Economic Commentaries:

The Relationship of Prices to Economic Stability and Growth, Commentaries United States. Congress. Economic Joint Committee,1958 *Economic Commentaries* Sir Dennis Holme Robertson,1956 **Economic Commentaries** Dennis H. Robertson,1981-05-01 **Economics** David A. Dieterle,2017-03-27 A comprehensive four volume resource that explains more than 800 topics within the foundations of economics macroeconomics microeconomics and global economics all presented in an easy to read format As the global economy becomes increasingly complex interconnected and therefore relevant to each individual in every country it becomes more important to be economically literate to gain an understanding of how things work beyond the microcosm of the economic needs of a single individual or family unit This expansive reference set serves to establish basic economic literacy of students and researchers providing more than 800 objective and factually driven entries on all the major themes and topics in economics Written by leading scholars and practitioners the set provides readers with a framework for understanding economics as mentioned and debated in the public forum and media Each of the volumes includes coverage of important events throughout economic history biographies of the major economists who have shaped the world of economics and highlights of the legislative acts that have shaped the U S economy throughout history The extensive explanations of major economic concepts combined with selected key historical primary source documents and a glossary will endow readers with a fuller comprehension of our economic world **OECD Economic Surveys: Sweden 2017** OECD,2017-02-08 This 2017 OECD Economic Survey of Sweden examines recent economic developments policies and prospects The special chapters cover income inequality and gender inequality *Economic Commentaries* Dennis H. Robertson,1956 **Brookings Papers on Economic Activity: Fall 2021** Janice Eberly,James H. Stock,2022-06-07 The Brookings Papers on Economic Activity BPEA is a semi annual academic conference and journal that pairs rigorous research with real time policy analysis to address the most urgent economic challenges of the day Working drafts of the papers are presented at the conference typically held twice each year The final papers and discussant remarks from each conference are subsequently published in the journal several months later POPP VONA MARIN and CHEN on The Employment Impact of a Green Fiscal Push Evidence from the American Recovery and Reinvestment Act BUCKMAN CHOI DALY and SEITELMAN on The Economic Gains from Equity CHERRY JIANG MATVOS PISKORSKI and SERU on Government and Private Household Debt Relief during COVID 19 RENNERT PREST PIZER NEWELL ANTHOFF KINGDON RENNELS COOKE RAFTERY EV KOV and ERRICKSON on The Social Cost of Carbon Advances in Long Term Probabilistic Projections of Population GDP Emissions and Discount Rates REIS on Losing the Inflation Anchor AUTOR DORN and HANSON on On the Persistence of the China Shock **New Challenges in Economic Policy, Business, and Management** Anna Ujwary-Gil,Marta Gancarczyk,2020-01-01 The first part of this volume broadens the understanding of contemporary industrial policy in local regional national and international contexts The chapter by Wojnicka Sycz 2020 undertakes one of

the most important challenges in RIS3 i.e. the evaluation of the impact of regional SS industries on the development of Polish regions Based on the spatial panel models for 2012–2017 she reveals the positive impact of SS industries employment dynamics on regional GDP per capita The chapter responds to the research gap in a direct measurement of how SS areas affect regional development The results provide the rationale for policy makers to pursue these strategies further The chapter contributes to regional New Industrial Policy by proving the efficiency of SS in strengthening regional performance Factors and barriers to the development of smart mobility in medium-sized Polish cities are the focus of the chapter by Kachniewska 2020 The author applies a comprehensive set of methods to tackle this issue and identifies the conditions for smart mobility drawing primarily on expert opinions The results enable a natural generalization of the identified determinants to the similar context of Polish towns the more important that the research on medium cities is much rarer than studies on metropolises This contribution belongs to the research streams of city governance and databased services which are closely connected to and dependent on industrial digital transformation Moreover smart mobility addresses the objective of environmental protection one of the crucial targets of NIP Godlewska Dziobo 2020 performs international comparisons between Central and Eastern European Countries in 2020–2018 Particularly she focuses on the sectoral transformation of the employment structure in these countries Besides the important observations of spatial dynamics in sectoral structures the chapter points to the increased importance of services relative to manufacturing in contemporary structural transformations Thus it justifies the expanded scope of New Industrial Policy that encompasses not only industry recently refreshed with 4.0 Revolution but also services particularly the digital ones The chapter by Czech 2020 identifies the impact of global debt on the national amounts outstanding of credit default swap contracts CDS in nonfinancial institutions She finds the dynamics of the CDS notional amounts outstanding in response to global household indebtedness and total non financial sector indebtedness in domestic banks This contribution brings valuable practical insights about the core and dynamics of CDS and their usefulness in alleviating risks in international exchange We find this input particularly relevant for industries and enterprises operating in global value chains Widera 2020 performs a spatial analysis of the induced population potential of the communes in the Opolska region in 2000 and 2018 The econometric analysis revealed both the own potential of the communes and the interactions with neighboring communes to develop this potential These findings are important to theorize about the bottom level sources of territorial units potential both internal and those stemming from spatial interactions We find these conclusions relevant to understand local level origins of regional transformations as well as interdependencies among local territorial units The next two parts of this volume present micro level and bottomup contexts for industrial policy Particularly these are the insights from management and business research and from the research on governing various stakeholder interests and networks In the second part based on management and business theory and empirical evidence the authors discuss human resource and technological challenges faced by the contemporary industry

