Economic Theory of the Firm

There are two views of the firm:

1. Neoclassical (traditional) theory:

- Firm is a calculating entity, that makes decisions, buys inputs, making output, and selling for profit for loss

2. Property rights theory:

- Firm is a collection of contracts between owners of resources, who wish to combine portions of their resources, for some period, for some purpose

Economic Performance And The Theory Of The Firm:

Economic Performance and the Theory of the Firm David J. Teece, 1998-01-01 These papers by Teece cover the theory of the firm and its implications for economic performance as they concern managers and policy makers Key topics addressed include the nature of the firm and dynamic capabilities diversification and vertical integration and joint ventures

The Selected Papers of David J. Teece David J. Teece, 1998 **Theory of the Firm for Strategic Management** Manuel Becerra, 2009-02-05 Develops a value based theory of the firm specifically aimed at strategic decision making

The Theory of the Firm Nicolai J. Foss, 2000 **The Theory of the Firm and Chinese Enterprise Reform** Qin Xiao, 2004 Changes to corporate structure including the role of the corporate headquarters have been key factors in bringing about economic reform in China In this penetrating and insightful book Xiao questions the conventional theory of the firm arguing that the ultimate goal of the headquarters of modern large corporations is to function as a substitute for the market and introducing a new explanation for the nature of the firm the substitution function model He provides an insider's account of the reforms in CITIC and as such this is a rare narrative that should be essential reading for scholars and practitioners who care about the theory and practice of the firm in particular in the context of Chinese enterprise reform **Handbook on the Economics and Theory of the Firm** Michael Dietrich, Jackie Krafft, 2012-01-01 This unique Handbook explores both the economics of the firm and the theory of the firm two areas which are traditionally treated separately in the literature On the one hand the former refers to the structure organization and boundaries of the firm while the latter is devoted to the analysis of behaviours and strategies in particular market contexts the novel concept underpinning this authoritative volume is that these two areas closely interact and that a framework must be articulated in order to illustrate how linkages can be created This interpretative framework is comprehensively developed in the editors introduction and the expert contributors more than fifty academics of renowned authority further elaborate on the linkages in the seven comprehensive sections that follow encompassing background equilibrium and new institutional theories the multinational firm dynamic approaches to the firm modern issues firms strategies and economic policy and the firm Bridging economics and theory of the firm and providing both technical and institutional perspectives on real corporations this path breaking Handbook will prove an invaluable resource for academics researchers and students in the fields of economics heterodox economics business and management and industrial organization **Towards a Competence Theory of the Firm** Nicolai J. Foss, Christian Knudsen, 2013-12-02 This book explores a new theory of the firm produced through an exchange between management theory and economics In the process economics is seen to provide a foundational element for strategy research whilst developing a more realistic theory of the firm with a greater emphasis on its internal features The success of competence theories of the firm also reflects their ability to explain significant trends in the business world notably the declining importance of conglomerates and critical features in the success of Asian and Japanese business *Modern Concepts of the*

Theory of the Firm Günter Fandel, Uschi Backes-Gellner, Manfred Schlüter, Joerg E. Staufenbiel, 2013-03-09 This volume contains the results of the International Conference on Managing Enterprises of the New Economy by Modern Concepts of the Theory of the Firm which took place in Hagen from 12-14 December 2002. The conference was organised jointly by the FernUniversität in Hagen and the Erich Gutenberg Arbeitsgemeinschaft in Cologne. The Deutsche Forschungsgemeinschaft, the FernUniversität and the Märkische Bank in Hagen provided generous financial support for the conference and in fact enabled its implementation and the publication of this record of the proceedings. We would like to express our gratitude to the sponsors for their support. The aim of the conference was the exchange of academic experience with regard to new approaches to and extensions of the theory of the firm that can be used to solve the problems of New Economy companies. The starting point was the practical experience that the owners and managers of New Economy companies paid too little attention to functional company controls in the general euphoria regarding future economic trends and that because of this the enterprises got into difficulties or were faced with threats to their survival. These control deficits were detected equally in the areas of sales, production, personnel, planning, organisation and finance and in the arrangement of management and control structures. Deficiencies in company evaluations and accounting led to investors experiencing severe disappointment on the loss of their invested capital.

Internationalization, Technological Change and the Theory of the Firm Nicola De Liso, Riccardo Leoncini, 2010-09-13 This book focuses on three main areas each of which is central to economic theorising: firms, organisation and behaviour, technological change and the process of globalisation. What this collection provides is a broad view of the three topics by concentrating on different aspects of each of them and utilising different methods of investigation.

Technological Systems and Economic Performance: The Case of Factory Automation B.

Carlsson, 2012-12-06 In 1987 the Swedish National Board for Technical Development (STU) later becoming the Swedish National Board for Industrial and Technical Development (NUTEK) initiated a study of Sweden's Technological Systems and Future Development Potential. A comprehensive interdisciplinary study was envisioned yielding not only useful insight but also a permanent competence base for future analyses of technological systems and technology policy in Sweden. Three leading Swedish research institutes were invited to participate: the Industrial Institute for Economic and Social Research in Stockholm, the Department of Industrial Management and Economics at Chalmers University of Technology in Gothenburg and the Research Policy Institute at the University of Lund. I was invited to direct the project. The project group decided to focus initially on a particular technological system, namely factory automation, to be followed by similar studies of other systems. Numerous publications have resulted from the project thus far. The current volume represents a summary of our work on factory automation. It consists of several original essays and of some previously published papers which have been edited in some cases substantially in order to form a comprehensive and coherent picture of a technological system. To our knowledge this is the first in-depth analysis of a technological system designed as a component of a systematic study of

