EIG was created to support the work on the DCFR with insights from law and economics. It brings together a number of leading European law and economics scholars. The Group looked at the main elements of the DCFR with two questions in mind: from an economic perspective, is it sensible to harmonize private law across Europe for this specific element, and is the solution chosen in the DCFR optimal? This book presents the outcome of the work of the EIG. It deals with key issues such as the function of contract law, contract formation, good faith, non-discrimination, specific performance versus damages, standard contractual terms, and consumer protection in contract law. The EIG complements the work of the drafters of the DCFR with insightful and critical assessments based on the well-established law and economics literature.

Contractual Networks, Inter-firm Cooperation and Economic Growth
Fabrizio Cafaggi, 2011-01-01. This insightful book presents a legal and economic analysis of inter-firm cooperation through networks as an alternative to vertical integration. It examines comparatively various forms of collaboration ranging from consortia to multiparty joint ventures and from franchising to dealerships. Collaboration among firms of different sizes helps to overcome numerous weaknesses of the modern western industrial systems. It permits the governing of vertical disintegration without increasing fragmentation and transaction costs and allows firms to benefit from resource complementarities favoring division of labour. The contributing authors, primarily focusing on Europe and the US, address important ways in which legal systems provide a framework for inter-firm coordination. It is clear from the analysis that significant obstacles to collaboration still remain and the authors call for legal reforms at European and Member States level.
