Emmett, 2002      **Beyond Traditional Probabilistic Methods in Economics** Vladik Kreinovich, Nguyen Ngoc Thach, Nguyen Duc Trung, Dang Van Thanh, 2018-11-24 This book presents recent research on probabilistic methods in economics from machine learning to statistical analysis Economics is a very important and at the same a very difficult discipline It is not easy to predict how an economy will evolve or to identify the measures needed to make an economy prosper One of the main reasons for this is the high level of uncertainty different difficult to predict events can influence the future economic behavior To make good predictions and reasonable recommendations this uncertainty has to be taken into account In the past most related research results were based on using traditional techniques from probability and statistics such as p value based hypothesis testing These techniques led to numerous successful applications but in the last decades several examples have emerged showing that these techniques often lead to unreliable and inaccurate predictions It is therefore necessary to come up with new techniques for processing the corresponding uncertainty that go beyond the traditional probabilistic techniques This book focuses on such techniques their economic applications and the remaining challenges presenting both related theoretical developments and their practical applications      *The Economics of Public Services* Martin S. Feldstein, 1977      **Handbook of Regional and Urban Economics** Peter Nijkamp, E.S. Mills, P.C. Cheshire, 1986 Fifteen essays in this handbook are divided into four parts Part I surveys basic spatial and spatially related research Part II surveys literature on specific urban markets Part III is devoted to studies of urban development and problems in developing countries Part IV contains papers on specific urban problems and sectors      The Economics of Public Services Martin S. *The Development of Security and Whole Care System for the Aged in China* Yanzhong Wang,2017-10-25 This book examines the process of population aging in China and its unique features considers the social progress implied in China becoming a society with an aging population and assesses the tremendous risks and challenges involved Based on the development of pension security systems around the world the book studies the status quo and future requirements of the Chinese pension security system from the perspectives of capital service and spirit and puts forwards a three pillar pension security system that is in conformity with China s current situation and reflects the developmental trend that in future social security will likely transform from material security into comprehensive security In addition the book analyzes the Chinese pension security system While integrating international perspectives its main focus is on statistical analysis combining theory with practice and qualitative with quantitative analysis As such the book not only offers a window for the world on the status

and evolution of China's pension security system but also an opportunity for international academic dialogues City Economics Brendan O'Flaherty, 2005-10-30 This introductory but innovative textbook on the economics of cities is aimed at students of urban and regional policy as well as of undergraduate economics. It deals with standard topics including automobiles, mass transit, pollution, housing, and education, but it also discusses non-standard topics such as segregation, water supply, sewers, garbage, fire prevention, housing codes, homelessness, crime, illicit drugs, and economic development. Its methods of analysis are primarily verbal, geometric, and arithmetic. The author achieves coherence by showing how the analysis of various topics reinforces one another. Thus, buses can tell us something about schools and optimal tolls about land prices. Brendan O'Flaherty looks at almost everything through the lens of Pareto optimality and potential Pareto optimality: how policies affect people and their well-being, not abstract entities such as cities or the economy or growth or the environment. Such traditionalism leads to radical questions, however: Should cities have police and fire departments? Should tax preferences for home ownership be repealed? Should public schools charge for their services? O'Flaherty also gives serious consideration to such heterodox policies as pay at the pump, auto insurance, curb rights for buses, land taxes, marginal cost water pricing, and sidewalk zoning.

**Economics** Hugh Stretton, 1999-10-20 Exactly what is needed for the thoughtful student. It introduces the different skills required in economics. G. C. Harcourt, Cambridge University **Bulletin** Northwestern University (Evanston, Ill.), 1928

The International Law of Economic Migration Joel P. Trachtman, 2009 Explores the economic and political ramifications of liberalization of national rules of migration through international legal agreements. Examines the existing law of economic migration. Develops proposals for new international rules in the field and for interstate cooperation.

**MEZZOECONOMICS** Chen Yunxian, Gu Wenjing, 2018-05-15 This monograph consists of six major parts elaborating on basic aspects of mezzoeconomics: the theory of regional government, foresighted leading, the dual role theory of regional government, the dual entity theory of regional government, the double strong mechanism theory, and the theoretical configuration of mezzoeconomics, as well as the prospects for its development. It gives a full exposition of the core issues, approaches, and methodological principles of mezzoeconomic researches, their breakthrough improvements upon traditional economic theorization, and the broad prospects for innovative practices. This monograph fills up a blank in the theoretical system of modern economics and signifies a substantial amelioration of the theorization of modern market economy. It demonstrates through forceful exemplification and argumentation that there exists in between microeconomics represented by the enterprise and macroeconomics represented by the state, mezzoeconomics represented by regional government in the system of modern economics, and that both enterprises and regional governments are entities of market competition in the modern market theory, which remedies the theoretical defects in traditional economic and market theories and redefines the theories of modern economics and modern market economy.
