Economywide Policies And The Environment Lessons From Experience:

Economywide Policies and the Environment Mohan Munasinghe, Wilfrido Cruz, 1995 These findings have relevance for decision making *Economywide policies and the environment* Banco Mundial, 1994 Using Economic Policy to Improve Environmental Protection in Pakistan Rashid Faruquee, 1997 **The Greening of Economic Policy Reform** Jeremy J. Warford, Mohan Munasinghe, Wilfredo Cruz, 1997 This report in two volumes addresses environmental impacts stemming from economy wide policy reforms and seeks to clarify the nature of the economic physical institutional and cultural aspects of their relationship Volume 1 summarizes the case studies and synthesizes their key principles Volume 2 explores the case studies in full length They reflect a wide range of country situations and environmental problems Pollution issues are addressed such as air quality and energy use in Poland and Sri Lanka while a variety of natural resource related issues are covered in the other studies deforestation and land degradation in Costa Rica migration and deforestation in the Philippines agricultural land degradation due to overgrazing in Tunisia fertility losses due to extension of cultivation areas in Ghana water resource depletion in Morocco and wildlife management in Zimbabwe The case studies also use a variety of analytical methods to illustrate the different approaches to identifying the environmental implications of economy wide reforms These methods range from tracing the links between economic incentives and resource use through direct observation to relying on more complex economic modeling of policies and their environmental effects In all the studies however the analytical approach uniformly requires identifying key environmental concerns and relating them to the agenda of priority sectoral and macroeconomic reforms **Macroeconomic Policies for Sustainable Growth** Mohan Munasinghe, 2006-05-25 The state of the art studies in this volume are to be warmly welcomed The authors successfully explore the economic environmental and social consequences of policy failures and identify practical corrective measures Charles Perrings President International Society for Ecological Economics ISEE Macroeconomic policies have come under justifiable scrutiny because of their powerful and pervasive impacts throughout the economy This book examines the sustainability of growth oriented macroeconomic strategies starting from early ideas linking macroeconomic policies growth and sustainability A comprehensive and up to date literature review and theoretical framework are presented including both macroeconomic and microeconomic analyses of the linkages between the economy and the environment Environmental Impacts of Macroeconomic and Sectoral Policies Mohan Munasinghe, International Society for Ecological Economics, 1996-01-01 The importance of violence as a contributory factor to urban poverty in Jamaica has gone largely unresearched This paper outlines the results of a study undertaken by the World Bank and the government of Jamaica to focus on the issue The study uses a participatory urban appraisal methodology in five poor urban areas mainly in Kingston to identify and understand local community perceptions of four different aspects of violence its causes its interrelationship with poverty its impact on employment economic and social infrastructure and local social institutions and ways in which government communities

households and individuals can work to reduce it Comparative Perspectives on Environmental Policies and Issues Robert A. Dibley, 2014-01-10 *Comparative Perspectives on Environmental Policies and Issues* presents tools and concepts about environmental policies in several developed and developing countries. It explores a broad survey of ecological modernization theory, ecological feminism theory, environmental justice theory, the concept of sustainability and research on environmental policies. Data were collected through surveys, interviews and focus groups and are used to analyze social, economic and environmental impact on people. The book specifically discusses how the earth's basic life supporting capital: soils, forests, species, fresh water and oceans is degraded or depleted to provide for human needs and how air pollution and acid precipitation are causing widespread injury to humans, forests and crops. Realistically, over taxing of natural resources and ecological systems throughout the world has promoted economic growth and created increasing opportunities for people while also advancing social injustice. The use of the environment to accomplish social and economic transformation raises fundamental issues for the study of environmental policy and the natural ecological system. As human beings exploit the natural environment to meet present needs, they often will destroy resources needed for the future generations. Thus, environmental policies are enacted to ensure that social and economic impacts of the environment are compatible with the limits of natural systems. Offering an intuitive and crystal clear explanation of the key concepts and principles of environmental policies and sustainable development, this volume is suitable not only for environmental science students but also for instructors, practitioners, researchers and academics.

