007-12-13 A study into the relationships between performance theatre and environmental ecology

Environmental Problem Solving Alan Miller, 2013-12-01 Human influences create both environmental problems and barriers to effective policy aimed at addressing those problems In effect environmental managers manage people as much as they manage the environment Therefore they must gain an understanding of the psychological and sociopolitical dimensions of environmental problems that they are attempting to resolve In *Environmental Problem Solving* Alan Miller reappraises conventional analyses of environmental problems using lessons from the psychosocial disciplines He combines the disciplines of ecology political sociology and psychology to produce a more adaptive approach to problem solving that is specifically geared toward the environmental field Numerous case studies demonstrate the practical application of theory in a way that is useful to technical and scientific professionals as well as to policy makers and planners Alan Miller is Professor of Psychology at the University of New Brunswick *The Modern Crisis* Murray Bookchin, 2022-07-29 Murray Bookchin's frank assessment of the disaster we are heading toward at increasing speed is as much a work of ethics as it is of environmentalism The four essays that comprise it share the view that as he puts it our ideas and our practice must be imbued with a deep sense of ethical commitment Whether he is critiquing the market economy the state or the idea common to both capitalists and certain left materialists that human beings are motivated solely by greed and self interest Bookchin ever reminds us of the ineffable values of freedom self consciousness and social harmony Though first published in 1986 Bookchin's framework still applies The moral relativism of the 1980s the politics of lesser evils and risk vs benefit calculations has morphed into what we now refer to as both sidesism and the risk vs benefit calculations of yesterday are the 100 000 acre burn scars seen throughout the American west today Beyond moral relativism or moral absolutism is an ecologically based ethics one that sees our selfhood reason and freedom as stemming from nature's variety and resilience Bookchin's social ecology refuses to separate society from nature As such one can consider it a philosophy of participation we cannot develop ecocommunities that aren't participatory We can't save ourselves and the planet without an ethics of freedom This edition with a new introduction by Bookchin scholar Andy Price is a breath of fresh air for a left that seems to have

forgotten basic truths **Controversies in Environmental Policy** Sheldon Kamieniecki, Robert M. O'Brien, Michael Clarke, 1985-12-01 *Controversies in Environmental Policy* presents comprehensive analyses of the politics surrounding decision making on such environmental issues as land use toxic waste management new federalism and economic incentive It recognizes that environmental policy making is a blend of politics technology and economics and provides a sophisticated understanding of the interrelationship of the three The contributors to this volume examine the underlying value systems of the proponents of government dominated solutions and private enterprise dominated solutions to the questions of environmental policy This book is unique in that it exposes the biases inherent in both sides of the debate analyzing the differing views on the effectiveness of such policy evaluation strategies as cost benefit analysis and regulatory agency control It provides conservative and liberal opinions on the social and economic impact of the Reagan administration s effort to shape environmental policy *Controversies in Environmental Policy* recognizes the fundamental differences in values strategies and desired outcomes among those involved in the debates on environmental policy Disguised by a fragile consensus throughout the 1970s these divisions emerged with the election of the Reagan administration The basic divisions are not new and are consistent with the differences in other policy areas **Performing Nature** Gabriella Giannachi, Nigel Stewart, 2005 The essays in this volume explore the borderland between ecology and the arts Nature is here read by a number of contributors as cultural by others as an independent domain or even as a powerful process of exchange between the human and the other than human The four parts of the volume reflect these different understandings of nature and performance Informed by psychoanalysis and cultural materialism contributors to the first part *Spectacle Landscape and Subjectivity* look at ways in which particular social and scientific experiments theatre and film productions and photography either reinforce or contest our ideas about nature and human human or human animal relations and identities The second part *World Hermeneutic Language and Social Ecology* investigates political protest social practice art acoustic ecology dance theatre family therapy and ritual in terms of social philosophy Contributors to the third part *Environment Immersiveness and Interactivity* explore architecture and sculpture site specific and mediated dance and paratheatre through radical theories of urban and virtual space and time or else phenomenological philosophy The final part *Void Death Life and the Sublime* indicates the possibilities in dance architecture and animal behaviour of a shift to an existential ontology in which nature has the capacity to perform itself **Healthy Recipes and Provocative Worldviews** Tiffany Twain, 2013-01-24 This is a cookbook that contains some of the healthiest recipes ever invented and they create food that is delicious In addition this collection of essays provides figurative recipes for our nation to create a better world through an embrace of holistic fair minded and farsighted perspectives with a deep appreciation of feminine vision and common sense fairness The provocative worldviews included with these recipes include some advice to the Tea Party and Occupy Movements and there are also several compendiums of prescriptions for how we could improve our societies by fairly fixing our Social Security and

healthcare systems and by advancing a progressive agenda for a more sane humanity These ideas would help guide us forward toward achieving goals that are in best interests of almost everyone now alive and all in future generations
