Extrasensory Ecology: Parapsychology and Anthropology Joseph K. Long, 1977 Parapsychology Jane Henry, 2005
Beginning with an introduction to the methodology this book provides the reader with a sympathetic yet critical overview of current research into unexplained phenomena including visions telepathy psychokinesis and out of body experiences

Paranthropology: Anthropological Approaches to the Paranormal Edited by Jack Hunter, 2012-06-30 We are living in a complicated period in relation to our understanding of extraordinary phenomena Naive materialist approaches are more assertive than ever in anthropology and in the world more generally At the same time the taboos against admitting to the reality of the paranormal are weakening There is a growing body of writing which takes the paranormal and extraordinary seriously while bringing to it the same academic standards that any other subject matter would require This is a valuable and important development and it helps open the way to new modes of understanding in the sciences and social sciences that will not reject scientific rationality but expand that rationality so as to include more of the world of human experience The articles in this Paranthropology reader provide important clues and suggestions along with rigorous argument to help us in exploring what is likely to be a major area of anthropological engagement in coming years Dr Geoffrey Samuel Cardiff University Transpersonal Ecosophy, Vol. 1: Theory, Methods and Clinical Assessments Mark A. Schroll, 2016-01-24 The image on the cover of this book represents the idea that brain state alterations at sacred sites allow us to re experience memories that are woven into the morphogenetic fields of that place an idea that originates with Paul Devereux s empirical enquiry into dreams at sacred sites in Wales and England This books examines how this investigation provides us with a new way of understanding consciousness and a new direction toward a reconciliation of the divorce between matter and spirit We explore the work of David Lukoff and Stanislov and Christina Grof the connections between the varieties of transformative experience in dream studies ecopsychology transpersonal psychology and the anthropology of consciousness as well as the overlap between David Bohm s interpretation of quantum theory and Rupert Sheldrake s hypothesis of formative causation

The Parapsychology Revolution Robert M. Schoch, Logan Yonavjak, 2008-01-31 Grounded in both scientific acumen and constructive inquiry this anthology shines a rare clarifying light on the controversial realms of psychical and paranormal research surveying reports essays and arguments from more than a century of investigation into matters such as clairvoyance telepathy and past life regression In the past one hundred and twenty five years despite a relative paucity of funding and the troubling persistence of fraud serious inquiry into the paranormal particularly as it relates to clairvoyance and psychical perception has successfully entered the scientific age Studies in the modern laboratory employing rigorous methodology and peer reviewed oversight have conclusively detected statistical anomalies that suggest the presence of some not yet understood faculty of the human mind In *The Parapsychology Revolution* Robert M Schoch Ph D a scholar widely known for his geological theories that question the conventional dating of the Great Sphinx and researcher Logan Yonavjak

introduce and anthologize core writings that underscore the range and continuing challenges of psychical research The book's extensive introduction and the editors' commentary on individual essays and sections highlight milestones, feuds, and key players that mark the nascent history of this fascinating and important field of research Finally The Parapsychology Revolution addresses and clarifies the all important question Is there legitimate evidence for a world beyond the ordinary

Science, Reason, and Anthropology James Lett, 2000-01-01 For courses on anthropological theory history and methods Science Reason and Anthropology explores the philosophical foundations of anthropology and identifies the fundamental principles of rational inquiry upon which all sound anthropological knowledge is based As a field guide to critical thinking with examples throughout it is devoted to a thorough explication and analysis of the nature of reason and the practice of anthropological inquiry Chapter one reviews the historical context of the contemporary debate between scientific and humanistic perspectives in anthropology highlighting essential differences between the two approaches Chapter two examines the nature of knowledge and explains the essential elements of epistemological analysis Chapter three describes the basic features of the scientific method it defines science as an objective logical and systematic approach to propositional knowledge and explains each feature in detail Chapter four applies the fundamental principles of critical thinking to an analysis of contemporary anthropological theory Chapter five suggests a reconciliation between the scientific and humanistic approaches arguing that the essential elements of sound reasoning are common to both perspectives Science Reason and Anthropology argues forcefully for the preeminent value of the scientific approach in anthropology but it does so while recognizing the inherent worth and innate appeal of the humanistic perspective Even those who are not predisposed to share the author's conclusions will appreciate the clear and forthright manner with which he presents his arguments *The Routledge Companion to Ecstatic Experience in the Ancient World* Diana Stein, Sarah Kielt Costello, Karen Polinger Foster, 2021-12-31 For millennia people have universally engaged in ecstatic experience as an essential element in ritual practice spiritual belief and cultural identification This volume offers the first systematic investigation of its myriad roles and manifestations in the ancient Mediterranean and Near East The twenty nine contributors represent a broad range of scholarly disciplines seeking answers to fundamental questions regarding the patterns and commonalities of this vital aspect of the past How was the experience construed and by what means was it achieved Who was involved Where and when were rites carried out How was it reflected in pictorial arts and written records What was its relation to other components of the sociocultural compact In proposing responses the authors draw upon a wealth of original research in many fields generating new perspectives and thought provoking often surprising conclusions With their abundant cross cultural and cross temporal references the chapters mutually enrich each other and collectively deepen our understanding of ecstatic phenomena thousands of years ago Another noteworthy feature of the book is its illustrative content including commissioned reconstructions of ecstatic scenarios and pairings of works of Bronze Age and modern psychedelic art Scholars students and

