relationship with the clinician which can then be expanded to life situations at home and at school This handbook is the first to provide a manualized short term dynamic approach to the externalizing behaviors of childhood offering organizing framework and detailed descriptions of the processes involved in RFP C Supplying clinicians with a systematic individual psychotherapy as an alternative or complement to PMT CBT and psychotropic medication it also shifts focus away from simply helping parents manage their children s misbehaviors Significantly the approach shows that clinical work with these children is compatible with understanding the children s brain functioning and posits that contemporary affect oriented conceptualizations of defense mechanisms are theoretically similar to the neuroscience construct of implicit emotion regulation promoting an interface between psychodynamics and contemporary academic psychiatry and psychology Manual of Regulation Focused Psychotherapy for Children RFP C with Externalizing Behaviors A Psychodynamic Approach is a comprehensive tool capable of application at all levels of professional training offering a new approach for psychoanalysts child and adolescent counselors psychotherapists and mental health clinicians in fields including social work psychology and psychiatry
