Economics And World History Myths And Paradoxes:

Economics and World History Paul Bairoch, 1995-09 Paul Bairoch deflates twenty commonly held myths about economic history. Among these myths are that free trade and population growth have historically led to periods of economic growth and that colonial powers in the nineteenth and early twentieth centuries became rich through the exploitation of the Third World. Bairoch shows that these beliefs are based on insufficient knowledge and wrong interpretations of the history of economies of the United States, Europe and the Third World and he re-examines the facts to set the record straight. Bairoch argues that until the early 1960s the history of international trade of the developed countries was almost entirely one of protectionism rather than a Golden Era of free trade and he reveals that in fact past periods of economic growth in the Western World correlated strongly with protectionist policy. He also demonstrates that developed countries did not exploit the Third World for raw materials during the nineteenth and early twentieth centuries as some economists and many politicians have held. Among the many other myths that Bairoch debunks are beliefs about whether colonization triggered the Industrial Revolution, the effects of the economic development of the West on the Third World and beliefs about the 1929 crash and the Great Depression. Bairoch's lucid prose makes the book equally accessible to economists of every stripe as well as to historians, political scientists and other social scientists.

Economics and World History Paul Bairoch, 1993-07-15 Paul Bairoch sets the record straight on twenty commonly held myths about economic history. Among these are that free trade and population growth have historically led to periods of economic growth, that a move away from free trade caused the Great Depression and that colonial powers in the nineteenth and early twentieth centuries became rich through the exploitation of the Third World. Bairoch argues that these beliefs are based on insufficient knowledge and misguided interpretations of the economic history of the United States, Europe and the Third World. A challenging and readable introduction to some major controversial themes in modern international economic history. Peter J. Cain, *International History Review*. Paul Bairoch sheds fascinating light on many of the accepted truths of modern economic history, an intriguing account well executed. Alfred L. Malabre Jr, *Economics Editor Wall Street Journal*.

Economics and World History Paul Bairoch, 1995 **Decolonizing International Relations** Branwen Gruffydd Jones, 2006-09-20 The discipline of International Relations (IR) is concerned with the powerful states and actors in the global political economy and dominated by North American and European scholars. This book exposes the ways in which IR has consistently ignored questions of colonialism, imperialism, race, slavery and dispossession in the non-European world. **The New Palgrave Dictionary of Economics**, 2016-05-18 The award-winning *The New Palgrave Dictionary of Economics* 2nd edition is now available as a dynamic online resource. Consisting of over 1,900 articles written by leading figures in the field, including Nobel prize winners, this is the definitive scholarly reference work for a new generation of economists. Williamson, 2013-01-11 How the rise of globalization over the past two centuries helps explain the income

gap between rich and poor countries today Today's wide economic gap between the postindustrial countries of the West and the poorer countries of the third world is not new Fifty years ago the world economic order two hundred years in the making was already characterized by a vast difference in per capita income between rich and poor countries and by the fact that poor countries exported commodities agricultural or mineral products while rich countries exported manufactured products In *Trade and Poverty* leading economic historian Jeffrey G Williamson traces the great divergence between the third world and the West to this nexus of trade commodity specialization and poverty Analyzing the role of specialization de industrialization and commodity price volatility with econometrics and case studies of India Ottoman Turkey and Mexico Williamson demonstrates why the close correlation between trade and poverty emerged Globalization and the great divergence were causally related and thus the rise of globalization over the past two centuries helps account for the income gap between rich and poor countries today
