The Anthropology of Morality in Melanesia and Beyond John Barker,2016-04-01 The Anthropology of Morality in Melanesia and Beyond examines how Melanesians experience and deal with moral dilemmas and challenges Taking Kenelm Burridge s seminal work as their starting point the contributors focus upon public situations and types of people that exemplify key ethical contradictions for members of moral communities While returning to some classical concerns such as the roles of big men and sorcerers the book opens new territory with richly textured ethnographic studies and theoretical reviews that explore the interface between the values associated with indigenous village life and the ethical orientations associated with Christianity the state the marketplace and other facets of modernity A major contribution to the emerging field of the anthropology of morality the volume includes some of the most prominent scholars working in the discipline today including Bruce Knauft Joel Robbins F G Bailey Deborah Gewertz and Frederick Errington **The Governance of Common Property in the Pacific Region** Peter Larmour,2013-03-01 With the inevitable lessening of the importance of traditional forms of management of land and water resources in Pacific island countries accompanying the development of the state and the internationalisation of these economies common property problems have arisen in many natural resource areas This publication covers many of the problem areas which have arisen and discusses various approaches to better management Foreword Pacific 2010 Paul A. What are the subjects of their art? Art and Life in Melanesia provides a timely exploration of contemporary Melanesian artists and their creative voices. It covers major cultural themes including kastom, Christianity, Indigenisation and Globalisation, Markets, Festivals, Diasporas, urban culture and politics. Each theme focuses on ideas, issues and some specific arts practices, drawing examples from a few localities. Art and Life in Melanesia is based on many years of research in the region and will be an extremely welcome and timely addition to the publishing on this subject. Dust jacket Economic Basis of Pacific Security John E. Starron, Patricia K. Hymson, 1982. **Sustaining a Resilient Asia Pacific Community** Kiran Sagoo, Wilmar Salim, 2009-03-26. Coming out of an established international graduate student conference organized by the East West Center, this book presents selected papers written by graduate students from different fields of study. After identifying historical or contemporary issues in each field, these papers propose a framework for resolving these issues, whether through global commitment, regional cooperation, national policy or local knowledge and practice. The unifying thread of this book is sustaining resilience in the Asia Pacific. We acknowledge this perseverance and try to sustain and disseminate it so that other communities may learn from these practices and experiences. Generally, a volume like this would address the challenge of this region from a security, economics or political perspective. This book hopes to add to the literature on resiliency by addressing these issues from a multidisciplinary and multilevel perspective. The Oxford Handbook of International Law in Asia and the Pacific Simon Chesterman, Hisashi Owada, Ben Saul, 2019-09-12. The growing economic and political significance of Asia has exposed a tension in the modern international order. Despite expanding power and influence, Asian states have played a minimal role in creating the norms and institutions of international law; today they are the least likely to be parties to international agreements or to be represented in international organizations. That is changing. There is widespread scholarly and practitioner interest in international law at present in the Asia Pacific region as well as developments in the practice of states. The change has been driven by threats as well as opportunities. Transnational issues such as climate change and occasional flashpoints like the territorial disputes of the South China and the East China Seas pose challenges while economic integration and the proliferation of specialized branches of law and dispute settlement mechanisms have also encouraged greater domestic implementation of international norms across Asia. These evolutions join the long-standing interest in parts of Asia, notably South Asia, in post-colonial theory and the history of international law. The

Oxford Handbook of International Law in Asia and the Pacific brings together pre eminent and emerging specialists to analyse the approach to and influence of key states of the region as well as whether truly Asian trends can be identified and what this might mean for international order

Circulation in Population Movement (Routledge Revivals) Murray Chapman, R. Mansell Prothero, 2013-09-05 First published in 1985 this collection of essays deals with processes of population movement and how they have operated over time It is also about people Melanesian s who number some five million and inhabit the region stretching from the Indonesian province of Irian Jaya to the Independent State of Fiji Standard work on Movement in third world societies has emphasized migration involving a shift in residence from one domicile to another at the expense of the interchange of people between diverse places and different circumstances Many moves as from villages and towns are circulatory they begin at go away from but ultimately end in the same dwelling place and community This book focuses on the full range of territorial mobility especially circulation and its meanings for the people involved This volume brings together indigenous scholars foreign field researchers and international authorities from many of the social sciences anthropology demography economics geography and sociology It presents a set of multicultural statements about the mobility of particular peoples within a region of the third world This collection about specifically Melanesian issues aims to stimulate broader visions among population scholars and it underlines the pressing need for more theoretical and empirical work on a volatile yet neglected category of population movement

Customary Land Tenure and Registration in Australia and Papua New Guinea James F. Weiner, Katie Glaskin, 2007-06-01 The main theme of this volume is a discussion of the ways in which legal mechanisms such as the Land Groups Incorporation Act 1974 in PNG and the Native Title Act 1993 in Australia do not as they purport serve merely to identify and register already existing customary indigenous landowning groups in these countries Because the legislation is an integral part of the way in which indigenous people are defined and managed in relation to the State it serves to elicit particular responses in landowner organisation and self identification on the part of indigenous people These pieces of legislation actively contour the progressive evolution of landowner social territorial and political organisation at all levels in these nation states The contributors to this volume provide in depth anthropological case studies of social structural and cultural transformations engendered by the confrontation between states developers and indigenous communities over rights to customarily owned land