other readers interested in antiquity comparative religion and the social and cognitive sciences will find much to explore in the fascinating realm of ecstatic experience in the ancient world

Real Magic Isaac Bonewits, 1989-01-15 From an occult scholar who is witty and possessed of a mind that peers around corners a fresh exploration of magic Publishers Weekly From one of the founders of the modern pagan movement comes an examination of psychic phenomena from ESP to Eastern ritual In this classic text for students and practitioners of occultism Isaac Bonewits explores the basic laws of magic relating them to the natural laws of the universe A book both scholarly and readable San Francisco Chronicle Groundbreaking and thought provoking this seminal work of magical theory was perhaps the first logical rigorously sensible look at magic PanGaia

African Divination Systems Philip M. Peek, 1991 This volume of finely crafted case studies is also the vehicle for an important general theory of divination this is a book overflowing with ideas that will powerfully stimulate further research Journal of Ritual Studies The essays in this collection provide a very useful overview of both the diversity of African divination systems and of recent approaches to their study Choice This unique collection of essays by an exceptional international group of Africanists demonstrates the central role that divination continues to play throughout Africa in maintaining cultural systems and in guiding human action African Divination Systems offers insights for current discussions in comparative epistemology cross cultural psychology cognition studies semiotics ethnoscience religious studies and anthropology

Religion, Supernaturalism, the Paranormal and Pseudoscience Homayun Sidky, 2019-11-30 Religion Supernaturalism the Paranormal and Pseudoscience provides a comprehensive rejoinder to the challenges posed to science scientific anthropology evolutionary theory and rationality by the advocates of supernatural paranormal and pseudoscientific perspectives and modes of thought associated with the current rise of irrationalism antiintellectualism and emboldened religious fundamentalism and violence Drawing upon H Sidky s scientific anthropological background and ethnographic field research of supernatural and paranormal beliefs and practices in several cultures over three decades the book answers several important questions Why do humans have a proclivity for the supernatural and paranormal thinking Why has humanity remained shackled to sets of ideas inherited from a violent past that have no basis in reality and which bestow an illusionary solace promote bloodshed endless cruelties and fervent hatreds and have come at a high cost Why have ancient superstitions been held as sacred inviolate truths while other aspects of the archaic belief systems of which they were a part have long been discarded Why have not humans outgrown religion and paranormal beliefs

Strange Dimensions Jack Hunter, 2015-07-20 It is from the paranormal s multifaceted nature that the title of this book takes its meaning Throughout its pages we encounter time and again talk of a wide variety of dimensions levels and layers from social cultural psychological and physiological dimensions to spiritual mythic narrative symbolic and experiential dimensions and onwards to other worlds planes of existence and realms of consciousness The paranormal is by its very nature multidimensional Once again Jack Hunter takes us down the proverbial rabbit hole here with the grace nuance and sheer intelligence of a gifted team of

essayists each working in her or his own way toward new theories of history consciousness spirit the imagination the parapsychological and the psychedelic Another clear sign that there is high hope in high strangeness and that we are entering a new era of thinking about religion about mind about us Jeffrey J Kripal author of *Authors of the Impossible The Paranormal and the Sacred* **Anomalistic Psychology** Leonard Zusne, Warren H. Jones, 2014-01-14 Updating and expanding the materials from the first edition *Anomalistic Psychology* Second Edition integrates and systematically treats phenomena of human consciousness and behaviors that appear to violate the laws of nature The authors present and detail a new explanatory concept they developed that provides a naturalistic interpretation for these phenomena *Magical Thinking* For undergraduate and graduate students and professionals in cognitive psychology research methods thinking and parapsychology *Miracles : 2 Volumes* Craig S. Olupona, 2014-02-14 What are African religions *African Religions A Very Short Introduction* answers this question by examining primarily indigenous religious traditions on the African continent as well as exploring Christianity and Islam It focuses on the diversity of ethnic groups languages cultures and worldviews emphasizing the continent s regional diversity Olupona examines a wide range of African religious traditions on their own terms and in their social cultural and political contexts For example the book moves beyond ethnographic descriptions and interpretations of core beliefs and practices to look at how African religion has engaged issues of socioeconomic development and power relations Olupona examines the

