Digital International Relations Corneliu Bjola, Markus Kornprobst, 2023-11-03 This book analyses how digital transformation disrupts established patterns of world politics moving International Relations IR increasingly towards Digital International Relations This volume examines technological agential and ordering processes that explain this fundamental change The contributors trace how digital disruption changes the international world we live in ranging from security to economics from human rights advocacy to deep fakes and from diplomacy to international law The book makes two sets of contributions First it shows that the ongoing digital revolution profoundly changes every major dimension of international politics Second focusing on the interplay of technology agency and order it provides a framework

for explaining these changes The book also provides a map for adjusting the study of international politics to studying International Relations making a case for upgrading augmenting and rewiring the discipline Theory follows practice in International Relations but if the discipline wants to be able to meaningfully analyse the present and come up with plausible scenarios for the future it must not lag too far behind major transformations of the world that it studies This book facilitates that theoretical journey This book will be of much interest to students of cyber politics politics and technology and International Relations

International Norms, Moral Psychology, and Neuroscience Richard Price, Kathryn Sikkink, 2021-08-19 Research on international norms has yet to answer satisfactorily some of our own most important questions about the origins of norms and the conditions under which some norms win out over others The authors argue that international relations IR theorists should engage more with research in moral psychology and neuroscience to advance theories of norm emergence and resonance This Element first provides an overview of six areas of research in neuroscience and moral psychology that hold particular promise for norms theorists and international relations theory more generally It next surveys existing literature in IR to see how literature from moral psychology is already being put to use and then recommends a research agenda for norms researchers engaging with this literature The authors do not believe that this exchange should be a one way street however and they discuss various ways in which the IR literature on norms may be of interest and of use to moral psychologists and of use to advocacy communities