technological systems more generally At the time of this writing three further studies on electronics and computers pharmaceuticals and powder technology are under way to be published in a later volume The Theory of the Growth of the Firm Edith Tilton Penrose,2009 Edith Penrose s tightly argued classic laid the foundations for the resource based view of the firm now the dominant framework in business strategy She analyses managerial activities and decisions organizational routines and also the factors that inevitably limit a firm s growth prospects from publisher s description **Economic Development and the Division of Labor** Xiaokai Yang,Jeffrey D. Sachs,2008-04-15 This innovative new text from Jeffrey Sachs and Xiokai Yangintroduces students to development economics from the perspectivesof inframarginal analysis and marginal analysis The bookdemonstrates how the new found emphasis on inframarginal analysis has influenced a shift back to an interest in Classical Economicsfrom Neoclassical Economics Inframarginal Analysis vs Marginal Analysis is presented as aconsistent theoretical framework throughout Shows how the relationship of Inframarginal Analysis toMarginal Analysis has influenced the shift back to an interest inClassical Economics from Neoclassical Economics with regard toeconomic development Allows economists to reduce their overall reliance on marginalanalysis which may be less relevant to development economics thanit is to the economics of development countries Brings considerable analytic machinery to bear on importantproblems A focus on institutions and transaction costs that is veryrelevant to development economics Offers a thorough analysis of trade CHs 3 7 andmacroeconomics CHs 16 19 both of which are not dealt with indepth by comparable textbooks *A Brief Prehistory of the Theory of the Firm* Paul Walker,2018-05-11 The theory of the firm did not exist in any serious manner until around 1970 Only then did the current theory of the firm literature begin to emerge based largely upon the work of Ronald Coase and to a lesser degree Frank Knight It was work by Armen Alchian Robert Crawford Harold Demsetz Michael Jensen Benjamin Klein William Meckling and Oliver Williamson among others that drove the upswing in interest in the firm among mainstream economists This accessible book provides a valuable overview of the prehistory of the firm Spanning an impressive timeline it delves into Antiquity the Medieval era the pre classical economics period and the 19th and 20th centuries Next the book traces the theoretical contributions from pre classical classical and neoclassical economics It will be illuminating reading for students and researchers of the history of economic thought industrial organization microeconomic theory and business history *The Science of Economic Development and Growth: The Theory of Factor Proportions* C.C. Jovanović,2011-01-31 International Handbook of Economic Integration edited by Miroslav Jovanovi provides timely and rich academic contributions to considerations of the widest array of integration related issues European integration has been providing an inspiration to a number of academics and

researchers The Handbook is a recognition of the dynamic and strong solidarity of the European integration At the same time the European Union often provided an example for integration schemes throughout the world which spread enormously since the mid 1990s Leading experts from all continents contributed to this Handbook which will be a valuable input into academic and policy making discussions and actions Jos Manuel Barroso President of the European Commission Miroslav Jovanovi s publication represents a rich contribution to the complex issue of regional integration its benefits its shortcomings and its relationship with multilateral trade opening It sheds light over an issue which is the subject of intense discussions in trade circles Pascal Lamy Director General of the WTO Much has been written on trade agreements as a mechanism to integrate the markets of two or more countries often inspired by the European example In recent years attention has increasingly focused on the importance of economic geography as a determinant of industrial location This book combines the two strands of analysis bringing together leading experts in the fields of economic geography and international trade The result is an outstanding compilation of papers that illuminate how policies and economic forces affect the location of economic activity in an integrated Europe Bernard Hoekman Director The World Bank US The open multilateral trading system is a tremendous success of the past half century and has contributed greatly to the world s unprecedented rate of economic growth Over the past two decades however preferential trading arrangements have proliferated raising questions as to how compatible they are with the open multilateral system and what policies might be adopted to improve outcomes The essays in this volume detail the emergence of PTAs and provide comprehensive and up to date analyses of the state of play of preferential arrangements in all regions of the world The volume will provide a useful reference for all those wanting to understand existing preferential arrangements and their role in the international economy today Anne O Krueger Johns Hopkins University and Stanford University US Economic integration is a complex and multifaceted giant with a myriad aspects ranging from regional and global concentration and dispersal of economic activity to social and political consequences for individuals and communities in developed and developing countries alike This landmark three volume collection of chapters by leading authors drawn from many fields is a worthy and timely contribution to the analysis of a phenomenon with profound implications for the future world economy and its governance James Zhan Director Investment agriculture and environment and quantitative studies of integration effects A removal of barriers for the mobility of factors in certain integration arrangements among countries has an impact on the mobility of capital firms and individuals within the group Various aspects of this factor mobility are analysed in eight detailed chapters The second theme of the Handbook is devoted to agriculture and environment This is of great global relevance as the Common Agricultural Policy of the EU has been a bone of contention in international relations over several decades Finally seven quantitative studies of the effects of integration attempt to measure various potential benefits of regional integration efforts Contributors to this major reference work include eminent authors some of whom contributed to the creation of economic integration theory from the outset The

authors not only survey the literature but also present their own arguments and new ideas in order to offer a new perspective as well as discussing the issues they believe are essential in the field Each of the insightful chapters is approachable not only to graduate students scholars researchers and policymakers but also to advanced undergraduate students

Development Sung-Hee Jwa,2017-06-30 This book makes the bold attempt at proposing a new general theory of economic development The main premise is that economic institutions and policies must embody economic discrimination if there is to be any chance of real economic development By economic discrimination the author means treating differences differently by selecting and supporting economic entities and behaviour that contribute positively to the economy The book identifies markets government and corporations as the holy trinity of economic development that is the three most important institutions that must work together via economic discrimination to steer the economy towards real transformative progress The book also warns against the current trend of economic egalitarianism or not treating differences differently because it destroys economic incentives and results in an array of economic problems including growth stagnation Elgar
