Canberra, the Operational Record Robert Jackson,1989 **Striving for Air Superiority** Craig C. Hannah,2002 Annotation Tactical bombing Gen Jimmy Doolittle reportedly observed is breaking the milk bottle Strategic bombing is killing the cow Most nations have historically chosen between building tactical and strategic air forces rarely has a state given equal

weight to both The advantages of tactical air power are obvious today as small wars and petty tyrants bedevil us but in a Cold War world split between continental superpowers strategic bombing took precedence with calamitous consequences In the 1960s the U S Air Force lacked the equipment and properly trained pilots to assure air superiority because the Tactical Air Command TAC had become little more than a handmaiden to the Strategic Air Command SAC TAC focused primarily on the interdiction of enemy bombers and virtually ignored its other responsibilities Its aircraft were designed to shoot at large lumbering bombers and not to engage in dog fights with highly maneuverable MiGs Hannah shows how a tactical air force that won a victory in World War II deteriorated into a second rate force flying aging aircraft during the early years of the Cold War recovered briefly over Korea then slid into obsolescence during the 1950s His explanation of why America s fighter aircraft did not work in Vietnam is instructive and unsettling Hannah explains how TAC struggled through the war in Vietnam to emerge in the 1970s as the best tactical air force in the world He side steps politics and inter service rivalries to focus on the nuts and bolts of tactical air power The result is a factual informative account of how an air force first loses its way then finds its mission again *History of the United States Air Force, 1907-1956* United States. Department of the Air Force, 1957

F-86 Sabre vs MiG-15 Douglas C. Dildy,Warren Thompson,2013-05-20 As the routed North Korean People s Army NKPA withdrew into the mountainous reaches of their country and the People s Republic of China PRC funneled in its massive infantry formations in preparation for a momentous counter offensive both lacked adequate air power to challenge US and UN Reluctantly Josef Stalin agreed to provide the requisite air cover introducing the superior swept wing MiG 15 to counter the American s straight wing F 80 jets This in turn prompted the USAF to deploy its very best the F 86A Sabre to counter this threat Thus began a two and a half year struggle in the skies known as MiG Alley In this period the unrelenting campaign for aerial superiority witnessed the introduction of successive models of these two revolutionary jets into combat This meticulously researched study not only provides technical descriptions of the two types and their improved variants complete with a fighter pilot s assessment of these aircraft but also chronicles the entire scope of their aerial duel in MiG Alley by employing the recollections of the surviving combatants including Russian Chinese and North Korean pilots who participated