Potoczek 2020 performs a bibliometric research to recognize the advancement of the process approach in organizations. She finds the research on process improvement as emerging. The major research community in that area belongs to the IT field while management researchers are still a minor group. The author recommends the increased interest from the management field as conducive to the 4.0 transformation of organizational processes. These results provide policy relevant input to the understanding of how academic research tackles digital transformation in organizational processes. The chapter by Igielski 2020 uses a survey among a sample of large enterprise senior managers headquartered in Poland to check whether and how they develop employee skills for the challenges of Industry 4.0. The results are pessimistic since they reveal the lack of adaptive and developmental actions in this regard. Nevertheless, there is also a positive sign, namely the awareness of the challenges posed by the 4.0 revolution. Thus, the chapter is valuable for the recommendations as to competence development in industrial transition to the digital economy. Flak 2020 presents an interesting test for the system of organizational terms as to its usefulness in the practice of motivating people and in a dedicated software. Based on a research experiment in real life business settings, the author proves the applicability of theory-driven organizational terms in software applications supporting managers in their motivating functions. The chapter contributes important observations as to the interrelations among managerial and technological resources in motivating employees. Sztorc 2020 investigates lean management tools at hotels in Poland based on a large sample of hotel representatives. The results are helpful in understanding the types of lean management tools as well as their major targets in the researched organizations. The input of the study rests in filling the research gap as to the particular tools of lean management applied in the hotel industry to improve services and processes. The focus of this chapter on a particular industry provides a relevant basis for further application and upgrading of this service sector. The chapter by Mazurkiewicz 2020 offers an assessment of the impact of national culture on career orientation and career values among Polish and Chinese students of economics. Surprisingly, the value system does not differ much between the two national samples despite the distinct characteristics of the two national cultures according to Hofstede's method. Consequently, the author assumes national culture as moderator of career values rather than their determinant. These results provide a contribution to the understanding of job motivations among future corporate employees, a critical determinant of all industrial transitions. Kowalik 2020 investigates the economic benefits perceived by student participants of scientific projects. Based on the survey, the author reveals students' recognition of scientific projects as bringing economic effects. The study offers practical implications for young people engaging in research activities as well as for research policy that might acknowledge additional important outcomes besides purely scientific objectives. The third part discusses how governing networks and interests can ensure sustainable and socially responsible industries and enterprises. Sectoral and industrial collaborations are supposed to enhance industrial convergence. EOCIC 2019. In this vein, Lis 2020 focuses on collaborative attitudes in clusters and technological parks. Cluster organizations are established to rip the localization and

agglomeration economies as well as synergies from cooperative links. Despite some history of operations the surveyed Polish cluster initiatives and technology parks still reveal low development of enterprise cooperation. The author suggests self evaluation of management and participants of the researched organizations to understand the accomplished level of collaboration and derive practical implications. This contribution is important to understand the performance of some organizational measures of industrial policy and their real input to industrial transformation. The chapter by Kowalczyk 2020 investigates sociocultural conditions of CSR practices in the construction industry of selected European countries. Based on a survey with a large convenience sample the author confirms the strength of stakeholder pressure on CSR practice as well as the mediating role of company culture in this relationship. At the same time country differences were indicated as significant for CSR practice and worth further explanation of its variance. This study is valuable for the explanation of interests and stakeholder pressure affecting a particular industry thus determining the development conditions of that industry. Another industry specific study has been proposed by Kurzak Mabrouk 2020 who focuses on food businesses. This chapter addresses the critical strategic direction of NIP that refers to sustainable and responsible growth with regard to environmental protection. The author performed the interviews with top and middle managers of a large representative sample of Polish food companies. The findings are optimistic since the majority of companies undertake the efforts towards comprehensive sustainable development strategies voluntarily and not only due to legal enforcement. Still the researched enterprises do not fully apply these strategies as yet. Resonating with the study by Lis 2020 Flieger 2020 identifies network types according to the collaboration maturity level in a local government unit. The research on collaborative networks in public organizations still remains unique. Therefore this study fills the research gap. The author uses a casebased approach to identify the network features that change according to the maturity level of relationships. The findings are useful for the practice of developing collaboration in local governments and contribute to our understanding of the context for industrial development.

The Economic Point of View Israel M. Kirzner, 1960 **Essays on Robertsonian Economics** John R. Presley, 1992-06-18 This is a collection of essays by leading economists surveying and assessing the contribution made to the development of economics in the 20th century by Sir Dennis Holme Robertson whose centenary was celebrated in 1990.

Christian Economic Ethics Daniel K. Finn, 2013-08-01 What does the history of Christian views of economic life mean for economic life in the twenty first century? Here Daniel Finn reviews the insights provided by a large number of texts from the Bible and the early church to the Middle Ages and the Protestant Reformation to treatments of the subject in the last century. Relying on both social science and theology Finn then turns to the implications of this history for economic life today. Throughout the book invites the reader to engage the sources and to develop an answer to the volume's basic question.