Principles of Sustainable Soil Management in Agroecosystems Rattan Lal, B.A. Stewart, 2013-06-10 With the use of high level soil management technology, Africa could feed several billion people yet food production has generally stagnated since the 1960s. No matter how powerful the seed technology, the seedling emerging from it can flourish only in a healthy soil. Accordingly, crop yields in Africa, South Asia and the Caribbean could be doubled or tripled through adoption of technologies based on laws of sustainable soil management. *Principles of Sustainable Soil Management in Agroecosystems* describes the application of these laws to enhance ecosystem services while restoring degraded soils and promoting sustainable use. With chapters contributed by world class soil scientists, ecologists and social scientists, this book outlines critical changes in management of agricultural soils necessary to achieve food security and meet the food demands of the present and projected future population. These changes include conversion to no till and conservation agriculture, adoption of strategies of integrated nutrient management, water harvesting and use of drip sub irrigation, complex cropping farming systems such as cover cropping and agroforestry and use of nano enhanced fertilizers. The book is based on the premise that it is not possible to extract more from a soil than what is put into it without degrading its quality. The strategy is to replace what is removed, respond wisely to what is changed and be proactive to what may happen because of natural and anthropogenic perturbations. The chapters which exemplify these ideas cover a range of topics including organic farming, soil fertility, crop symbiotic soil microbiota, human driven soil degradation.

Cameroon Boniface Essama-Nssah, James Jerome Gockowski, 2000-01-01 This country case study part of the Operations Evaluation Department OED A Review of the 1991 World Bank Forest Strategy and Its Implementation evaluates World Bank operations in Cameroon for their consistency with the strategy The strategic aspects of those operations are judged here on their relevance effectiveness efficiency institutional development and sustainability The fundamental objective of the forest policy reform in Cameroon was to establish a transparent equitable and sustainable management system for forest resources The outcome of the reform process was limited for four reasons First the government of Cameroon lacked genuine commitment and the capacity to carry out the reform Second key actors in the reform process particularly foreign logging companies and the parliament chose to oppose it Third partners such as the World Bank failed to devise an implementation strategy compatible with the underlying dynamics of political and socioeconomic changes in Cameroon Finally while Cameroon's forest policy is well codified in documents it is poorly implemented Although the reforms have led to increased tax revenues and increased the share of GDP attributable to the forest sector the structural underpinnings of the sector have been little affected Government agencies in the sector continue to be weak The international logging companies that dominate the sector continue to have a free hand in the development and use of the forest resources of Cameroon Local communities were left out of the reform process despite the declared objective to include them in forest resource management Overall the interventions of the Bank inside and outside the forest sector in Cameroon were relevant to its strategic objectives but they were neither efficacious nor efficient Because of weak institutional development the achievements are unlikely to be sustained The Bank should focus its future reform efforts in Cameroon on the collection and dissemination of relevant and reliable information working with a larger set of stakeholders and using more Cameroonian expertise to gain local perspective and build capacity The success of such an approach hinges on government commitment and the cooperation of other donor countries including those with timber interests in Cameroon

The City as Fulcrum of Global Sustainability Ernest J. Yanarella, Richard S. Levine, 2011 This book responds to some of the twenty first century's most assuming problems of our times global warming sub national terrorism natural resource depletion and economic environmental and financial crises It finds short and long term solutions to these global woes by looking to the city as the fulcrum for introducing sustainability around the world Beginning with an outline of a robust strategy of sustainable cities or sustainable city regions that has emerged out of over two and a half decades of theoretical and practical work the authors show why these portentous problems can best be addressed at the local regional scale In the process this book cuts through the received wisdom and popular misunderstandings about sustainability and peels away the conceptual fog and ideological confusion about the meaning of sustainability Drawing upon extensive fieldwork in North America Europe and Asia the authors examine both strong and weak examples of sustainable city approaches that validate their distinctive urban

sustainability strategy They discover keen insights and important lessons in these case studies for sustainability practice across the globe whether in small towns in the US and Canada large cities in Europe or tiny Chinese villages in Asia Their concluding chapter argues that only the road less travelled holds real promise of creating sustainable city regions around the world guided by the toolkit of ecological and technological conviviality

Structural Adjustment, the Environment and Sustainable Development David Reed, 2013-11-05 This is a pioneering study which should serve as a model for future research and will to a wide audience Dharam Ghai Director United Nations Research Institute for Social Development

