Economics Real Estate And The Supply Of Land:

Economics, Real Estate and the Supply of Land Alan W. Evans, 2008-04-30 The book draws together the economic literature relating to the supply of land for development The standard view appears to be that the owners of land have no interest other than to allow their land to be used for the activity which would yield the highest income But in reality this is not so and the book's aim is to demonstrate this to set out the reasons and to show the economic effects of the fact that landowners have other motives The book covers the supply of land for urban development and shows how land has characteristics which differentiate it from other factors of production which will also affect its supply for some uses e.g. land is fixed in location and its price and value are inseparable from where it is New light is cast on the market for land by concentrating on the supply side and on land use planning by taking an economic viewpoint *Economics, Real Estate and the Supply of Land*, 2008

Economics and Land Use Planning Alan W. Evans, 2008-04-15 The book's aim is to draw together the economics literature relating to planning and set it out systematically It analyses the economics of land use planning and the relationship between economics and planning and addresses questions like What are the limits of land use planning and the extent of its objectives Is the aim aesthetic Is it efficiency Is it to ensure equity Or sustainability And if all of these aims how should one be balanced against another *Economics, Real Estate, and the Supply of Land* Alan W. Evans, 2004

Land Resource Economics Raleigh Barlowe, 1978 *The Economics of Property and Planning* Graham Squires, 2021-11-29 This book introduces the interlocking disciplines of property and planning to economic theory and practice Unlike any other available textbook *The Economics of Property and Planning* skilfully introduces the reader to the interplay between property and planning using an economic lens As resources become scarce there is a growing need for students to understand the principles of economics in property and planning especially given the rapid social environmental technological and political changes that are shaping places The book begins with an outline of key economists and economic problems then resources and scarcity before examining macro and microeconomic factors at play in property and planning Furthermore this book covers a variety of topics including spatial and locational modelling fiscal approaches to redistribution regeneration and renewal and transport and infrastructure financing There is also a particular focus on contemporary issues such as climate change environmental limits to economic growth sustainability and resilience and affordable housing This book also introduces practical evaluation tools and appraisal plus a look at property and planning with respect to macroeconomic objectives policy and new directions With property and planning essential factors in economic thinking and doing this book provides insight into what future places will look like in real terms and how they will be shaped by policy Targeted disciplines for this book include Economics Planning Property Construction Geography Environmental Management Sustainability Housing Built Environment Land Economy Urban Studies Regional Studies and Public Policy *Journal of Housing Research*, 2006

The Right to Buy Colin Jones, Alan Murie, 2008-04-15 An evaluation of the most enduring

privatisation of the Thatcher era Written in an accessible style this is a key reference for students and researchers in housing and planning geography and social policy The book analyses the operation and impact of the right to buy policy RTB It includes a critique of the Housing Act and the 2001 Housing Scotland Act The enactment of these changes under a Labour government affirms the continuance of the RTB The authors take stock of its profound effect on housing policy reversing the growth in social housing developed over the twentieth century transforming the nation's tenure structure and revolutionising the UK housing system The Right to Buy analysis and evaluation of a housing policy begins with an examination of the policy background to the establishment of the RTB and the main features of the legislation This is followed by chapters that review its take up and the pattern of sales and their impact on social housing a chapter examining the financial aspects of the RTB from the viewpoints of tenants local authorities and central government one looking at the impact of the RTB via subsequent re sales on the open market and on the private rented sector and a chapter drawing on the information already reviewed to consider the potential of the RTB to create sustainable and diverse communities In the final chapters the international experience of parallel policies are considered and the future take up of the RTB is assessed in the light of recent reforms together with alternatives

The Economics of Urban Property Markets Paschalis Arvanitidis, 2014-08-13 This book examines the relationship between the property market and urban economy The stimulus for this work was provided by the seemingly ever accelerating process of urban economic change and the noticeable failure of existing studies to adequately explore the pivotal role that the property market plays in this process Drawing on institutional economics the central argument of the book is that the property market as an institution is a mediator through which urban economic potential can be realised and served In developing this argument the book provides a critical realist ontological framework that advances understanding of the institutional structure of the economy and the complex interrelation between the institutional environment and human agency as well as a holistic theoretical framework of urban economic change where appropriate emphasis is placed on the specific mechanisms processes and dynamics through which the built environment is provided Arvanitidis also explores an institutional conceptualisation of property market efficiency defined in terms of the ability of the market institution to adapt

its structure and to provide outcomes that the economy requires To inform empirical research on the developed concepts the book also offers a generic analytical approach specifying appropriate research methods and techniques for investigation along with a specific research design providing an operational framework that translates developed theory into empirical practice The book's primary contribution therefore lies in its delineation of a holistic research programme to conceptualise the property market as an institution and to explore its role within the urban economy

The Economics of Commercial Property Markets Michael Ball, Colin Lizieri, Bryan MacGregor, 2012-10-12 This new text provides a rigorous analysis of real estate markets Three main sections cover microeconomics of property markets the macroeconomics of commercial property the financial economics of property Global empirical examples illustrate the theories and issues This often complex area is made accessible each chapter contains a boxed summary and questions for self testing or discussion

Planning, Public Policy and Property Markets David Adams, Craig Watkins, Michael White, 2008-04-15 The focus of this book is on how public policy and especially the planning system both shapes and reflects the essential characteristics of land and property markets It challenges the common misconceptions that property markets operate in isolation from public policy and that planning permission is the only significant form of state intervention in the market Planning Public Policy Property Markets contends that effective state market relations in land and property are critical to a prosperous economy and a robust democracy especially at a time when development aims to be sustainable and environmental protection needs to be matched by urban and rural regeneration The book thus reflects an increased realisation among academics and practitioners of the importance of theoretical integration and joined up policy making Its rounded perspective addresses a significant weakness in the academic literature and will encourage broader debate and a more pluralist agenda for property research Prominent contributors present important new research on different market sectors and policy arenas including regeneration and renewal housing growth housing planning transport and economic competitiveness while the editors specifically draw out more general lessons on the dynamic nature of the state property market relationship in a modern economy This book will encourage all those involved in property research who strive for theoretical and practical connectivity to demonstrate that just as property market operations cannot

be analysed without understanding state processes policy decisions cannot be taken without an appreciation of how the market operates
