conflicts faced when given the choice of morality Apply various philosophical ideas to politics religion economics relationships and medicine Discuss basic philosophical arguments Punishment and Social Control Stanley Cohen, 2017-07-05 While crime law and punishment are subjects that have everyday meanings not very far from their academic representations social control is one of those terms that appear in the sociological discourse without any corresponding everyday usage This concept has a rather mixed lineage After September 11 has become a slogan that conveys all things to all people but carries some very specific implications on interrogation and civil liberties for the future of punishment and social control The editors hold that the already pliable boundaries between ordinary and political crime will become more unstable national and global considerations will come closer together domestic crime control policies will be more influenced by interests of national security measures to prevent and control international terrorism will cast their reach wider to financial structures and ideological support the movements of immigrants refugees and asylum seekers will be curtailed and criminalized taken for granted human rights and civil liberties will be restricted In the midst of these dramatic social changes hardly anyone will notice the academic field of punishment and social control being drawn closer to political matters Criminology is neither a pure academic discipline nor a profession that offers an applied body of knowledge to solve the crime problem Its historical lineage has left an insistent tension between the drive to understand and the drive to be relevant While the scope and orientation of this new second edition remain the same in recognition of the continued growth and diversity of interest in punishment and social control new chapters have been added and several original chapters have been updated and revised **Capital Punishment** C. Cliff, 2003 The issue of capital punishment is a continually debated issue because it calls into question the values and direction of society How is a civilisation supposed to handle lawbreakers Are some crimes so heinous and some people so dangerous that the death penalty is the only appropriate response The United States Constitution prohibits cruel and unusual punishment but opinions on whether that includes capital punishment are vehement on both sides Many states have some form of death penalty and public opinion seems to indicate support of it in principle However many firestorms have erupted recently over the application of the penalty including the topics of its use on minors and those with mental disabilities There are also questions raised about how much of a factor race plays in a capital sentence Internationally several countries have foresworn the death penalty with certain countries in Europe and the Americas refusing to extradite criminal suspects including suspected terrorists to the US if capital punishment is a possible sentence With such politically flammable and ethically challenging issues hanging over it capital punishment is a vitally important issue to understand To help facilitate that study this book assembles a carefully selected and substantial listing of literature focussing on the death penalty Anyone researching this area of criminal justice will find this book an important tool as it offers easy access to the most relevant works about capital punishment Following the bibliography further access is provided with author title and subject indexes **Encyclopedia of Violence, Peace, and Conflict** , 2008-09-05 The 2nd

The End of Sacrifice John Howard Yoder, 2011-09-01 John Howard Yoder 1927 1997 who was a professor at Notre Dame University and Associated Mennonite Biblical Seminary was one of the 20th century s leading theologians Scholars continue to study his writings on pacifism and other subjects The End of Sacrifice brings together four decades of Yoder s published and unpublished writings on capital punishment He engaged in sophisticated biblical sociological and historical analysis in order to demonstrate that from ancient society until today capital punishment is an inherently cultic sacrificial rite Since the death of Jesus brought a decisive end to all sacrifices for sin Yoder argues Christians should proclaim the abolition of the death penalty Its advocates should no longer claim biblical validation In doing so Yoder also makes a persuasive case for proactive Christian witness to the state He calls the church to proclaim the end of sacrifice to public officials who are responsible for carrying out capital punishment John Howard Yoder was unique in how he brings together both the biblical and sociological roots of the practice of capital punishment Many Christian works focus on the former whereas other works focus exclusively on the latter John C Nugent

Songs without Music Desmond Manderson, 2000-10-03 In this pathbreaking and provocative analysis of the aesthetics of law the historian legal theorist and musician Desmond Manderson argues that by treating a text legal or otherwise as if it were merely a sequence of logical propositions readers miss its formal and symbolic meanings Creatively using music as a model he demonstrates that law is

not a sterile rational structure but a cultural form to be valued and enhanced through rhetoric and metaphors form images and symbols To further develop this argument the book is divided into chapters each of which is based on a different musical form Law for Manderson should strive for neither coherence nor integrity Rather it is imperfectly realized constantly reinterpreted and always in flux Songs without Music is written in an original engaging and often humorous style and exhibits a deep knowledge of both law and music It successfully traverses several disciplines and builds an original and persuasive argument for a legal aesthetic The book will appeal to a broad readership in law political theory literary criticism and cultural studies

Doyle,2015-02-11 This book examines the moral dilemmas of nuclear dissemination and the justifications of both nuclear pursuit and avoidance by contemporary states Applying Constructivist methodologies and moral theory the author analyses a core set of moral dilemmas that ensnare decision makers amongst state and non state nuclear aspirants as well as amongst states committed to preventing horizontal proliferation The book shows that the character structure and implications of these dilemmas have not yet been adequately understood or appreciated and that such an understanding is necessary for an effective set of nonproliferation policies Furthermore it shows that the dilemmas force and political policy import are evident in the discourses that diverse actors undertake to defend their nuclear choices and how the dilemmas of nuclear aspirants are implicated in those of nuclear preventers The author advocates a number of policy recommendations that reinforce some already made by scholars and experts but more importantly others that advise significantly different courses of action The book reveals how the moral dilemmas of nuclear aspiration avoidance and prevention constitute the security dilemmas and paradoxes that comprise much of the 21st century security environment This book will be of much interest to students of nuclear proliferation international relations ethics and international security studies
