Eynsham Alan Hardy, Ros Smith, 2003 For five hundred years the small village of Eynsham in Oxfordshire has lived with the hazy memory of a great Benedictine abbey that once flourished at its heart In recent years major archaeological excavations have revealed much of the abbey's remains and intriguing evidence of settlement going back 3000 years Here for the first time the history and the archaeology have been combined to bring to life the story of the village and its abbey and the characters that shaped their destiny A companion to the Oxford Archaeology monograph Aelfric's Abbey this colourful booklet includes a series of reconstruction paintings showing the village and the abbey at various times through history along with many illustrations of the archaeological finds It also provides a list of suggested further reading The Great Western Railway Official Guide, 1909 Great Western Railway (Great Britain), 1909 Tradition and Transformation in Anglo-Saxon England Susan Oosthuizen, 2013-05-09 Most people believe that traditional landscapes did not survive the collapse of Roman Britain and that medieval open fields and commons originated in Anglo-Saxon innovations unsullied by the past The argument presented here tests that belief by contrasting the form and management of early medieval fields and pastures with those of the prehistoric and Roman landscapes they are supposed to have superseded The comparison reveals unexpected continuities in the layout and management of arable and pasture from the fourth millennium BC to the Norman Conquest The results suggest a new paradigm the collective organisation of agricultural resources originated many centuries perhaps millennia before Germanic migrants reached Britain In many places medieval open fields and common rights over pasture preserved long standing traditions for organising community assets In central southern England a negotiated compromise between early medieval lords eager to introduce new managerial structures and communities as keen to retain their customary traditions of landscape organisation underpinned the emergence of nucleated settlements and distinctive highly regulated open fields **The Victoria History of the County of Buckingham** William Page, 1927 *History, Gazetteer and Directory of the County of Oxford* Oxford, County of. House,1870      Burnham Norton Friary After the Dissolution Sally Francis,2023 The story of the fate of a small Norfolk priory after its dissolution by Henry VIII in 1538 shows how both its medieval and modern history can be recovered by archival and physical research Burnham Norton Friary one of the first Carmelite houses founded in England 1242 47 was dissolved in 1538 Its remains comprise the restored gatehouse west gable of the church rebuilt as a barn Friary Cottage and an open space which was once the precinct The post Dissolution history of monastic sites has generally not been well studied At Norton nothing was known of its owners between 1561 and 1914 what relationships if any they had or how they used the site The fate of the Friary buildings was poorly understood and details of the gatehouse restoration unknown In this pioneering study Sally Francis uses both modern archival research and a survey of local houses to recover the history and something of the architecture of the friary Between 1538 and 1848 the church became a barn and the rest of the site was used as a farmstead In 1848 its owner restored the gatehouse 1848 9 saving it from dereliction but cleared away the farm buildings to turn the site into an Antiquarian relic Studying the post Dissolution history of the site has been a valuable exercise It not only allows that phase of the site to be understood it also illuminates aspects of the site s earlier history which given the loss of the Friary s own archives could not otherwise be studied      **Building Anglo-Saxon England** John Blair,2021-10-12 Shortlisted for the Wolfson History Prize A radical rethinking of the Anglo Saxon world that draws on the latest archaeological discoveries This beautifully illustrated book draws on the latest archaeological discoveries to present a radical reappraisal of the Anglo Saxon built environment and its inhabitants John Blair one of the world s leading experts on this transformative era in England s early history explains the origins of towns manor houses and castles in a completely new way and sheds new light on the important functions of buildings and settlements in shaping people s lives during the age of the Venerable Bede and King Alfred Building Anglo Saxon England demonstrates how hundreds of recent excavations enable us to grasp for the first time how regionally diverse the built environment of the Anglo Saxons truly was Blair identifies a zone of eastern England with access to the North Sea whose economy prosperity and timber buildings had more in common with the Low Countries and Scandinavia than the rest of England The origins of villages and their field systems emerge with a new clarity as does the royal administrative organization of the kingdom of Mercia which dominated central England for two centuries Featuring a wealth of color illustrations throughout Building Anglo Saxon England explores how the natural landscape was modified to accommodate human activity and how many settlements secular and religious were laid out with geometrical precision by specialist surveyors The book also shows how the Anglo Saxon love of elegant and intricate decoration is reflected in the construction of the living environment which in some ways was more sophisticated than it would become after the Norman Conquest      **Highways and Byways in Oxford and the Cotswolds** Herbert Arthur Evans,1905      **History on the Ground** Maurice Beresford,2016-04-14 Taking the evidence of maps and documents this book originally published in 1957 describes 6 journeys in the field to parish boundaries Elizabethan villages the planted
