**THE FACES OF VIOLENCE** George B. Palermo, 2011-12-01 Thoroughly revised and rewritten this new Second Edition addresses the manifestations of violence with an unusual clarity and down to earth objectivity that studies poverty drugs access to guns joblessness poor education inadequate housing and the lack of stability that comes from an integrated family Doctor Palermo has spent a lifetime observing criminal violence as a psychiatrist for Milwaukee County He is well known for his plainspoken unpretentious testimony in the trial of serial killer Jeffrey Dahmer The author takes the position that there is an absence in the United States of a coherent culture of its material obsession the destructiveness of welfare the disintegration of the family unit and how all these forces have come together to perpetuate and increase violence in our daily lives Although the book deals with crimes against the physical person other forms of criminal behavior that have recently appeared on the social scene are explored such as Internet crimes white collar crimes and identity theft It is a must read for all those professionals in the psychiatric criminological and forensic fields     **Law Books in Print: Title index** Glanville Publishers, Incorporated, 1997     *Performance Art in the Second Public Sphere* Katalin Cseh-Varga, Adam Czirak, 2018-02-01 *Performance Art in the Second Public Sphere* is the first interdisciplinary analysis of performance art in East Central and Southeast Europe under socialist rule By investigating the specifics of event based art forms in these regions each chapter explores the particular critical roles that this work assumed under censorial circumstances The artistic networks of Yugoslavia Hungary Latvia Lithuania Poland Romania East Germany and Czechoslovakia are discussed with a particular focus on the discourses that shaped artistic practice at the time drawing on the methods of Performance Studies and Media Studies as well as more familiar reference points from art history and area studies     **Holistic Health Care Accreditation - First Edition - 2018** Holistic Health Care Resources, 2017-12-19 On behalf of the Holistic Health Care Accreditation HHCA and the commission on Accreditation it is a distinct honor and privilege to offer the international criteria that is committed to improve patient safety and enhance safety environment for health care providers through the provision of education consultation research publications and evaluation services     **The Publishers Weekly**, 1972     **The Hypocritical Imagination** John Llewellyn, 2008-03-07 For philosophers such as Kant the imagination is the starting point for all thought For others such as Wittgenstein what is important is only how the word imagination is used In spite of the attention the imagination has received from major philosophers remarkably little has been written about the radically different interpretations they have made of it *The HypoCritical Imagination Between Kant and Levinas* is an outstanding contribution to this vacuum Focusing on Kant and Levinas John Llewellyn takes us on a dazzling tour of the philosophical imagination He shows us that despite the different treatments they accord to the imagination there is much to be gained from comparing these two key thinkers From Kant Llewellyn shows how the imagination is the common root of all understanding He contrasts this with the thought of Emmanuel Levinas for whom the imagination plays an ambivalent role both as necessary for and a

threat to recognition of the other John Llewelyn also introduces the importance of the work of Heidegger Schelling Hegel Arendt and Derrida on the imagination and what this work can tell us about the relationship between the imagination and ethics aesthetics and literature The HypoCritical Imagination Between Kant and Levinas is a brilliant reading of a neglected but important philosophical theme and is essential reading for those in contemporary philosophy art theory and literature

*Do I Know You?* Sharrona Pearl, 2023-11-28 A fascinating history of how we recognize faces or fail to recognize them In *Do I Know You* Sharrona Pearl explores the fascinating category of face recognition and the the face recognition spectrum which ranges from face blindness at one end to super recognition at the other Super recognizers can recall faces from only the briefest exposure while face blind people lack the capacity to recognize faces at all including those of their closest loved ones Informed by archival research the latest neurological studies and testimonials from people at both ends of the spectrum Pearl tells a nuanced story of how we relate to each other through our faces The category of face recognition is relatively new despite the importance of faces in how we build relationships and understand our own humanity Pearl shows how this most tacit of knowledge came to enter the scientific and diagnostic field despite difficulties with identifying it She offers a grounded framework for how we evaluate others and draw conclusions about them with significant implications for race gender class and disability Pearl explores the shifting ideas around the face recognition spectrum explaining the effects of these diagnoses on real people alongside implications for how facial recognition is studied and understood Face blindness is framed as a disability while super recognition is framed as a superpower with no meaningful disadvantages This superhero rhetoric is tied to the use of super recognizers in criminal detection prosecution and other forms of state surveillance *Do I Know You* demonstrates a humanistic approach to the study of the brain one that offers an entirely new method for examining this fundamental aspect of human interaction The combination of personal narratives scientific and medical research and high profile advocates like Oliver Sacks helped to establish face recognition as a category and a spectrum in both diagnostic and experiential realms Building on an interdisciplinary foundation that includes the history of medicine science and technology disability studies media and communication artificial intelligence ethics and the health humanities Pearl challenges the binary nature of spectrum thinking in general and provides a fascinating case study in the treatment of this new scientific category
