Mirman,2006 WHY GOD COULD NOT CREATE THE UNIVERSE WITH A DIFFERENT DIMENSION EVEN IF IT WANTED TO or perhaps anything else Perhaps the universe must be the way it is It seems that what is omnipotent is mathematics elementary arithmetic just counting Yet even mathematics is not powerful enough to create a universe there are just too many conditions conflicting Existence is impossible Beyond that for there to be structure is quite inconceivable But the universe does exist there are galaxies stars even the possibility of life That life is possible merely allows it to exist but only with the greatest good fortune does it actually occur Intelligence is vastly less likely ability and technology far more improbable That we are what we are seem so strange inconceivable that we are left merely with wonder and as we seem unable to realize the need for the deepest care responsibility and gratitude We have been given by the unbelievable benevolence of chance no life but life with the most wondrous part of the universe the ability to think to know to create to wonder and thus the demand that we use our most awesome gifts to protect them to protect and preserve the world in which they exist and the life likely so rare if not unique in the universe which has received these astounding favors of chance that has been given by nature its most exalted constituents What we are requires that we enhance what we are what we are part of to see understand and be grateful An exploration of the precise conditions required for the existence of humans in the universe the author does an admirable job delineating the laws of physics without becoming too bogged down in complicated jargon and he maintains a sense of wonder about the unique and random nature of the universe He repeatedly celebrates our highly improbable achievements as a species marveling at our ability to use the language of abstract mathematics to unravel the mysteries of existence the prevailing tone of the narrative is clear and confident marked by a meticulous attention to detail An often fascinating journey through the history of the universe and mankind Kirkus Discoveries **REDESIGNING WOMEN** Amanda D. Lotz,2010-10-01 In the 1990s American television audiences witnessed an unprecedented rise in programming devoted explicitly to women Cable networks such as Oxygen Media Women s

Entertainment Network and Lifetime targeted a female audience and prime time dramatic series such as Buffy the Vampire Slayer Judging Amy Gilmore Girls Sex and the City and Ally McBeal empowered heroines single career women and professionals struggling with family commitments and occupational demands After establishing this phenomenon s significance Amanda D Lotz explores the audience profile the types of narrative and characters that recur and changes to the industry landscape in the wake of media consolidation and a profusion of channels Employing a cultural studies framework Lotz examines whether the multiplicity of female centric networks and narratives renders certain gender stereotypes uninhabitable and how new dramatic portrayals of women have redefined narrative conventions Redesigning Women also reveals how these changes led to narrowcasting or the targeting of a niche segment of the overall audience and the ways in which the new sophisticated portrayals of women inspire sympathetic identification while also commodifying viewers into a marketable demographic for advertisers Subject Guide to Books in Print ,1971
