Philip Davis,2012-01-01 The ongoing global financial crisis was not simply the fault of the financial sector Bankers households and governments had all entered a spiral of greed selfishness and impatience in pursuit of their respective aims of higher remuneration greater

consumption and enhanced popularity The outcome besides costly bank bailouts has been rising private and public debt and stagnant economies Economics the ruling paradigm in today s society can explain their motivation of self interest but not the underlying irrationality of their behavior Taking a view from Scripture Philip Davis critiques the overall aims of individuals as assumed by economics wealth consumption and power in contrast to Jesus proclamation of the kingdom of God the love for God and neighbor and responsible stewardship of resources In doing so he aims to equip Christians to better understand the crisis from a kingdom perspective to provide the church with a distinctive voice in these troubled times and to press for radical Christian solutions to address the underlying difficulties This little book aims to redress the gap in Christians understanding that led the theologian Jurgen Moltmann to remark trenchantly The neglect of economics is a wound in the side of the church

Christian Release , God the Economist M. Douglas Meeks, God does not appear in the modern market For most economists this is as it should be It is in no way necessary according to modern economic theory to consider God when thinking about economy Indeed the absence of God in economic matters is viewed as necessary to the great advances in modern economy The difficulty with modern market economies however is that human livelihood is also left out of the theory and practice of the market economy I propose to bring the church's teaching about God the doctrine of the Trinity to bear on the masked connections between God and economy I will treat the Trinity as the way of understanding what the Bible calls the economy of God

Humanism in Economics and Business Domènec Melé, Martin Schlag, 2015-02-25 This book offers different perspectives on Humanism as developed by Catholic Social Teaching with a particular focus on its relevance in economics and business The work is composed of three sections covering what is meant by Christian Humanism how it links with economic activity and its practical relevance in the business world of today It reviews the historical development of Christian Humanism and discusses the arguments which justify it in the current cultural context and how it contributes to human development The book argues that the current recognition of human dignity and the existence of innate human rights are both ultimately rooted in Christian Humanism It sets out the importance of the concept for economic activities and how Christian Humanism can serve as a metaphysical foundation and ethical basis for a social market economy Applying Christian Humanism to business leads to the centrality of the person in organizations and to seeing the company as a community of persons working together for the common good Three thought provoking case studies illustrate the wide reaching positive impacts of applying Christian Humanism in the organization
