Ecology Meaning And Religion:

Ecology, Meaning, and Religion Roy A. Rappaport, 1979 Two enterprises have proceeded in anthropology since its earliest days One objective in its aspirations and inspired by biological disciplines seeks explanation and is concerned to discover laws and causes The other subjective in its orientation and influenced by philosophy linguistics and the humanities attempts interpretation and seeks to elucidate meanings I take any radical separation of the two to be misguided for the relationship between them with all of its difficulty ambiguity and tension is a reflection of or metaphor for the condition of a species that lives in terms of meanings in a physical world devoid of intrinsic meaning but subject to causal law The concept of adaptation when applied to human society must take account of meaning as well as cause and of the complex dynamic of their relationship from the book *Liberating Rites* Tom F. Intelligent Design and Religion as a Natural Phenomenon John S. Wilkins, 2017-03-02 Over the past decade a strident public debate has arisen about the nature and origin of religions. Controversies include how exactly religion evolved, whether by individual or group selection, if it is adaptive and if not, whether and how it is a side effect of evolution. This volume focuses on the issue of naturalizing religion, on the ways in which cognitive science and social sciences have treated religion as a natural phenomenon. It questions whether religious behaviour, institutions, and experiences can be explained in natural terms. The editor brings together some of the best published work on the definition of religion, intelligent design, and the evolution of religion.

New Approaches to the Study of Religion Peter Antes, Armin W. Geertz, Randi Ruth Warne, 2004

Radical Interpretation in Religion Nancy Frankenberry, 2002-09-19 Publisher Description

Historicizing "Tradition" in the Study of Religion Steven Engler, Gregory Price Grieve, 2012-02-13 This collection of essays analyzes tradition as a category in the historical and comparative study of religion. The book questions the common assumption that tradition is simply the passing down or imitation of prior practices and discourses. It begins from the premise that many traditions are at least in part social fabrications, often deliberately serving particular ideological ends. Individual chapters examine a wide variety of historical periods and religions: Congolese, Buddhist, Christian, Confucian, Cree, Esoteric Hawaiian, Hindu, Islamic, Jewish, New Religious Movement, and Shinto. Different sections of the book consider tradition's relation to three sets of issues: legitimation and authority, agency and identity, modernity and the West.

Being Religious Mladen Turk, 2013-07-12 What makes us religious? What is religion? This book presents relevant research and theoretical proposals for evolutionary theories of religion and socially and ecologically adaptive theories of religion. Most attempts to study religious behaviors through evolutionary biology and related disciplines are still very fragmentary. Mladen Turk brings those theoretical approaches in dialogue with religious studies and theology through interpretation and critique that centers on revealing hidden theological assumptions and interpreting theoretical leaps of those approaches to religion. In *Being Religious*, Turk expounds understanding of religion as a complex interplay of various capacities arising from and influencing our biological and cultural makeup. Our religious behaviors can influence our relationship towards each other and towards our environment in significant ways. He shows how some aspects of complex religious behaviors can be understood better in

light of human cognition and evolutionary biology At the same time he interprets this knowledge as being preliminary and at times inadequate in its claims of completeness and exhaustiveness because religious behaviors are niched within other religious behaviors and dependent on factors that various mono causal theoretical approaches cannot fully conceptualize
