**An Economic History of Nineteenth-Century Europe** Ivan Berend, 2013 A transnational survey of the economic development of Europe exploring why some regions advanced and some stayed behind **Economic History of a Divided Europe** Ivan T. Berend, 2020-02-28 This book presents the sharp regional differences within the integrating European continent Four regions Northwestern Europe Southern Europe Central Europe and Eastern Southeastern Europe represent high medium and relatively less developed levels of economic advancement These disparities have emerged as a result of historical differences that produced and reinforced cultural and behavioral differences The author examines the distinctions between the regions looks at how these differences transpired and became so retrenched and answers the question of why some countries were able to elevate to higher levels of economic development while others could not This book is unique in that it provides a timely historical analysis of the main causes of the most pressing conflicts in Europe today Readers will come away from this book with a deeper understanding of the sharp divergence in economic standing between the four different regions of Europe as well as knowledge about how institutional corruption and other cultural features exacerbated these variations The book also offers a better understanding of major European Union conflicts between member countries and between member and nonmember countries as well as the rise of autocratic regimes in certain countries The book begins with a short history of European integration throughout European civilization and then goes on to discuss the modern reality of integration and attempts to homogenize the Continent that divided into four different macro regions It will primarily appeal to scholars researchers and students studying Europe from various fields including economics business history political science and sociology as well as a general readership interested in Europe's past present and future *AP European History Premium, 2022-2023: 5 Practice Tests + Comprehensive Review + Online Practice* Seth A. **Industrialization in Nineteenth Century Europe** Tom Kemp, 2014-06-06 Written for the layman as well as the economic historian this famous and much used book not only presents a general synthesis of the pattern of European industrialisation it also provides material for a comparative study by illustrating in separate case studies the specific characteristics of development in Britain France Germany Russia and Italy **the cambridge economic history of europe** Edwin Ernest Rich, 1967 **Encyclopedia of African History 3-Volume Set** KEVIN SHILLINGTON., 2005 **The Cambridge Economic History of Latin America: Volume 2, The Long Twentieth Century** Victor Bulmer-Thomas, John Coatsworth, Roberto Cortés Conde, 2006-01-23 An indispensable reference work for anyone interested in Latin America s economic development **Guardians or Oppressors** Gülçin Balamir Coşkun, Amany Salaheldin Soliman, 2015-05-13 This book investigates an important phenomenon in the Middle East and the Mediterranean region namely the role that the military plays in the governments of several states of the region Can military forces be defined as guardians of a regime in a democratic state How is it possible to limit the power of armies to solely military prerogatives and competences How can the intervention of military forces in the political arena in democratising countries be prevented It is easy to ask these questions but finding answers is more difficult Using historical events and theories as examples to follow is an even more complicated task What happened after the Arab Spring has demonstrated again how civil military relations constitute an important pillar of the democratisation process The contributors to this book develop and analyse the reasons why militaries in the Middle East and the Mediterranean wished to obtain a guardianship role and the methods they used to achieve and maintain it The book also investigates how these militaries reacted to democratisation in their respective countries and begins with a conceptual framework followed by examples from Spain Egypt Turkey Lebanon and Iran This work provides a multi faceted understanding of the historical political social and economic layers of complicated civil military relations in one of the world s most unstable regions **Colonialism** Norrie Macqueen, 2014-07-22 Europe s rapacious hunger for other people s lands is one of the key shaping forces of our contemporary world Everything is touched by our colonial past from the way we see the world to the food we eat Our contemporary preoccupations and ills from globalization to humanitarian intervention to

international terrorism have colonialism somewhere in their genetic make up The character and policies of contemporary international organizations from the United Nations to the European Union have also been deeply affected by the colonial inheritance of their members whether as perpetrators or victims Weaving together the complex strands of history and politics into one compact narrative this book addresses the key theories of colonialism examining them against contemporary realities It goes on to look at how the different policies of colonisers have had profoundly contradictory effects on the way different empires ended in the 20th century These endings in turn affected the entire nature of modern day international relations It also exposes the moral ambiguities of colonialism and the hypocrisies which underlay colonial policies in the 19th and 20th centuries *Central Europe* Lonnie Johnson,1996 Throughout the ages small nations struggled valiantly against a series of imperial powers Ottoman Turkey Habsburg Austria imperial Germany czarist Russia Nazi Germany and the Soviet Union and they lost regularly Johnson's account is present minded in the best sense in describing actual historical events he illustrates the ways they have been remembered and how they contribute to the national assumptions that still drive European politics today *The Routledge International Handbook of Deindustrialization Studies* Tim Strangleman,Sherry Lee Linkon,Steven High,Jackie Clarke,Stefan Berger,2025-04-23 The Routledge International Handbook of Deindustrialization Studies is a timely volume that provides an overview of this interdisciplinary field that emerged in response to the widespread decline of manufacturing and heavy industry from the 1980s onward Edited by prominent figures in the field the volume brings together many of the leading scholars from a range of countries across the globe to offer a multifaceted overview of deindustrialization and its impact Deindustrialization has been cited as one of the factors behind the rise of the far right and to a lesser extent the far left across Europe the rise and success of Trumpism in the US and the Brexit vote as well as the more recent and sudden erosion of UK Labour's Red Wall of the North of England This collection brings together scholars of deindustrialization around the globe and from a wide variety of academic disciplines including history sociology politics geography economics anthropology literature arts practice photography heritage and cultural studies In doing so the volume explores the roots of deindustrialization across the world highlights the key themes and issues in the field illustrates the intersectional and interdisciplinary character of the field and shows how deindustrialization lies at the heart of many of the key political cultural social and economic issues of our time Written in a clear and accessible style the Handbook is a comprehensive interdisciplinary volume for this young but maturing field The volume is a valuable resource for students teachers and researchers interested in industrial decline closure and the multifaceted impacts they cause It speaks to readers across the arts humanities and social and political sciences concerned with deindustrialization broadly defined Chapter 27 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 International license

