C. Pratt, Peter Cheng-Chong Wu, 2016-07-01 Contemporary urbanisation has two faces global flows of people money and information and that of localised social and economic disparities Recent research has focused on the headlines of global cities as control centres of the world economy and social and economic shock waves that have raged through cities and regions but less attention has been paid to the secret life of cities and the changing nature of everyday life in the wake of such changes This book challenges current research and policy agendas recommending spatial concentration and relocation as a solution to the problems of environmental sustainability and social dislocation Instead this book highlights the key

linkages between social and environmental problems it argues that neither are likely to be resolved with a simple spatial fix The book draws attention to local contexts of contemporary urbanisation emphasising consideration of policy making from the perspective of the household as a key unit of analysis in identifying links between labour and housing markets transport and leisure This book draws upon detailed household interviews about the daily experience of life in a global city It illustrates the dilemmas and solutions that people routinely find in order to go on in their lives It shows that these local fixes that are managed at the level of the household work in spite of and sometimes against existing policies aimed at sustainability It concludes that policy making needs to be radically overhauled in order to address the integrated nature of people's everyday lives

**The Crisis of Argentine Capitalism** Paul H. Lewis, 2000-11-09 At the end of World War II Argentina was the most industrialized nation in Latin America with a highly urbanized literate and pluralistic society But over the past four decades the country has suffered political and economic crises of increasing intensity that have stalled industrial growth sharpened class conflict and led to long periods of military rule In this book Paul Lewis attempts to explain how that happened Lewis begins by describing the early development of Argentine industry from just before the turn of the century to the eve of Juan Peron's rise to power after World War II He discusses the emergence of the new industrialists and urban workers and delineates the relationships between those classes and the traditional agrarian elites who controlled the state Under Peron the country shifted from an essentially liberal strategy of development to a more corporatist approach Whereas most writers view Peron as a pragmatist if not opportunist Lewis treats him as an ideologue whose views remained consistent throughout his career and he holds Peron along with his military colleagues chiefly responsible for ending the evolution of Argentina's economy toward dynamic capitalism Lewis describes the political stalemate between Peronists and anti Peronists from 1955 to 1987 and shows how the failure of post Peron governments to incorporate the trade union movement into the political and economic mainstream resulted in political polarization economic stagnation and a growing level of violence He then recounts Peron's triumphal return to power and the subsequent inability of his government to restore order and economic vigor through a return to corporatist measures Finally

Lewis examines the equally disappointing failures of the succeeding military regime under General Videla and the restoration of democracy under President Raul Alfonsin to revive the free market. By focusing on the organization development and political activities of pressure groups rather than on parties or governmental institutions, Lewis gets to the root causes of Argentina's instability and decline, what he calls the politics of political stagnation. At the same time, he provides important information about Argentina's entrepreneurial classes and their relation to labor, government, the military, and foreign capital. The book is unique in the wealth of its detail and the depth of its analysis.
