Philip Hallie, 2001-07-10 Eleven accessible tales explore the ethical motives of three real life heroes The Passive Eye

Branka Arsić, 2003 The Passive Eye is a revolutionary and historically rich account of Berkeley's theory of vision In this formidable work the author considers the theory of the embodied subject and its passions in light of a highly dynamic conception of infinity Arsić shows the profound affinities between Berkeley and Spinoza and offers a highly textual reading of Berkeley on the concept of an exhausted subjectivity The author begins by following the Renaissance universe of vision particularly the paradoxical elusive nature of mirrors then shows how this conception of vision was translated into the optical devices and in what way the various ways of deception could be conceived Reading Berkeley against the backdrop of competing theories in relation to Leibniz Spinoza Newton Malebranche Hume Locke Molyneux and others this book gives a meticulous historic reconstruction of Berkeley's theory This excellent scholarly work presents Berkeley's theory in a new and radical light The book presented in three parts begins by presenting the conceptions of vision prior to Berkeley's intervention In the second part the author moves through a careful study of Descartes theory of vision to arrive at Berkeley The third part addresses the author's version of Berkeley in which the eye and the image become inseparable due to the collapse of the universe of representation The problem of vision becomes not that of representation but of presentation Through an erudite historic reading of Berkeley's theory and astute comparative assessments the author uncovers Berkeley's place as a contemporary theoretician corresponding with such thinkers as Deleuze Lacan Foucault and Derrida

Fike,2013-10-08

The One Mind C G Jung and the Future of Literary Criticism explores the implications of C G Jung s unus mundus by applying his writings on the metaphysical the paranormal and the quantum to literature As Jung knew everything is connected because of its participation in universal consciousness which encompasses all that is including the collective unconscious Matthew A Fike argues that this principle of unity enables an approach in which psychic functioning is both a subject and a means of discovery psi phenomena evoke the connections among the physical world the psyche and the spiritual realm Applying the tools of Jungian literary criticism in new ways by expanding their scope and methodology Fike discusses the works of Hawthorne Milton Shakespeare Wordsworth and lesser known writers in terms of issues from psychology parapsychology and physics Topics include the case for monism over materialism altered states of consciousness types of psychic functioning UFOs synchronicity and space time relativity The One Mind examines Goodman Brown s dream Adam s vision in Paradise Lost the dream sequence in The Wanderer the role of metaphor in Robert A Monroe s metaphysical trilogy Orfeo Angelucci s work on UFOs and the stolen boat episode in Wordsworth s The Prelude The book concludes with case studies on Robert Jordan and William Blake Considered together these readings bring us a significant step closer to a unity of psychology science and spirituality The One Mind illustrates how Jung s writings contain the seeds of the future of literary criticism Reaching beyond archetypal criticism and postmodern theoretical approaches to Jung Fike proposes a new school of Jungian literary criticism based on the unitary world that underpins the collective unconscious This book will appeal to scholars of C G Jung as well as students and readers with an interest in psychoanalysis literature literary theory and the history of ideas The Eye of Dread Payne Erskine,2019-09-25

Reproduction of the original The Eye of Dread by Payne Erskine The Eye of the Lynx David Freedberg,2003-08-01 Some years ago David Freedberg opened a dusty cupboard at Windsor Castle and discovered hundreds of vividly colored masterfully precise drawings of all sorts of plants and animals from the Old and New Worlds Coming upon thousands more drawings like them across Europe Freedberg finally traced them all back to a little known scientific organization from seventeenth century Italy called the Academy of Linceans or Lynxes Founded by Prince Federico Cesi in 1603 the Linceans took as their task nothing less than the documentation and classification of all of nature in pictorial form In this first book length study of the Linceans to appear in English Freedberg focuses especially on their unprecedented use of drawings based on microscopic observation and other new techniques of

visualization Where previous thinkers had classified objects based mainly on similarities of external appearance the Linneans instead turned increasingly to sectioning dissection and observation of internal structures They applied their new research techniques to an incredible variety of subjects from the objects in the heavens studied by their most famous and infamous member Galileo Galilei whom they supported at the most critical moments of his career to the flora and fauna of Mexico bees fossils and the reproduction of plants and fungi But by demonstrating the inadequacy of surface structures for ordering the world the Linneans unwittingly planted the seeds for the demise of their own favorite method visual description as a mode of scientific classification Profusely illustrated and engagingly written *Eye of the Lynx* uncovers a crucial episode in the development of visual representation and natural history And perhaps as important it offers readers a dazzling array of early modern drawings from magnificently depicted birds and flowers to frogs in amber monstrously misshapen citrus fruits and more

**Eye of the Needle** Craig Downey, 2015-05-27 I have been to the peak of achievement both physically and mentally and have fallen to the depths of despair entangled in the darker side of life deep within oneself I write of very real solutions to find a more profound connection with the world around and overcome the mundane which is so common in a routine predictable world we can find ourselves in I have suffered very real problems and on more than one occasion have found myself in circumstances where in most cases there is little chance of getting back to not only a normal way of life but to a way of life where I could really achieve and have a productive and fulfilling life There are few positives that can be drawn from the agony of mental illness other than those that are procured from the challenge of the experience When you experience such a condition you are open to wider range of thoughts and see visit areas of the mind that many of us would never know in our everyday lives If you are strong inside and maintain a belief in yourself it is possible to articulate these thoughts and feelings and present them to others so they can not only benefit from avoiding the traps and pitfalls that lead us to lose control of our lives but to benefit from the insight I have gained in fighting all the way back from the deepest darkest recesses of the mind What fundamentally we need most of all in life is what I term a touch of magic to provide some hope for love in the harshness ultimately of the world in which we live This translates to religion usually in a wider sense but I have found the road for individuals to take this path after much soul searching I guarantee successful application in nearly all areas and I assure you I am a compassionate believer in the material although take heed all things should be taken in measure and you should develop your own understanding
