Vietnam by its original carrier based versions began its legend This title examines the unique aspects of the Phantom that made it so crucial to US Navy pilots during the Vietnam War its massive engine power long range speed the most powerful airborne search and fire control radar installed in a fighter at the time and of course its versatility as a ground attack and air to air platform Packed with first hand accounts unique profile artwork and rare photographs this is the history of one of the most important aircraft to be stationed on carriers off Southeast Asia during the war MiG-17 and MiG-19 Units of the Vietnam War István Toperczer,2012-11-20 A detailed history of the MiG 17 and MiG 19 units of the Vietnamese People s Air Force packed with first hand accounts and colour profiles The erstwhile enemy of the USAF and US Navy during the nine years of American involvement in the Vietnam War the Vietnamese Peoples Air Force VPAF quickly grew from an ill organised rabble of poorly trained pilots flying antiquated communist aircraft into a highly effective fighting force that more than held its own over the skies of North Vietnam As this book explores flying Soviet fighters like the MiG 17 and 19 the VPAF produced over a dozen aces whilst the Americans managed just two pilots and three navigators in the same period

F-8 Crusader Peter E. Davies,2023-07-20 With specially commissioned artworks and dynamic combat ribbon diagrams this volume reveals how the last of the gunfighters as the F 8 was dubbed by its pilots prevailed against the growing MiG threat of the Vietnamese People s Air Force When the Vietnam War began the F 8 was already firmly established as a fighter and reconnaissance aircraft It entered combat as an escort for Alpha strike packages braving the anti aircraft artillery and surface to air missiles alongside the A 4 Skyhawk bombers and meeting MiGs for the first time on 3 April 1965 Although the Crusader was nicknamed last of the gunfighters its pilots employed secondary AIM 9D Sidewinder missiles in all but one of their MiG kills with guns also used as back up in three Its 20 mm guns were unreliable as they often jammed during strenuous manoeuvres although they were responsible for damaging a number of MiGs However in combat the F 8 had the highest exchange ratio kills divided by losses at six to one of any US combat aircraft involved in the Vietnam War Through the copious use of first hand accounts highly detailed battlescene artwork combat ribbon diagrams and armament views Osprey s Vietnam air war specialist Peter E Davies charts the successful career of the F 8 Crusader over Vietnam

International Security in the Asia-Pacific Alan Chong,2017-09-13 This volume argues that international security in the Asia Pacific lends itself to contradictory analyses of centrifugal and centripetal trends Transitional polycentrism is intrinsically awkward as a description of the security of states and their populations it implies the loosening of state control

and the emergence of newly asserted authority by mixed constellations of intergovernmental organizations and non state actors It implies a competition of agendas threats to the integrity of borders and human security threats such as natural disasters airliner crashes and displacement by man made pollution and food scarcity Conversely polycentrism could also imply a return to a more neo realist oriented international order where great powers ignore ASEAN and steer regional order according to their perceived interests and relative military superiority This book embraces these contradictory trends as a foundation of analysis and accepts that disorder can also be re described from the perspective of studied detachment as polycentric order

Davies,2018-05-31 Although the F 4 Phantom II was the most important fighter bomber to see action with all three American services during the Vietnam War it was essentially a U S Navy design and the carrier borne squadron crews were its main operators in combat The aircraft pioneered the use of long range radar guided missiles in combat although the majority of its Vietnam missions involved ground attack with a variety of innovative ordnance From 1968 to 1973 the Phantom II was the standard U S Navy fighter in Southeast Asia having replaced several other types Its

performance and versatility enabled it to perform a variety of different missions and switch roles as necessary in the assault on some of the world's most heavily defended territory. Including detailed colour profiles and first person commentary from active participants in the F-4's naval combat history, this is a detailed study of the US armed services' most famous post-war fighter.

MiG-17/19 Aces of the Vietnam War István Toperczer, 2016-10-20 At the beginning of the Vietnam War the Vietnam People's Air Force (VPAF) were equipped with slow old Korean War generation fighters: a combination of MiG-17s and MiG-19s, types that should have offered little opposition to the cutting edge fighter bombers such as the F-4 Phantom II, F-105 Thunderchief and the F-8 Crusader. Yet when the USAF and US Navy unleashed their aircraft on North Vietnam in 1965, the inexperienced pilots of the VPAF were able to shatter the illusion of US air superiority. Taking advantage of their jets' unequalled low speed maneuverability, small size and powerful cannon armament, they were able to take the fight to their missile-guided opponents, with a number of Vietnamese pilots racking up ace scores. Packed with information previously unavailable in the west and only recently released from archives in Vietnam, this is the first major analysis of the exploits of Vietnamese pilots in the David and Goliath contest with the US over the skies of Vietnam.

Tactical Air Power and the Vietnam War Phil Haun, 2024-01-18 A theory of tactical air power explaining US air power effectiveness in Vietnam and the modern air wars that followed.

US Navy F-4 Phantom II MiG Killers 1965-70 Brad Elward, Peter E. Davies, 2012-11-20 For every American fighter pilot involved in the Vietnam War, the ultimate goal was to kill a MiG. In eight years of conflict, 43 Vietnamese People's Air Force aircraft were claimed by US Navy and US Marine Corps Phantom II crews, and one single ace crew produced. Navy Phantom IIs scored the first kills of the Vietnam War in April 1965, as well as scoring the last in January 1973. Featuring photographs as well as stunning aircraft profiles, this volume charts the successes of the Navy fighter crews as they encountered MiGs, missiles and AAA over the jungles of North Vietnam.
