Psychopathology and World Politics Ralph Pettman, 2012 This unique work looks at the relationship between psychopathology and world politics What happens when the brain mind ceases to function properly How does this impinge on world affairs What is to be done for example when a leader ceases to act in a seemingly sane fashion and yet still commands the loyalty of those who maintain him or her in office What is to be done when a leader s advisers seem rational but are clearly not Indeed what is to be done when a whole society goes insane This is to raise more questions than a single work can adequately answer In lieu of a comprehensive account which would be beyond the scope of one study what this book does is first describe psychopathology in general terms and its relationship to world affairs It then looks at denial in particular and at speaking the truth as a potentially therapeutic antidote especially in relation to nuclear weapons It follows this by looking at delusion in general and at what being in touch with reality might entail with regard to a so called failed state With topics ranging from Hitler s mental health to the continuing threat of nuclear Armageddon this book is a valuable contribution to the field of international politics and modern psychology and will hopefully lead to a better understanding of contemporary world affairs and the global issue of conflict resolution

The New Public Finance Inge Kaul, Pedro Conceicao, 2006-02-23 The world s agenda of international cooperation has changed The conventional concerns of foreign affairs international trade and development assistance are increasingly sharing the political center stage with a new set of issues These include trans border concerns such as global financial stability and market efficiency risk of global climate change bio diversity conservation control of resurgent and new communicable diseases food safety cyber crime and e commerce control of drug trafficking and international terrorism and weapons of mass destruction Globalization and increasing porosity of national borders have been key driving forces that have led to growing interdependence and interlocking of the public domains and therefore public policy concerns of countries governments private businesses civil society and people at large Thus new and different issues are now occupying top places on national policy agendas and consequently on the agendas of international negotiating forums The policy approaches to global challenges are also changing A proliferation and diversification of international cooperation efforts include focus on financing arrangements Financing of international cooperation in most instances is a haphazard and non transparent process

and often seems to run parallel to international negotiations There are many unfunded mandates and many non mandatory funds To agree on and to achieve international economic goals we need to understand how financing of international cooperation efforts actually works Our understanding is hampered by two gaps 1 lack of an integrated and cohesive theoretical framework 2 lack of consolidated empirical and operational knowledge in the form of a comprehensive inventory of past current and possible future i e currently deliberated financing mechanisms This book reduces these two gaps and provides a guide to improve our ability to finance international cooperation
