Economic Gang Rape T. H. Wang, 2001-09-01

The Oxford Handbook of the Economics of Prostitution Scott

Cunningham, Manisha Shah, 2016 Prostitution bears the unique title of being both the world's oldest profession and one of the least understood occupations. Unlike most of the crime and family literature, prostitution appears to have all the features of traditional markets: prices, supply and demand, considerations of variety in the organizational structure, and policy relevance. Despite this, economists have largely ignored prostitution in their research and writings. This has been changing, however, over the last twenty years as greater access to data has enabled economists to build better theories and gain a better understanding of the organization of the sex market. The Oxford Handbook of the Economics of Prostitution fills the gap in our understanding. It brings together many of the top researchers in the field who explain how the prostitution markets are organized across space and time, the role of technology in shaping labor supply and demand, the intersection of prostitution with trafficking, and the optimal use of law enforcement. What makes the material unique is its explicit focus on economics as the primary methodology for organizing our understanding of prostitution. The Handbook brings to scholars' attention, for the first time, a collection of original writings on prostitution that provides an overview of what is known and what is not known in this area. Researchers with an interest in underground markets, labor economics, risky behaviors, marriage, and gender will find the book's contents illuminating and path-breaking.

Economic Woman Frances Raday, 2019-05-14

The author introduces the concept of economic woman and makes her visible in duality with and opposition to the exclusive model of economic man. Economic man has epitomized neo-liberal capitalism, which embraces competition and maximization of profit, resulting in a steep increase in economic inequality. The book demonstrates that women's inequality is a crucial factor in economic inequality, which cannot be fully understood without relating to women's situation, and that economic woman cannot thrive in the conditions of economic inequality created under global neo-liberalism. Emphasising the international human rights guarantees of women's right to equality in all fields of life, the author documents women's increased participation in political, public, financial, and corporate institutions, employment, and entrepreneurship, with some women reaching high-profile positions. Nevertheless, using global data, she reveals that economic woman lags behind with a severe economic power deficit, an unfulfilled promise of equal employment opportunity, a gendered impact of poverty, and barriers to gender equality in the family. The book analyses the trap of women's increased burden of breadwinning in the context of discriminatory laws and practices, infrastructural failures, and policy gaps which preempt achievement of gender equality in economic life. The book is intended for the general reader, academics, students, policy makers, and NGOs. It shows economic woman at a global crossroads between a universal paradigm of gender equality and pervasive barriers to equal economic opportunity. The author demonstrates that tackling gender inequality, restoring welfare priorities, and reducing economic inequality are inextricably linked. Human rights and governments have a vital role to play in addressing them all to create a
