Cataloging beyond the Notes: Annotating Bibliographic Records for Music Effectively in RDA Ralph Hartsock, Peter H. Lisius, 2022

In *Cataloging beyond the Notes: Annotating Bibliographic Records for Music Effectively in RDA* authors Ralph Hartsock and Peter Lisius present examples illustrating the effective use of notes in the description of music and this is especially important with RDA. Since RDA has increased granularity in the description of music whether in score recording video or data formats the expert direction offered in *Cataloging beyond the Notes* makes it a key reference for music cataloging. Bibliographic records are presented using MARC21. An essential resource for practicing music catalogers *Cataloging beyond the Notes* begins with a comprehensive introduction including instructions on how to use the book and presents examples of the granular data that informs users about specific details. In addition the examples are augmented by the authors commentary so that the result is expert guidance in a single highly accessible publication. More than that navigation to and from the newer RDA format is facilitated by an appendix keyed to specific RDA details. Frequently used and related terms are also covered in a glossary specific to this volume. Taken as a whole *Cataloging beyond the Notes* belongs in every music library and on each cataloger's desk.

The Social Psychology of Perceiving Others Accurately Judith A. Hall, Marianne Schmid Mast, Tessa V. West, 2016-04 This comprehensive overview presents cutting edge research on the fast expanding field of interpersonal perception.

Describing Music Materials Richard P. Smiraglia, 2016-11-14 This fourth edition was prepared in 2015/2016 as a supplementary text for a graduate music cataloging course. This edition is rewritten to a large extent to conform to the new instructions and paradigms represented in Resource Description and Access (RDA). RDA instructions for printed music, recorded music and music video are accompanied by advice, examples, illustrations and complete catalog records including versions in MARC21 format. Consistent with RDA the chapter on form and choice of access points found in earlier editions is gone, replaced with a chapter on authorized access points. The concept of uniform title has evolved into the concept of the preferred title as part of an authorized access point which might require manipulation and addition of some elements for disambiguation and collocation. Only three chapters are used for description of printed music, sound recordings and video recordings. Many of the older LP examples were removed as were VHS video recordings. Multimedia packages are now rare in the marketplace but streaming audio and video are quite evident so examples now include those media. Facsimile examples from the third edition have been retained and many new examples have been added. Most catalogers today are using RDA in combination with MARC21. Accordingly in an appendix we have rendered each example in MARC21 format using the OCLC Connexion approach to MARC21 record formatting. A lengthy bibliography in earlier editions has been replaced by a brief list in the introduction with pointers to online resources that are

both current and constantly updated by working catalogers