The New Palgrave Dictionary of Economics, 2016-05-18 The award winning *The New Palgrave Dictionary of Economics* 2nd edition is now available as a dynamic online resource. Consisting of over 1 900 articles written by leading figures in the field including

Nobel prize winners this is the definitive scholarly reference work for a new generation of economists Regularly updated This product is a subscription based product Markets, Unemployment and Economic Policy Philip Arestis, Gabriel Palma, Malcolm Sawyer, 2005-10-19 In this volume more than 40 leading economists pay tribute to and critically evaluate Geoff Harcourt's work Contributors include Tony Atkinson Tony Lawson Edward Nell and Ian Steedman Economic Growth Philip Arestis, Michelle Baddeley, J. S. L. McCombie, 2007-01-01 Focuses on the nature causes and features of economic growth across a range of countries and regions This title covers a variety of growth related topics from theoretical analyses of economic growth in general to empirical analyses of growth in the OECD transition economies and developing economies This enlightening and significant new volume focuses on the nature causes and features of economic growth across a wide range of countries and regions Covering a variety of growth related topics from theoretical analyses of economic growth in general to empirical analyses of growth in the OECD transition economies and developing economies the distinguished cast of contributors address some of the most important contemporary issues and developments in the field These include amongst others endogenous growth theory Keynesian theories of the business cycle and growth unemployment and growth FDI and productivity spillovers and knowledge externalities and growth This useful analysis of the many facets of economic growth will be an essential read for those interested in economic theory and economic policy making as well as students and scholars of macroeconomics and finance **OECD Economic Surveys: Sweden 2012** OECD, 2012-12-17 OECD's 2012 Economic Survey of Sweden examines recent economic developments policy and prospects before taking a more detailed look at labour and social policies as well as housing and financial markets *Knowledge, Institutions and Evolution in Economics* Brian Loasby, 2002-09-26 This volume explores how the limitations of human knowledge creates opportunities as well as problems in the modern economy The Oxford Handbook of Ethics and Economics Mark D. White, 2019-06-06 Economics and ethics are both valuable tools for analyzing the behavior and actions of human beings and institutions Adam Smith the father of modern economics considered them two sides of the same coin but since economics was formalized and mathematicised in the late 1800s and early 1900s the fields have largely followed separate paths The Oxford Handbook of Ethics and Economics provides a timely and thorough survey of the various ways ethics can do and should inform economic theory and practice The first part of the book Foundations explores how the most prominent schools of moral philosophy relate to economics asks how morals relevant to economic behavior may have evolved and explains how various approaches to economics incorporate ethics into their work The second part Applications looks at the ethics of commerce finance and markets uncovers the moral dilemmas involved with making decisions regarding social welfare risk and harm to others and explores how ethics is relevant to major topics within economics such as health care and the environment With esteemed contributors from economics and philosophy The Oxford Handbook of Ethics and Economics is a resource for scholars in both disciplines and those in related fields It highlights the close relationship between ethics and

economics in the past while and lays a foundation for further integration going forward The Oxford Handbook of Christianity and Economics Paul Oslington, 2014 The new interdisciplinary field of Christianity and economics deals with the important and difficult questions that cluster at the boundary of these disciplines drawing on contemporary theory and empirical findings in both fields with roots in older discourses This landmark volume surveys the field and advances the discussion It deploys historical economic and theological analysis to search for answers

Cochrane Handbook for Systematic Reviews of Interventions Julian P. T. Higgins, James Thomas, Jacqueline Chandler, Miranda Cumpston, Tianjing Li, Matthew J. Page, Vivian A. Welch, 2019-09-23 The revised edition of the Handbook offers the only guide on how to conduct report and maintain a Cochrane Review The second edition of The Cochrane Handbook for Systematic Reviews of Interventions contains essential guidance for preparing and maintaining Cochrane Reviews of the effects of health interventions Designed to be an accessible resource the Handbook will also be of interest to anyone undertaking systematic reviews of interventions outside Cochrane and many of the principles and methods presented are appropriate for systematic reviews addressing research questions other than effects of interventions This fully updated edition contains extensive new material on systematic review methods addressing a wide range of topics including network meta analysis equity complex interventions narrative synthesis and automation Also new to this edition integrated throughout the Handbook is the set of standards Cochrane expects its reviews to meet Written for review authors editors trainers and others with an interest in Cochrane Reviews the second edition of The Cochrane Handbook for Systematic Reviews of Interventions continues to offer an invaluable resource for understanding the role of systematic reviews critically appraising health research studies and conducting reviews

The ^AOxford Handbook of Post-Keynesian Economics, Volume 2 G. C. Harcourt, Peter Kriesler, 2013-08-16 These two volumes cover the principal areas to which Post Keynesian economists have made distinctive contributions The contents include the significant criticism by Post Keynesians of mainstream economics but the emphasis is on positive Post Keynesian analysis of the economic problems of the modern world and of policies with which to tackle them
