*The Face of the Earth* J. Donald Hughes,1999      **The Face of the Earth** J. Donald Hughes,2015-05-11 Although the organizing principle of virtually every world history text is development the editor of this volume maintains that this traditional approach fails to address the issue of sustainability By adopting the ecological process as their major theme the authors show how the process of human interaction with the natural environment unfolded in the past and offer perspective on the ecological crises in our world at the beginning of the 21st century Topics range from broad regional studies that examine important aspects of the global environment that affect nations to a study of the widespread influence of one important individual on his nation and beyond The authors take different approaches but all share the conviction that world history must take ecological process seriously and they all recognize the ways in which the living and non living systems of the earth have influenced the course of human affairs      The Face of the Earth J. Now in its second edition and refreshed by a decade of new research *The Environment in World History* uncovers the deep rooted causes of interconnected climate biodiversity and ecological crises that have brought the environment to the top of the global political agenda in the twenty first century Its expanded chapters and case studies explore a wide range of issues including the following the hunting of wildlife and the loss of biodiversity across the globe deforestation and the development of strategies to protect the world s forests soil degradation caused by worldwide agricultural expansion one of the most profound ways that humans have altered the planet the widening impact of urban industrial growth and the deepening ecological footprints of the world s cities and the rising levels of air land and water pollution as the trade off for continued economic growth worldwide Covering the last five hundred years it offers an essential environmental perspective on well known world history narratives of imperialism and colonialism trade and commerce technological progress and the advance of civilisation Clearly written and fully up to date it is an invaluable resource for all students of world history and environmental studies      *Changing the Face of the Earth* I. G. Simmons,1996-12-23 This is a history of the impact of humankind on the natural environment from earliest times to the present The first edition has been widely adopted in

universities acclaimed both for its wide scholarship and its author's readable style. The new edition is fully revised throughout and takes account of comments and suggestions received from all over the world. It has been restructured into a form appropriate for new methods of university teaching; the diagrams have been clarified and references and sections of further reading provided at the end of each chapter. Revised edition of a widely used textbook. More concise, more chapters better adapted to course use. Revised further reading. Clearly written, well illustrated, popular with students.

**An Environmental History of the World** J. Donald Hughes, 2002-09-26. An Environmental History of the World is a concise history from Ancient to Modern times of the interaction between human societies and the other forms of life that inhabit our planet. This original work follows a chronological path through the history of mankind in relationship to ecosystems around the world. Each chapter concentrates on a general period in human history which has been characterised by large scale changes in the relationship of human societies to the biosphere and gives three case studies that illustrate the significant patterns occurring at that time. Little environmental or historical knowledge is assumed from the reader in this introduction to environmental history.

*A Companion to World History* Douglas Northrop, 2014-12-15. A COMPANION TO WORLD HISTORY. This new volume offers insightful reflections by both leading and emerging world historians on approaches, methodologies, arguments and pedagogies of a sub-discipline that has continued to be in flux as well as in need of defining itself as a relevant alternative to the traditional national, regional or chronological fields of inquiry. Choice. The focus on the practicalities of how to do world history probably gives it its edge. Its thirty-three chapters are grouped into sections that address how to set up research projects in world history, how to teach it, how to get jobs in it, how to frame it, and how it is done in various parts of the globe. It is an actual handbook in other words, as opposed to a sample of exemplary work.

English Historical Review. A Companion to World History offers a comprehensive overview of the variety of approaches and practices utilized in the field of world and global history. This state-of-the-art collection of more than 30 insightful essays, including contributions from an international cast of leading world historians and emerging scholars in the field, identifies continuing areas of contention, disagreement and divergence while pointing out fruitful directions for further discussion and research. Themes and topics explored include the lineages and trajectories of world history, key ideas and methods employed by world historians, the teaching of world history and how it draws upon and challenges traditional approaches, and global approaches to writing world history. By considering these interwoven issues of scholarship and pedagogy from a transnational, interregional and world/global scale, fresh insights are gained and new challenges posed. With its rich compendium of diverse viewpoints, *A Companion to World History* is an essential resource for the study of the world's past.

[Environment and Urbanization in Modern Italy](#) Federico Paolini, 2020-05-12. From the second half of the 1940s, when postwar reconstruction began in Italy, there were three notable driving forces of environmental change: the uncontrollable process of urban drift, fueled by considerable migratory flows from the countryside and southern regions toward the cities, where large-scale productive

activities were beginning to amass unruly industrial development which was tolerated since it was seen as the necessary tribute to be paid to progress and modernization and mass consumption In his fourth book Federico Paolini presents a series of essays ranging from the uses of natural resources to environmental problems caused by means of transport to issues concerning environmental politics and the dynamics of the environment movement Paolini concludes the book with a forecast about the environmental problems that will emerge in the public debate of the twenty first century
