position in an increasingly polarized world As income inequalities have become more pronounced in core countries especially in the U S and the U K global inequalities emerged as a new topic of social scientific scholarship ignoring the constant move toward polarization that has been characteristic of the entire modern world system At the same time the rise of new states most notably the BRICS and the relative economic growth of particular regions especially East Asia have prompted speculations about the next hegemon that largely disregard both the longue dur e of hegemonic shifts and the constraints that regional differentiations place on the concentration of capital and geopolitical power in one location Authors in this book place the issue of rising inequalities at the center of their analyses They explore the concept and reality of semiperipheries in the 21st century world system the role of the state and of transnational migration in current patterns of global stratification types of catching up development and new spatial configurations of inequality in Europe s Eastern periphery as well as the prospects for the Global Left in the new systemic order The book links novel theoretical debates on the rise of global inequalities to methodologically innovative approaches to the urgent task of addressing them

Hall,James V. Fenelon,2015-12-03 The issues native peoples face intensify with globalization Through case studies from around the world Hall and Fenelon demonstrate how indigenous peoples movements can only be understood by linking highly localized processes with larger global and historical forces The authors show that indigenous peoples have been resisting and adapting to encounters with states for millennia Unlike other antiglobalization activists indigenous peoples primarily seek autonomy and the right to determine their own processes of adaptation and change especially in relationship to their origin lands and community The authors link their analyses to current understandings of the evolution of globalization Global Change and the Earth System Will Steffen,Regina Angelina Sanderson,Peter D. Tyson,Jill Jäger,Pamela A. Matson,Berrien Moore III,Frank Oldfield,Katherine Richardson,Hans-Joachim Schellnhuber,Billie L. Turner,Robert J. Wasson,2005-12-29 The interactions between environmental change and human societies have a long complex history spanning many millennia but these have changed fundamentally in the last century Human activities are now so pervasive and profound that they are altering the Earth in ways which threaten the very life support system upon which humans depend This book describes what is known about the Earth System and the impact of changes caused by humans It considers the consequences of these changes with respect to the stability of the Earth System and the well being of humankind as well as exploring future paths towards Earth System science in support of global sustainability
