List of Recent Periodical Articles Joint Bank-Fund Library,1990-08 International Macroeconomics Victor Argy,2013-01-11 International Macroeconomics Theory and Policy offers phenomenal coverage across the entire subject of international macroeconomics in an open economy context The book has four objectives to describe the evolution of and experiences with global exchange rate regimes to introduce the reader to a rigorous analysis of open economy models to apply the model framework to address key policy issues to review individual country experiences of macro policy

Political And Economic Transformation In East Central Europe Hanspeter Neuhold,Peter Havlik,Arnold Suppan,2019-05-28 This is an examination of the progress that Croatia the Czech Republic Hungary Poland Slovakia and Slovenia have made in the process of transformation since the collapse of the Soviet bloc Looking at issues such as democratization the transition to a market economy and the new orientations in foreign policy this book provides a report of th

Europe and Economic Reform in Africa Obed O. Mailafia,2005-08-12 This book explores the complex post colonial relationship between Europe and African states Using new field work as well as existing material the author explores the dynamics of diplomacy the operating practices of EU agreements responses to debt and structural adjustment

The Monetary Economics of Europe Christopher Johnson,Stefan Collignon,1994 Based on research commissioned by the European Parliament this volume allows the economists contributing to offer their own explanations for the collapse of the European Monetary System with the use of economic models

The Political Economy of the European Social Model Philip B. Whyman,Mark J. Baimbridge,Andrew Mullen,2012-05-31 This book seeks to analyse the development of the European Union EU which was founded upon the principle of the free movement of capital goods services and people in 1957 Its central thesis is that from a practical and theoretical point of view such a basis is fundamentally at odds with the creation of an interventionist regime that the construction of a social Europe would require The authors argue convincingly that economically the EU does not currently possess the budget or the economic tools to pursue such a strategy politically close to none of the institutions of the EU have backed such a policy practically conservative and neo liberal forces among member states and the institutions of the EU have repeatedly thwarted any moves in this direction In reality the Single Internal Market Economic and Monetary Union enlargement the Lisbon Agenda and European Constitution projects all prioritise supply side measures and expanding the scope of the market rather than the boosting of demand and other economic intervention Consequently constructing a social Europe in the face of this would appear problematic Hence in both theory and practice the idea that there can be a social Europe vis vis neoliberalisation is a contradiction in terms This controversial book will be an educating and refreshing read for advanced students and academics involved with European politics the European Union European Economics and Economic institutions

Mailafia,Obad Mailafiya,1997 The post colonial relationship between European and African states is complex This book examines the unprecedented changes since the oil crisis of the 1970s using new field work from Zambia as well as existing material International Economic Institutions M.A. van Meerhaeghe,2013-03-14 What made me write this book was a feeling that students of international economics needed to fill out their knowledge of the theory with work on the practice of the major international economic organizations many of which are having a growing influence on the national economies of their members There was no single volume given over to a concise treatment of these organizations The annual reports of the international organizations themselves can be consulted of course but as a rule these are not noted for being brief and to the point the items of importance have to be fished out of a sea of useless detail nor do they go in for criticism of their own activities In selecting the organizations to be dealt with in the book I was guided by the influence they exert I have left out those whose activities consist mainly in the drafting of recommendations to which however meritorious they may be little or no attention is paid Some of them are included in the Introduction which provides a summary of a number of institutions not discussed separately in the body of the work There are however two exceptions the Organization for Economic Cooperation and Development OECD as the organization replacing the Organization for European Economic Cooperation OEEC and the United Nations Conference on Trade and Development UNCTAD whose meetings have succeeded in drawing much attention of the press **Capital Controls, Exchange Rates, and Monetary Policy in the World Economy** Sebastian

Congress. Office of Technology Assessment,1991 *A Macroeconomic Regime for the 21st Century* Christopher Taylor,2011-03-02 The book aims to give non economists a detailed understanding of how macroeconomic policy works in modern economies and the issues it faces The world has recently been through a huge economic crisis and thinking people everywhere have reason to wonder whether something is not seriously wrong with the policy regimes underlying these dramatic events in the major economies and whether changes should be made The author reviews the history of the

successive regimes tried and found wanting in the second half of the last century and proposes a set of reforms designed to convert the flawed neo liberal consensus of the 1990s into a durable regime for the present century

Trade Policy in Multilevel Government Christian Freudlsperger, 2020-04-11 Trade Policy in Multilevel Government investigates how multilevel polities organize openness in a globalizing political and economic environment In recent years the multilevel politics of trade caught a broader public's attention not least due to the Wallonian regional parliament's initial rejection of the EU Canada trade deal in 2016 In all multilevel polities competencies held by states and regions have increasingly become the subject of international rule setting This is particularly so in the field of trade which has progressively targeted so called behind the border regulatory barriers In their reaction to this deep trade agenda constituent units in different multilevel polities have shown widely varying degrees of openness to liberalizing their markets Why is that This book argues that domestic institutions and procedures of intergovernmental relations are the decisive factor Countering a widely held belief among practitioners and analysts of trade policy that involving subcentral actors complicates trade negotiations it demonstrates that the more voice a multilevel polity affords its constituent units in trade policy making the less the latter have an incentive to eventually exit from emerging trade deals While in shared rule systems constituent unit governments are directly represented along the entirety of the policy cycle in self rule systems territorial representation is achieved merely indirectly Shared rule systems are hence more effective than self rule systems in organizing openness to trade The book tests its theory's explanatory power on the understudied case of international procurement liberalization in extensive studies of three systems of multilevel government Canada the European Union and the United States

Energy and Economic Reform in the Former Soviet Union L. Dienes, I. Dobozi, M. Radetzki, 1994-01-21 This book provides a succinct account of what may happen to the energy sector in the former Soviet Union in the medium to long run under alternative scenarios for macroeconomic reform The analyses reveal the serious damage of the oil resource base caused by the reckless exploitation practices of the past Production of oil and coal can recover only slowly from the doldrums of the early 1990s but the potential to expand gas output is very considerable Energy consumption practices have been extremely wasteful in the past The total savings potential that could be accomplished as energy prices are allowed to rise and incentives to economise on energy use are introduced is huge The analysis of production and consumption prospects is disaggregated by major republic The likely evolution of FSU energy exports until 2005 is also explored and the impact that changing export flows could have on the international prices of oil coal and natural gas is discussed in detail
