The pollination of cultivated plants: A compendium for practitioners Food and Agriculture Organization of the United Nations, 2018-10-15 More than twenty years ago the Food and Agriculture Organization of the United Nations contributed to the growing recognition of the role of pollination in agricultural production with the publication of The Pollination of Cultivated Plants in the Tropics Since that time the appreciation of pollinators has grown alongside the realization that we stand to lose them But our knowledge and understanding of crop pollination pollinator biology and best management practices has also expanded over this time This volume is the first of two compendiums for practitioners sharing expert knowledge on all dimensions of crop pollination in both temperate and tropical zones The focus in this first volume is on applied crop and system specific pollination

**Mycorrhizal Fungi in South America** Mónica A. Lugo, Marcela C. Pagano, 2022-10-27 In order to feed the world global agriculture will have to double food production by 2050 As a result the use of soils with fertilizers and pesticides in agronomic ecosystems will increase taking into account the sustainability of these systems and also the provision of food security Thus soil ecosystems their health and their quality are directly involved in sustainable agronomical practices and it is important to recognize the important role of soil microbial communities such as mycorrhizal fungi their biodiversity interactions and functioning Soil ecosystems are under the threat of biodiversity loss due to an increase of cultivated areas and agronomic exploitation intensity Also changes in land use alter the structure and function of ecosystems where biodiversity is vital in the ecosystem Soils are a major aid in food production in all terrestrial ecosystems however this means they are also involved in gas emission and global warming Thus in agronomic ecosystems several mitigation practices have been proposed to promote the increase of carbon soil stock and the reduction of warming gas emission from soils In South America most of the rural population depends economically on agriculture and usually works in family units New organic safe and sustainable agro forestry practices must be applied to support local communities and countries to achieve hunger eradication rural poverty reduction and sustainable development This book compiles new information for mycorrhizal occurrence in natural and anthropic environments in South America It includes new reports of mycorrhizal fungi diversity

along different mycorrhizal types and their effect on plant communities plant invasions the use of mycorrhizal fungi for ecological and sustainable studies management programs of natural and agroecosystems and forestry and food secure production This book fills the gaps in biodiversity knowledge management and safe food production of mycorrhizas It should be a valuable help to researchers professors and students to aid in use of mycorrhizal fungi while also focusing on their biodiversity sustainable safe food production and conservation perspectives     *Rooted in Culture* Barrett Williams, ChatGPT, 2025-03-01
