Economics Gary E. Clayton, 2008 Real Estate Finance and Investment Manual Jack Cummings, 2010-12-21 Updated and revised to include ten years of new developments in real estate investment Real Estate Finance and Investment Manual Ninth Edition is the definitive guide to financing for all real estate investors Understand all the financing options learn how to choose an appropriate strategy read about insider techniques and get hands on experience with case studies and helpful checklists Economic Dignity Gene Sperling, 2021-10-12 Timely and important It should be our North Star for the recovery and beyond Hillary Clinton Sperling makes a forceful case that only by speaking to matters of the spirit can liberals root their belief in economic justice in people's deepest aspirations in their sense of purpose and self worth The New York Times When Gene Sperling was in charge of coordinating economic policy in the Obama White House he found himself surprised when serious people in Washington told him that the Obama focus on health care was a distraction because it was not focused on the economy How he asked was the fear felt by millions of Americans of being one serious illness away from financial ruin not considered an economic issue Too often Sperling found that we measured economic success by metrics like GDP instead of whether the economy was succeeding in lifting up the sense of meaning purpose fulfillment and security of people In Economic Dignity Sperling frames the way forward in a time of wrenching change and offers a vision of an economy whose guiding light is the promotion of dignity for all Americans Economics, Today & Tomorrow Roger LeRoy Miller, 1995 Applies traditional economic theory to contemporary problems such as unemployment inflation and conflicting economic systems *Economic Management and Transition Towards a Market Economy* Anthony T.H. Chin, 1996 Much attention has been focused in recent years on the transformation of the economies of Eastern and Central Europe and the former Soviet Union However a growing demand for policy advice technical assistance and expertise is also coming from Asian reforming countries such as China Mongolia Vietnam Laos and Cambodia In addition business communities abroad are increasingly interested in exploring investment and marketing opportunities in these reforming countries Such developments are too important to overlook or ignore The transformation of socialist economies towards market based systems entails an unusually wide range of problems Studies of related topics are complicated by the speed of the changes and the lack of clear historical precedents Although the structural features of Asian reforming economies are in important ways different from those of the Eastern European economies all socialist economies share similar fundamental conditions on the eve of economic reform which raise a similar set of reform issues This volume brings together a rich collection of expertise and information in an attempt to shed some light on the transitional process in Asia The contributions are by no means exhaustive However they provide the reader and analyst with an excellent starting point to the problems and prospects which are specific to Asian transforming economies **America's Hidden Economic Engines** Robert B. Schwartz, Rachel Lipson, 2023-06-06 Five in

depth case studies reveal the innovative practices that position U S community colleges as pathways to quality employment In America s Hidden Economic Engines editors Robert B Schwartz and Rachel Lipson spotlight community and technical colleges as institutions uniquely equipped to foster more equitable economic growth across America s regions As Schwartz and Lipson show these colleges are the best placed institutions to reverse the decades long rise in US economic inequality by race class and geography In the book Harvard Project on Workforce researchers introduce detailed case studies of five institutions Lorain County Community College in Ohio Mississippi Gulf Coast Community College Northern Virginia Community College Pima Community College in Arizona and San Jacinto Community College in Texas that show what is possible when governments employers and communities invest in their community colleges economic and workforce development mission These case studies reveal key institutional policies and practices leadership behaviors and organizational structures of successful collaborations between colleges and their regional partners in the public and private sector Each case underscores how although community colleges face distinct challenges based on local context successful schools demonstrate a consistent focus on economic mobility and good jobs across all their programs and activities In a concluding chapter the editors champion community colleges as the most critical institutions for the future of US workforce development policy

Their Future Michael Gubser, 2025-05-27 A compelling examination of how economic development projects ignore local history and the effects of this shortsightedness Foreign aid planners rarely consider the history of the societies in which they work an oversight noted in the development literature but rarely examined Aid programs costing billions of dollars operate largely in a historical vacuum divorced from the knowledge of what succeeded or failed in the past Michael Gubser chronicles the varieties of ahistoricism in international development theory and practice since 1945 He traces the history of development ideas analyzing key theoretical and policy statements to highlight the marginalization of history in favor of technical solutions to economic and social problems and he examines aid programs in several developing countries to show how Western models of social and economic development have been applied and misapplied **1967 Economic**

Strategic Information and Developments IBP USA, 2013-08 Too often in the history of Mexico women have been portrayed as marginal figures rather than legitimate participants in social processes As the twentieth century draws to a close Mexican women of the countryside can be seen as true historical actors mothers and heads of households factory and field workers community activists artisans and merchants In this new book thirteen contributions by historians anthropologists and sociologists from Mexico as well as the United States elucidate the roles of women and changing gender relations in Mexico as rural families negotiated the transition from an agrarian to an industrial society Drawing on Mexican community studies gender studies and rural studies these essays overturn the stereotypes of Mexican peasant women by exploring the complexity of their lives and roles and examining how these have changed over time The book emphasizes the active roles of women in the periods of civil war 1854-76 and the commercialization of agriculture 1880-1910 It highlights their vigorous responses to the violence of revolution their increased mobility and their interaction with state reforms in the period from 1910 to 1940 The final essays focus on changing gender relations in the countryside under the impact of rapid urbanization and industrialization since 1940 Because histories of Latin American women have heretofore neglected rural areas this volume will serve as a touchstone for all who would better understand women's lives in a region of increasing international economic importance Women of the Mexican Countryside demonstrates that contrary to the peasant stereotype these women have accepted complex roles to meet constantly changing situations
