Tactical bombing Gen Jimmy Doolittle reportedly observed is breaking the milk bottle Strategic bombing is killing the cow Most nations have historically chosen between building tactical and strategic air forces rarely has a state given equal weight to both The advantages of tactical air power are obvious today as small wars and petty tyrants bedevil us but in a Cold War world split between continental superpowers strategic bombing took precedence with calamitous consequences In the 1960s the U S Air Force lacked the equipment and properly trained pilots to assure air superiority because the Tactical Air Command TAC had become little more than a handmaiden to the Strategic Air Command SAC TAC focused primarily on the interdiction of enemy bombers and virtually ignored its other responsibilities Its aircraft were designed to shoot at large lumbering bombers and not to engage in dog fights with highly maneuverable MiGs Hannah shows how a tactical air force that won a victory in World War II deteriorated into a second rate force flying aging aircraft during the early years of the Cold War recovered briefly over Korea then slid into obsolescence during the 1950s His explanation of why America s fighter aircraft did not work in Vietnam is instructive and unsettling Hannah explains how TAC struggled through the war in Vietnam to emerge in the 1970s as the best tactical air force in the world He side steps politics and inter service rivalries to focus on the nuts and bolts of tactical air power The result is a factual informative account of how an air force first loses its way then finds its mission again Torrejón during The Cold War Manuel Carazo,José C. **Digest** ,1960 **Through the Glass Ceiling to the Stars** Eileen M. Collins,Jonathan H. Ward,2021-10-19 The long awaited memoir of a trailblazer and role model who is telling her story for the first time Eileen Collins was an aviation pioneer her entire career from her crowning achievements as the first woman to command an American space mission as

well as the first to pilot the space shuttle to her early years as one of the Air Force's first female pilots. She was in the first class of women to earn pilot's wings at Vance Air Force Base and was their first female instructor pilot. She was only the second woman pilot admitted to the Air Force's elite Test Pilot Program at Edwards Air Force Base. NASA had such confidence in her skills as a leader and pilot that she was entrusted to command the first shuttle mission after the Columbia disaster, returning the US to spaceflight after a two-year hiatus. Since retiring from the Air Force and NASA, she has served on numerous corporate boards and is an inspirational speaker about space exploration and leadership. Eileen Collins is among the most recognized and admired women in the world, yet this is the first time she has told her story in a book. It is a story not only of achievement and overcoming obstacles but of profound personal transformation. The shy, quiet child of an alcoholic father and struggling single mother who grew up in modest circumstances and was an unremarkable student, she had few prospects when she graduated from high school but she changed her life to pursue her secret dream of becoming an astronaut. She shares her leadership and life lessons throughout the book with the aim of inspiring and passing on her legacy to a new generation.