**Germany's Struggle for Modernity** Jürgen Kocka,Volker Berghahn,2025-04-01 In the historiography of modern

Germany the nineteenth century s innovations marks a period of seismic change From accelerating demographic growth to growing secularization and the rise of nationalism it was a century which laid the foundations for both a civil society and the dictatorships of the twentieth century In this comprehensive history of Germany from 1780 to 1918 J rgen Kocka re examines the transformative interactions that took place between society economy culture and politics Innovatively resituating these developments within a wider context of conflict and transformation in Europe this book illuminates new ways to understand the emergence of classical modernity within the nineteenth century

**Economic Policy for a Social Europe** Jörg Huffs Schmid, 2005-09-08 This book poses a critique of neoliberal economic policies in the EU and proposals for alternatives The book argues that the economic weakness of the EU is the result of the very restrictive economic policy of the Union and most member states The book advances from a comprehensive critique of macroeconomic social and structural policies towards a concrete concept for a democratic European social model based on the objectives of full employment welfare social equity and ecological sustainability

The Idea of a United Europe J. Shahin, M. Wintle, 2000-07-14 The Idea of a United Europe examines the issues thrown up by the reintegration of Europe since 1989 90 through the primary perspective of European identity Political economy here joins contemporary history European studies specialists from Britain Germany and the Netherlands review Europe s progress now that a decade has passed since the end of the Cold War Differences within Europe and unifying factors are both assessed in the course of this quest to examine what Europe has become and is becoming at the turn of the millennium

Europe and the Wider World Bernard Waites, 2005-07-19 This book examines the concept of Europe in its relations to those areas of the globe beyond its borders In particular it is concerned with the historical evolution and contemporary setting of Europe vis a vis The United States of America the developing world and the former Soviet Union This involves drawing on the perspectives of international history politics and economics A unifying feature of the analysis included here is provided by the fact that the bi polar world that emerged in the aftermath of the Second World War has effectively been brought to an end with the collapse first of Soviet control in Eastern Europe and then by the break up of the Soviet Union itself and a prospective reduction of American influence in western Europe What will Europe look like in an increasingly multi polar world An answer to this depends not only on the evolving external connections between Europe and other parts of the world but also on the internal development of European political and economic integration The dynamic of this crucial dual relationship is examined here

**Reforming Early Retirement in Europe, Japan and the USA** Bernhard Ebbinghaus, 2008-10-16 Since the 1970s early exit from work has become a major challenge in modern welfare states Governments employers and unions alike once thought of early retirement as a peaceful solution to the economic problems of mass unemployment and industrial restructuring Today governments and international organizations advocate the postponement of retirement and an increase in activity among older workers Comparing the USA eight European countries and Japan this book demonstrates significant cross national differences in early retirement across

countries and over time The study evaluates the impact of major variations in welfare regimes production systems and labor relations It stresses the importance of the pull factor of extensive welfare state provisions particularly in Continental Europe the push factor of labor shedding strategies by firms particularly in Anglo American market economies and the role of employers and worker representatives in negotiating retirement policies particularly in coordinated market economies Over the last three decades early retirement has become a popular social policy and employment practice in the workplace adding to the fiscal crises and employment problems of today s welfare states Attempts to reverse early retirement policies have led to major reform debates Unilateral government policies to cut back on social benefits have not had the expected employment results due to resistance from employers workers and their organizations Successful reforms require the cooperation of both sides This study provides comprehensive empirical analysis and a balanced approach to studying both the pull and the push factors affecting early exit from work needed to understand the development of early retirement regimes

Bibliography of European Economic and Social History Derek Howard Aldcroft, Richard Rodger, 1993 This bibliographical guide contains 10 000 references to the economic and social history of 30 European countries during the period 1700 1939 More than 3000 periodicals have been consulted to obtain references as well as books edited collections and conference proceedings The information is listed in categories such as industry agriculture finance migration labour conditions urban communities and organizations Full publication details are included so that references may be located easily

**Whose Public Space?** Ali Madanipour, 2010-01-21 Public spaces mirror the complexities of urban societies as historic social bonds have weakened and cities have become collections of individuals public open spaces have also changed from being embedded in the social fabric of the city to being a part of more impersonal and fragmented urban environments Can making public spaces help overcome this fragmentation where accessible spaces are created through inclusive processes This book offers some answers to this question through analysing the process of urban design and development in international case studies in which the changing character level of accessibility and the tensions of making public spaces are explored The book uses a coherent theoretical outlook to investigate a series of case studies crossing the cultural divides to examine the similarities and differences of public space in different urban contexts and its critical analysis of the process of development management and use of public space with all its tensions and conflicts While each case study investigates the specificities of a particular city the book outlines some general themes in global urban processes It shows how public spaces are a key theme in urban design and development everywhere how they are appreciated and used by the people of these cities but also being contested by and under pressure from different stakeholders
