Fabric Of Gender:

Textiles and Gender in Antiquity Mary Harlow, Cecile Michel, Louise Quillien, 2020-11-12 This volume looks at how the issues of textiles and gender intertwine across three millennia in antiquity and examines continuities and differences across time and space with surprising resonances for the modern world The interplay of gender identity textile production and use is notable on many levels from the question of who was involved in the transformation of raw materials into fabric at one end to the wearing of garments and the construction of identity at the other Textile production has often been considered to follow a linear trajectory from a domestic female activity to a more commercial or industrial male centred mode of production In reality many modes of production co existed and the making of textiles is not so easily grafted onto the labour of one sex or the other Similarly textiles once transformed into garments are often of unisex shape but worn to express the gender of the wearer As shown by the detailed textual source material and the rich illustrations in this volume dress and gender are intimately linked in the visual and written records of antiquity The contributors show how it is common practice in both art and literature not only to use particular garments to characterize one sex or the other but also to undermine characterizations by suggesting that they display features usually associated with the opposite gender *Crossdressing in Context, Vol. 1 Dress & Gender* Gregory G.
