Writing In InDesign CC 2014 Producing Books David Bergsland, 2014-06-18 This is a major update for me The ePUB production techniques have

changed quite a bit both for fixed layout and for reflowable ePUBs Many of the changes I've been waiting for with ePUB production have been implemented InDesign now stands at the top of the heap for book production in general and ePUB production in particular You do not need to know code though understanding how HTML and CSS works will aid your conceptual understanding I was lukewarm about FXL until I realized that the new fixed layout ePUBs would show gradient paragraph rules gradient strokes and fills in tables and much more The only major things we're missing are justification and hyperlinked text does not work in FXL The exported ePUBs upload flawlessly to the iBooks Store and Kobo Writing Life Finally the 21st century book publishing software we need is within our grasp There's still more to come but this version is very good

TeX, XML, and Digital Typography Apostolos Syropoulos, Karl Berry, Yannis Haralambous, Baden Hughes, Steven Peter, John Plaice, 2004-11-12 This volume contains the papers that were accepted for presentation at the International Conference on T_X XML and Digital Typography jointly held with E_T the 25th Annual Meeting of the T_X Users Group in Xanthi Greece in the summer of 2004 The term Digital Typography refers to the preparation of printed matter using only electronic computers and electronic printing devices such as laser jet printers The document preparation process involves mainly the use of a digital typesetting system as well as data representation technologies T_X and E_T its offspring are beyond doubt the most successful current digital typesetters while XML is the standard for text-based data representation for both business and scientific activities All papers appearing in this volume were fully refereed by the members of the program committee The papers were carefully selected to reflect the research work that is being done in the field of digital typography using T_X and/or its E_T offspring The problems for which comprehensive solutions have been proposed include proper multilingual document preparation and XML document processing and generation The proposed solutions deal not simply with typesetting issues but also related issues in document preparation such as the manipulation of complex

bibliographic databases and automatic conversion of text expressed in one grammatical system to a more recent one as for the Greek language converting between monotonic Greek and polytonic Greek The conference is being graciously hosted by the Democritus University of Thrace in Xanthi and by the Greek T X Friends We wish to thank Basil K