myths and sacred stories about the origins of the universe that define ethnic groups and national identities throughout Africa. He also discusses spiritual agents in the African cosmos such as God, spirits and ancestors. In addition to myths and deities, Olupona focuses on the people central to African religions including medicine men and women, rainmakers, witches, magicians and divine kings and how they serve as authority figures and intermediaries between the social world and the cosmic realm. *African Religions: A Very Short Introduction* discusses a wide variety of religious practices including music and dance, calendrical rituals and festivals, celebrations for the gods' birthdays and rituals accompanying stages of life such as birth, puberty, marriage, elderhood and death. In addition to exploring indigenous religions, Olupona examines the ways Islam and Christianity as outside traditions encountered indigenous African religion. He shows how these incoming faith traditions altered the face and the future of indigenous African religions as well as how indigenous religions shaped two world religions in Africa and the diaspora. Olupona draws on archaeological and historical sources as well as ethnographic materials based on fieldwork. He shows that African religions are not static traditions but have responded to changes within their local communities and to fluxes caused by outside influences and spread with diaspora and migration. [Mathematics Elsewhere](#)

Marcia Ascher, 2018-06-05. *Mathematics Elsewhere* is a fascinating and important contribution to a global view of mathematics. Presenting mathematical ideas of peoples from a variety of small scale and traditional cultures, it humanizes our view of mathematics and expands our conception of what is mathematical. Through engaging examples of how particular societies structure time, reach decisions about the future, make models and maps, systematize relationships and create intriguing figures, Marcia Ascher demonstrates that traditional cultures have mathematical ideas that are far more substantial and sophisticated than is generally acknowledged. Malagasy divination rituals, for example, rely on complex algebraic algorithms. And some cultures use calendars far more abstract and elegant than our own. Ascher also shows that certain concepts assumed to be universal, that time is a single progression, for instance, or that equality is a static relationship, are not. The Basque notion of equivalence, for example, is a dynamic and temporal one not adequately captured by the familiar equal sign. Other ideas taken to be the exclusive province of professionally trained Western mathematicians are in fact shared by people in many societies. The ideas discussed come from geographically varied cultures including the Borana and Malagasy of Africa, the Tongans and Marshall Islanders of Oceania, the Tamil of South India, the Basques of Western Europe and the Balinese and Kodi of Indonesia. This book belongs on the shelves of mathematicians, math students and math educators and in the hands of anyone interested in traditional societies or how people think. Illustrating how mathematical ideas play a vital role in diverse human endeavors, from navigation to social interaction to religion, it offers through the vehicle of mathematics unique cultural encounters to any reader. **Mediumship and Survival** W. W. Baggally, 2012-08-31

Whether or not we survive physical death is one of humanity's most fundamental concerns. Here Dr. Gauld draws on a century of evidence: mediumship, reincarnation, obsession, possession, hauntings and apparitions all seem to indicate survival. This is a

compulsively readable assessment of evidence for and against survival and an excellent introduction to the field of psychical research The Paranormal the new ebook series from F W Media International Ltd resurrecting rare titles classic publications and out of print texts as well as new ebook titles on the supernatural other worldly books for the digital age The series includes a range of paranormal subjects from angels fairies and UFOs to near death experiences vampires ghosts and witchcraft

Fantasies of the Master Race Ward Churchill,1998 Chosen an Outstanding Book on the Subject of Human Rights in the United States by the Gustavus Myers Center for the Study of Human Rights In this volume of incisive essays Ward Churchill looks at representations of American Indians in literature and film delineating a history of cultural propaganda that has served to support the continued colonization of Native America During each phase of the genocide of American Indians the media has played a critical role in creating easily digestible stereotypes of Indians for popular consumption Literature about Indians was first written and published in order to provoke and sanctify warfare against them Later the focus changed to enlisting public support for civilizing the savages stripping them of their culture and assimilating them into the dominant society Now in the final stages of cultural genocide it is the appropriation and stereotyping of Native culture that establishes control over knowledge and truth The primary means by which this is accomplished is through the powerful publishing and film industries Whether they are the tragically doomed noble savages walking into the sunset of Dances With Wolves or Carlos Castaneda s Don Juan the exotic mythical Indians constitute no threat to the established order Literature and art crafted by the dominant culture are an insidious political force disinforming people who might otherwise develop a clearer understanding of indigenous struggles for justice and freedom This book is offered to counter that deception and to move people to take action on issues confronting American Indians today
