READING: BOSSES PREFER AUSSIE CULTURE OVER SKILLS

By Louise Williams from Sydney Morning Herald (6/10/92)

1 Australian companies routinely appoint Australian-born applicants over highly trained
2 migrants because they fear cultural difficulties in the workplace, a new study has
3 found. "There is an entrenched preference... which may not be overtly racist but is
4 covertly discriminatory," the study says.

5 The study, Minimising Diversity, is the first major assessment of the attitudes of
6 Australian employers to overseas-trained professionals. It involved an extensive
7 survey of 55 private and government organizations.

8 Its author, Ms Robyn Iredale, is a research fellow at the Centre for Multicultural
9 Studies at the University of Wollongong. She found that Australian employers
10 preferred the safe option of hiring graduates born and trained in Australia; despite
11 the potential business advantages of international experience and language skills that
12 migrant professionals could bring to the job.

13 In some cases she found migrant professionals were screened out of the selection
14 process as early as the first telephone call, by secretaries instructed not to take details of
15 applicants with accented English. The negative stereotypes included that the physical size
16 of some Asians was a factor in their unsuitability for positions of authority, that South
17 Africans and Indians were too authoritative for positions of power and the Turkish and
18 Polish migrants were difficult to integrate because of their 'hot-headedness'. "What struck
19 me most was that Australian employers had not even considered the advantages of
20 overseas-trained professionals," Ms Iredale said. Only one of the 55 organisations had
21 considered migrant professionals in terms of advantages, such as international business
22 links, rather than problems, such as cultural differences and lack of local experience.

23 The survey showed that recruitment methods of mining, construction and engineering
24 companies "virtually closed" the firms to overseas-qualified applicants living in
25 Australia. These industries relied heavily on recruiting at Australian universities,
26 informal, methods such as word-of-mouth involving local and family ties and a

male adolescents valuable status as potential heirs and many of the most precious surviving ceramics likely celebrated their coming of age rituals. The ardent hope was that youths would grow into effective kings and noblemen capable of leadership in battle and service in royal courts. Aiming to shift mainstream conceptions of the Maya, Houston argues that adolescent men were not simply present in images and texts but central to both.

Collectors, Scholars, and Forgers in the Ancient World Carolyn Higbie, 2017-01-26

Collectors and Forgers in the Ancient World focuses on the fascination which works of art, texts and antiquarian objects inspired in Greeks and Romans in antiquity and draws parallels with other cultures and eras to offer contexts for understanding that fascination. Statues, bronze weapons, books and bones might have been prized for various reasons because they had religious value, were the work of highly regarded artists and writers had been possessed by famous mythological figures or were relics of a long disappeared past. However, attitudes towards these objects also changed over time. Sculpture which was originally created for a religious purpose became valuable as art and could be removed from its original setting while historians discovered value in inscriptions and other texts for supporting historical arguments and literary scholars sought early manuscripts to establish what authors really wrote. As early as the Hellenistic era, some Greeks and Romans began to collect objects and might even display them in palaces, villas or gardens as these objects acquired value. A demand was created for more of them and so copyists and forgers created additional pieces while copyists imitated existing pieces of art, sometimes adapting to their new settings. Forgers created new pieces to complete a collection, fill a gap in historical knowledge, make some money or to indulge in literary play with knowledgeable readers. The study of forged relics is able to reveal not only what artefacts the Greeks and Romans placed value on but also what they believed they understood about their past and how they interpreted the evidence for it. Drawing on the latest scholarship on forgery and fakes as well as a range of examples, this book combines stories about frauds with an analysis of their significance and illuminates and explores the link between collectors, scholars and forgers in order to offer us a way to better understand the power that objects held over the ancient Greeks and Romans.

CSB Harmony of the Gospels Steven L. Cox, Kendell Easley, CSB Bibles by Holman, 2024-06-15

CSB Harmony of the Gospels is a synchronized reading of the Gospels based on the work of John A. Broadus and A. T. Robertson with each Gospel writer's account of events side by side. In addition to the harmonious layout, articles and commentary notes are included to provide deeper understanding of the four Gospels and the harmonized account of the life and teachings of Jesus. CSB Harmony of the Gospels features the highly readable, highly reliable text of the Christian Standard Bible. CSB captures the Bible's original meaning without sacrificing clarity, making it easier to engage with Scripture's life-transforming message and to share it with others.