Structural Adjustment and the Environment Earthscan 1992 was the first book to fully examine the effects of structural adjustment programmes the economic reform policies required by the World Bank and IMF as part of their lending operations with borrowing countries To widespread Critical acclaim it exposed the damaging environmental and social effects of structural adjustment policies and called for a thorough revision of the then current development policy This new work **Structural Adjustment the Environment and sustainable Development** is a major step forward in the study of structural adjustment policies It looks in detail at new research and analysis into their effects and incorporates recent studies by a wide range of academics and policy makers leading experts and institutes Focusing on nine in depth case studies the book examines the complex links between macroeconomic policies social impacts and environmental outcomes and takes a forward looking perspective in outlining the alternatives to current structural adjustment policies Review quotes for **Structural Adjustment and the Environment** Should be essential reading for all students of development Third World Planning Review Breaks new ground in the debate on structural adjustment generally and in the environment development debate International Affairs The most substantial contribution to date to what is undoubtedly an important area Development and Change David Reed is director of the Macroeconomics for Sustainable Development Programme of WWF International and editor of **Structural Adjustment and the Environment** Earthscan 1992 Originally published in 1996 Structural Adjustment and Forest Resources Kiran D. Pandey, David Wheeler, 2001 Structural adjustment has not promoted domestic deforestation but it has increased net imports of wood products implying some displacement of pressure onto other countries forest resources Devaluations have significantly increased the exploitation of forest resources *Handbook of Environmental and Resource Economics* Jeroen C. J. M. Van den Bergh, 2002-01-01 This major reference book comprises specially commissioned surveys in environmental and resource economics written by an international team of experts Authoritative yet accessible each entry provides a state of the art summary of key areas that will be invaluable to researchers practitioners and advanced students

China in the New Millennium James A. Dorn, 1998 China is expected to become the world's largest economy in less than two decades Whether it does so will depend on continued growth of the non state sector and how well China adapts to global market forces The essays in this volume consider the state of China's economic reforms the institutional changes necessary for China to become a global economic power and the interplay between market

reforms and social development in China *Toward Environmentally Sustainable Development in Sub-Saharan Africa* ,1996
Includes statistics **The Puzzle of Latin American Economic Development** Patrice M. Franko,2007 Provides the basic economic tools for students to understand the problems in the countries of Latin America This third edition analyzes challenges to the neoliberal model of development and highlights macroeconomic changes in the region It explores the contradictions of growth and focuses on factors of competitiveness **Environmental Assessment in Developing and Transitional Countries** Norman Lee,Clive George,2013-06-10 Since the 1980s and especially since the Rio Earth Summit in 1992 there has been a substantial extension in the adoption and use of Environmental Assessment EA procedures in developing countries and countries in transition low and middle income countries However few existing texts in environmental assessment or development studies have reflected this trend sufficiently until this publication Divided into two main parts EA Principles Processes and Practice Country and Institutional Studies of EA Procedures and Practice This book explains the essentials of environmental impact association in the context of developing countries and assesses its importance to both developed and developing countries **Living with Environmental Change** W. Neil Adger,P. Mick Kelly,Nguyen Huu Ninh,2012-12-06 Vietnam and the neighbouring countries of Southeast Asia face diverse challenges created by the rapid evolution of their social economic and environmental systems and resources Taking a multidisciplinary perspective this book provides a comprehensive assessment of the Vietnamese situation identifying the factors shaping social vulnerability and resilience to environmental change and considering prospects for sustainable development **The Global Environmental Benefits of Land Degradation Control on Agricultural Land** Stefano Pagiola,1999-01-01 This book focuses on the global effects of land degradation but emphasizes other important levels of land degradation at the field level it may result in reduced productivity at the national level it may cause flooding and sedimentation and at the global level it can contribute to climate changes damaging bio diversity and international waters The effects on climate changes are explored and the report questions the extent to which land degradation on agricultural land affects climate change Does it increase emissions of greenhouse gases Does it affect land s capacity to serve as a carbon sink Can appropriate management enhance both land s productivity and its capacity to store carbon The carbon cycle in soils is analyzed indicating land degradation is likely to reduce the ability of soils to serve as carbon sink and release stored carbon into the atmosphere and bio diversity effects are likely to be adverse Global benefits of land degradation control include afforestation to allow increased carbon sequestration and provide adequate bio diversity habitats and community based wildlife management can provide alternatives to some marginal areas Although integrating global dimensions into land degradation control projects may reverse the field level or national problems it is causing difficulties and constraints will likely contribute to the failure of these projects Environment Bulletin ,1995
