Entrepreneurship in the Informal Sector Colin C. Williams, 2017-09-22 How many businesses start ups conduct some or all of their trade off the books And how many enterprises continue to do some of their work off the books once they are more established What should be done about them Should governments adopt ever more punitive measures to eradicate them Or should we recognise this hidden enterprise culture and attempt to harness it If so how can this be done What measures can be taken to ensure that businesses start up in a proper manner And what can be done to help those

enterprises and entrepreneurs currently working off the books to legitimise their businesses The aim of this book is to advance a new way of answering these questions Drawing inspiration from institutional theory informal sector entrepreneurship is explained as resulting from the asymmetry between the codified laws and regulations of a society s formal institutions and the norms values and beliefs that comprise a society s informal institutions The argument is that if the norms values and beliefs of entrepreneurs i e their individual morality were wholly aligned with the codified laws and regulations i e state morality there would be no informal sector entrepreneurship However because the individual morality of entrepreneurs differs from state morality such as due to their lack of trust in government and the rule of law the result is the prevalence of informal sector entrepreneurship The greater the degree of institutional asymmetry the higher is the propensity to engage in informal sector entrepreneurship This book provides evidence to show that this is the case both at the individual and country level and then discusses how this can be overcome

Visitor Attractions and Events Adi Weidenfeld, Richard Butler, Allan M. Williams, 2016-04-28 Both visitor attractions and events play pivotal roles in the appeal of tourism destination regions to visitors by virtue of being the main motivator of tourist trips and determining consumers choices However more recently visitor attractions have become more multifaceted have proliferated and fragmented in terms of form location scale and style and their role is undergoing major changes in a post modern world as a result of consumer demands and competitive innovations Visitor Attractions and Events for the first time theoretically and empirically explores the relations between

events and attractions to offer new thinking of the role of space and place in shaping development management practices and strategies in the sector as well as future implications The book reveals how location is pivotal in the development planning and management of visitor attractions and events Whereas the location of natural attractions is relatively fixed in space and their locations cannot be predetermined or relocated human made or contrived attractions are more influenced by the planning process in the context of the locational decision making process Competition and cooperation between visitor attractions and the aspects which shape these relations including complementarities compatibility knowledge spill overs and diffusion of innovations product similarities and spatial proximity remain largely ignored in the visitor attraction sector and thus are major elements in the focus of this book Comparative examples ranging from small to major attractions in a wide variety of locations are included This significant volume will appeal widely to all those interested in the visitor sector such as tourism events leisure studies destination management and sociology
